| <b>List of Figures, Tables and Big Pictures</b>       | <b>xi</b> |
| <b>Preface</b>  | <b>xv</b> |
| <b>1 Introduction</b>                                 | <b>1</b>  |
| 1.1 What is a trading platform?                       | 1         |
| 1.1.1 Model archival                                  | 1         |
| 1.1.2 Incremental deployability                       | 2         |
| 1.1.3 Live data feeds                                 | 2         |
| 1.1.4 Trade persistence                               | 2         |
| 1.1.5 Regular processing                              | 3         |
| 1.2 Quants and quantitative developers                | 3         |
| 1.3 Need for speed                                    | 4         |
| 1.4 Implementation options                            | 5         |
| 1.4.1 Outsource to vendor                             | 5         |
| 1.4.2 Use vendor API                                  | 5         |
| 1.4.3 Develop in-house                                | 6         |
| 1.4.4 Replace vended systems                          | 7         |
| 1.5 Current trends                                    | 7         |
| 1.6 Technical and business aspects of platform design | 8         |
| 1.7 Importance of processes                           | 10        |
| 1.8 Objectives and organization                       | 12        |
| Quiz  | 13        |
| <b>2 Overview of Banking</b>                          | <b>15</b> |
| 2.1 The offices                                       | 16        |
| 2.2 Front office                                      | 16        |
| 2.2.1 Economists                                      | 18        |

|          |                                     |           |
|----------|-------------------------------------|-----------|
| 2.2.2    | Structurers                         | 18        |
| 2.2.3    | Sales                               | 18        |
| 2.2.4    | Trading desks                       | 19        |
| 2.2.5    | Desk quants                         | 19        |
| 2.2.6    | Platform or quantitative developers | 19        |
| 2.2.7    | Desk risk management                | 20        |
| 2.3      | Middle office                       | 20        |
| 2.3.1    | Product control                     | 20        |
| 2.3.2    | Treasury control unit               | 22        |
| 2.3.3    | Market risk management              | 23        |
| 2.3.4    | Credit risk management              | 23        |
| 2.3.5    | Operational risk management         | 24        |
| 2.3.6    | Rates management                    | 26        |
| 2.3.7    | Static data management              | 26        |
| 2.3.8    | Compliance and reporting            | 27        |
| 2.3.9    | Market risk management analytics    | 27        |
| 2.3.10   | Asset and liability management      | 27        |
| 2.4      | Back office                         | 29        |
| 2.5      | Supporting units                    | 29        |
| 2.6      | Summary                             | 30        |
|          | Quiz                                | 31        |
| <b>3</b> | <b>Trade Life Cycle</b>             | <b>33</b> |
| 3.1      | Pre-trade activities                | 34        |
| 3.2      | Inception                           | 35        |
| 3.3      | Validation                          | 38        |
| 3.4      | Regular processing                  | 40        |
| 3.5      | Life-cycle events                   | 43        |
| 3.6      | Termination and settlement          | 45        |
| 3.7      | Post-trade Activities               | 47        |
| 3.8      | Summary                             | 47        |
|          | Quiz                                | 48        |
| <b>4</b> | <b>Trade Perspectives</b>           | <b>49</b> |
| 4.1      | Trade-centric view                  | 49        |
| 4.2      | Model-centric view                  | 51        |
| 4.3      | Product-centric view                | 53        |
| 4.4      | Asset-class view                    | 54        |
| 4.5      | Queues and status flags             | 55        |
| 4.6      | Aggregate views                     | 57        |
| 4.7      | Bottom-line view                    | 60        |
| 4.8      | Other perspectives                  | 61        |

|          |  |            |
|----------|--|------------|
| 4.9      | Summary  | 62         |
|          | Quiz   | 63         |
| <b>5</b> | <b>Programming Languages – Basics and Choices</b>                  | <b>65</b>  |
| 5.1      | Language choice  | 66         |
| 5.2      | Basics of computing  | 67         |
|          | 5.2.1 Development cycle  | 67         |
|          | 5.2.2 Dependencies and Makefiles                                   | 69         |
|          | 5.2.3 Lexical structure of a programming language                  | 70         |
| 5.3      | Object-oriented languages  | 75         |
|          | 5.3.1 Basics of object-oriented methodology                        | 75         |
|          | 5.3.2 Advantages and disadvantages of the object-oriented approach | 78         |
| 5.4      | Functional programming   | 79         |
| 5.5      | Summary  | 84         |
|          | Quiz   | 85         |
| <b>6</b> | <b>Trading Platform Design</b>                                     | <b>87</b>  |
| 6.1      | General design considerations                                      | 87         |
|          | 6.1.1 Maintainability and documentation                            | 88         |
|          | 6.1.2 Scalability and extensibility                                | 89         |
|          | 6.1.3 Security and access control                                  | 90         |
| 6.2      | Architecture components  | 91         |
|          | 6.2.1 Trade representation   | 92         |
|          | 6.2.2 Market representation  | 94         |
|          | 6.2.3 Static data management                                       | 97         |
|          | 6.2.4 Quant library  | 97         |
|          | 6.2.5 Trade transformations and operations                         | 98         |
|          | 6.2.6 Settlement triggers or pathways                              | 100        |
|          | 6.2.7 Batch processing and grid computing                          | 102        |
|          | 6.2.8 Credit replication   | 106        |
|          | 6.2.9 Security and audit model                                     | 107        |
|          | 6.2.10 Documentation and support model                             | 110        |
| 6.3      | Example architecture   | 111        |
| 6.4      | Advanced architecture  | 113        |
| 6.5      | Summary  | 117        |
|          | Quiz   | 117        |
| <b>7</b> | <b>Computing Patterns for Trading</b>                              | <b>119</b> |
| 7.1      | Facade pattern   | 121        |
| 7.2      | Visitor pattern  | 123        |
| 7.3      | Singleton pattern  | 129        |

|           |  |            |
|-----------|--|------------|
| 7.4       | Factory patterns                         | 131        |
| 7.5       | Component object model                   | 133        |
| 7.6       | Summary                                  | 134        |
|           | Quiz                                     | 135        |
| <b>8</b>  | <b>Flexible Derivatives Pricing Tool</b> | <b>137</b> |
| 8.1       | Design scope                             | 137        |
| 8.2       | Design goals and features                | 138        |
|           | 8.2.1 Pricing tool features              | 138        |
|           | 8.2.2 Data types support                 | 140        |
| 8.3       | User interface                           | 141        |
|           | 8.3.1 Main control interface             | 143        |
|           | 8.3.2 Create/edit product                | 145        |
|           | 8.3.3 Create/edit model                  | 146        |
|           | 8.3.4 Generating a function template     | 147        |
|           | 8.3.5 Complex parameter visualization    | 150        |
|           | 8.3.6 Pricing interface                  | 154        |
|           | 8.3.7 Visualization interface            | 156        |
|           | 8.3.8 Finite difference engine           | 159        |
| 8.4       | Summary                                  | 161        |
|           | Quiz                                     | 163        |
| <b>9</b>  | <b>Pricing Tool to Trading Platform</b>  | <b>165</b> |
| 9.1       | Pricing tool: internals                  | 165        |
|           | 9.1.1 Common quant classes               | 167        |
|           | 9.1.2 Main interfaces                    | 170        |
|           | 9.1.3 Pluggable pricing models           | 176        |
|           | 9.1.4 Reusable components                | 177        |
|           | 9.1.5 Source code documentation          | 179        |
|           | 9.1.6 External packages                  | 179        |
| 9.2       | Future enhancements                      | 180        |
|           | 9.2.1 Trade database                     | 180        |
|           | 9.2.2 Market data                        | 181        |
|           | 9.2.3 Life-cycle management              | 190        |
|           | 9.2.4 Security and access control        | 190        |
|           | 9.2.5 Batch process                      | 191        |
| 9.3       | Summary                                  | 191        |
|           | Quiz                                     | 191        |
| <b>10</b> | <b>Summing Up</b>                        | <b>193</b> |
| 10.1      | Epilogue                                 | 193        |
| 10.2      | Further reading                          | 195        |
