<b>About the Authors</b>	<b>xi</b>
<b>PART I WHY INVESTMENTS MATTER</b>	<b>1</b>
<b>1 Introduction</b>	<b>3</b>
1.1 Investments: the forgotten value lever	3
1.1.1 The early bird catches the worm	4
1.2 A bird's-eye view of the book content	6
1.2.1 Part I: Why investments matter	6
1.2.2 Part II: Getting investments right	7
1.2.3 Part III: Right allocation: Managing a company's investment portfolio	9
1.3 Why investments matter: the importance and structure of capital investments	10
1.3.1 The relevance of capital investments	10
1.3.2 The structure of capital investments	16
1.3.3 Time dependence of capital investments	21
1.3.4 The future of capital investments	26
1.4 Summary	27
Appendix 1.1: Wavelet analysis: Extracting frequency information from investment timelines	27
References	29
<b>PART II GETTING INVESTMENTS RIGHT</b>	<b>31</b>
<b>2 Right Positioning: Managing an Asset's Exposure to Economic Risk</b>	<b>33</b>
2.1 Preface	33
2.2 Asset exposure determines the achievable return on an investment	33
2.3 Five levels of protection determine the asset exposure	35
2.4 A simple scoring metric to measure asset exposure	37

---

2.5	Quantitative asset exposure analysis shows high correlation with ROIC at all levels	42
2.5.1	Using exposure level analysis for benchmarking	45
2.6	Strategies to reduce asset exposure	47
2.6.1	Strategy 1: Create public-private, win-win situations in natural monopoly environments	48
2.6.2	Strategy 2: Foster regulatory conditions that enable sufficient investment levels	49
2.6.3	Strategy 3: Create the right structural conditions and ensure fair access to scarce resources	49
2.6.4	Strategy 4: Establish protection for intellectual property	50
2.6.5	Strategy 5: Achieve a strong commercial position	50
2.6.6	Strategy 6: Minimize fixed capital costs or outsource asset ownership (go “asset light”)	52
2.7	Summary	53
<b>3</b>	<b>Right Technology: How to Optimize Innovation Timing and Risks</b>	<b>55</b>
3.1	Capital investments in technology innovation	55
3.1.1	Technology analysis	57
3.1.2	Assess risks	63
3.1.3	Mitigating technology risks	67
3.2	Summary	69
<b>4</b>	<b>Right Timing: How Cyclicalit y Affects Return on Investments and What Companies Can Do About It</b>	<b>71</b>
4.1	How cyclicalit y destroys value	71
4.2	Industry drivers of cyclicalit y	73
4.2.1	Impact of investment lead times	77
4.2.2	Slow-to-no market growth	78
4.2.3	High price sensitivit y	78
4.2.4	Investment timing with respect to the cycle	79
4.3	Developing an economic model of cyclicalit y	81
4.3.1	A fundamental law of economic cycles	81
4.3.2	Base parameters of simple economic oscillations	83
4.3.3	Reaction of cyclical systems to external “excitation”	85
4.3.4	Economic cycles with more than one player present	87
4.4	Measures to cope with cyclicalit y	90
4.4.1	Reaction delay	91
4.4.2	Reaction strength	92
4.4.3	“Jokers” that can help beat the cycle	92
4.4.4	Where no joker is available	95
4.5	Summary	98
	Appendix 4A: A differential equation for economic cyclicalit y	98
	Reference	100
<b>5</b>	<b>Right Size: Balancing Economies and Diseconomies of Scale</b>	<b>101</b>
5.1	Introduction: The role of scale in determining profitability	101
5.2	Assessing economies of scale	103

5.2.1	Fixed cost leverage	104
5.2.2	Decreasing unit costs	105
5.2.3	Equipment utilization/chunkiness of capacity	106
5.2.4	Critical size	107
5.3	Determining diseconomies of scale	107
5.3.1	Cost elements	109
5.4	Risk elements	111
5.4.1	Utilization risks	113
5.4.2	Market reaction risks	115
5.4.3	Technology risks	116
5.4.4	Timing risks	116
5.5	An approach for finding the “sweet spot”	117
5.5.1	Scale effect model	117
5.6	Real-life examples	118
5.6.1	Automotive industry case example	118
5.6.2	Base chemicals case example	119
5.7	Summary	120
	Reference	121
<b>6</b>	<b>Right Location: Getting the Most from Government Incentives</b>	<b>123</b>
6.1	Government incentives: An overview	124
6.1.1	Creating public-private, win-win situations	125
6.2	Common types of incentive instruments	127
6.2.1	Subsidies	131
6.2.2	Financing support	131
6.2.3	Tax relief	133
6.2.4	Other types of government incentives	134
6.3	The financial impact of incentives: A modeling approach	136
6.3.1	General impact of subsidies	137
6.3.2	General impact of financing support	138
6.3.3	General impact of tax relief	138
6.3.4	Specific impact of incentives on different industries	139
6.4	Geographical differences in incentive structures	140
6.5	Managing government incentives	141
6.6	Summary	142
	References	142
<b>7</b>	<b>Right Design: How to Make Investments Lean and Flexible</b>	<b>143</b>
7.1	Lean design as a competitive advantage	143
7.1.1	The lean way: Moving from capital investment projects to a lean design system	143
7.2	The three dimensions of a lean capital investment system	146
7.3	Dimension 1: The technical system	147
7.3.1	Start with project objectives, design principles, and target setting	147
7.3.2	Value engineering and lean tools	149
7.3.3	Design optimization	152
7.3.4	From the basic design to start of production	153
7.3.5	Anchoring tools and practices to formal standards	155

viii	Contents	
7.4	Dimensions 2 & 3: Management infrastructure, mindset and behavior	155
7.4.1	Project organization and performance management	155
7.4.2	Institutionalization and learning	156
7.4.3	Adapting the system to local specifics: Project design cannot be “one size fits all”	156
7.4.4	Getting started	157
7.5	Flexibility: Just what customers and the company need and no more	158
7.5.1	Macro-level flexibility: modularity in plant design to ensure flexible, cost-efficient assets	158
7.5.2	Midi-level flexibility in plant design: cater for product portfolio diversity	159
7.5.3	Micro-level flexibility in plant design: design for iso-productivity	160
7.6	How to avoid creating a front-page disaster: Anticipating what can go wrong	162
7.6.1	Performance management and decision making	163
7.6.2	Tools which every company and project team need to master	164
7.6.3	Cross-functional coordination	165
7.7	Summary	166
	References	166
<b>8</b>	<b>Right Financing: Shaping the Optimal Finance Portfolio</b>	<b>167</b>
8.1	Why Financing Matters	167
8.2	Three-Step Financing Approach	170
8.2.1	Step 1: Evaluating the investment’s cash flow parameters	170
8.2.2	Step 2: Assessing investment risks	172
8.2.3	Step 3: Composing the financing portfolio	180
8.3	Summary	183
	References	183
<b>PART III</b>		<b>185</b>
<b>9</b>	<b>Right Allocation: How to Allocate Money Within the Company</b>	<b>187</b>
9.1	Key requirements for capital allocation	188
9.2	Four models of the corporate center role in shaping the investment portfolio	192
9.3	Capital allocation approach for operators and strategic controllers	195
9.3.1	Step 1: Treat special projects as high priority	196
9.3.2	Step 2: Allocate remaining capital to business units	197
9.3.3	Step 3: Business units distribute capital to individual investments	199
9.3.4	Step 4: Implement a capital assurance process	201
9.3.5	Improving the “capital allocation key”	203
9.3.6	Capital allocation backbone	204
9.4	Capital allocation approach for strategic architects and financial holding structures	210
9.5	Summary	213
	References	213
