<b>Introduction</b>	<b>xiii</b>
<b>1 Introduction to How to Display Data and the Scatter Plot</b>	<b>1</b>
1.1 Introduction	1
1.2 Scatter Plots	2
1.3 Data Identification	2
1.3.1 An example of salary against age	2
1.4 Why Draw a Scatter Plot?	3
1.5 Matrix Plots	4
1.5.1 An example of salary against age: Revisited	5
<b>2 Bar Charts</b>	<b>7</b>
2.1 Introduction	7
2.2 Discrete Data	7
2.3 Relative Frequencies	8
2.4 Pie Charts	12
<b>3 Histograms</b>	<b>13</b>
3.1 Continuous Variables	13
3.2 Cumulative Frequency Polygon	14
3.3 Sturges' Formula	20
<b>4 Probability Theory</b>	<b>21</b>
4.1 Introduction	21
4.2 Basic Probability Concepts	21
4.3 Estimation of Probabilities	22
4.4 Exclusive Events	22
4.5 Independent Events	22
4.6 Comparison of Exclusivity and Independence	23
4.7 Venn Diagrams	23
4.8 The Addition Rule for Probabilities	24
4.8.1 A simple probability example using a Venn diagram	25
4.9 Conditional Probability	25
4.9.1 An example of conditional probability	26

4.10	The Multiplication Rule for Probabilities	26
4.10.1	A classical example of conditional probability	27
4.11	Bayes' Theorem	27
4.11.1	An example of Bayes' theorem	28
4.11.2	Bayes' theorem in action for more groups	29
4.11.3	Bayes' theorem applied to insurance	29
4.12	Tree Diagram	30
4.12.1	An example of prediction of success	30
4.12.2	An example from an American game show: The Monty Hall Problem	34
4.13	Conclusion	35
<b>5</b>	<b>Standard Terms in Statistics</b>	<b>37</b>
5.1	Introduction	37
5.2	Maximum and Minimum	37
5.2.1	Mean	37
5.2.2	Median	38
5.2.3	Mode	39
5.3	Upper and Lower Quartile	39
5.4	MQMQM Plot	40
5.5	Skewness	41
5.6	Variance and Standard Deviation	41
5.7	Measures for Continuous Data	44
<b>6</b>	<b>Sampling</b>	<b>47</b>
6.1	Introduction	47
6.2	Planning Data Collection	47
6.3	Methods for Survey Analysis	48
6.3.1	Random samples	49
6.3.2	Systematic sampling	49
6.3.3	Stratified sampling	49
6.3.4	Multistage sampling	50
6.3.5	Quota sampling	50
6.3.6	Cluster sampling	50
6.4	How It Can Go Wrong	50
6.5	What Might Be In a Survey?	51
6.6	Cautionary Notes	51
<b>7</b>	<b>Probability Distribution Functions</b>	<b>53</b>
7.1	Introduction	53
7.2	Discrete Uniform Distribution	53
7.2.1	Counting techniques	54
7.2.2	Combination	54
7.2.3	Permutation	55
7.3	Binomial Distribution	55
7.3.1	Example of a binomial distribution	56

	Contents	vii
7.3.2	Pascal's triangle	56
7.3.3	The use of the binomial distribution	57
7.4	The Poisson Distribution	58
7.4.1	An example of the Poisson distribution	59
7.4.2	Uses of the Poisson distribution	60
7.5	Uses of the Binomial and Poisson Distributions	60
7.5.1	Is suicide a Poisson process?	62
7.6	Continuous Uniform Distribution	64
7.7	Exponential Distribution	66
<b>8</b>	<b>Normal Distribution</b>	<b>67</b>
8.1	Introduction	67
8.2	Normal Distribution	67
8.2.1	A simple example of normal probabilities	69
8.2.2	A second example of normal probabilities	69
8.3	Addition of Normal Variables	70
8.4	Central Limit Theorem	70
8.4.1	An example of the Central Limit Theorem	70
8.5	Confidence Intervals for the Population Mean	71
8.5.1	An example of confidence intervals for the population mean	71
8.6	Normal Approximation to the Binomial Distribution	72
8.6.1	An example of the normal approximation to the binomial distribution	72
8.7	Normal Approximation to the Poisson Distribution	72
8.7.1	An example of fitting a normal curve to the Poisson distribution	73
<b>9</b>	<b>Comparison of the Means, Sample Sizes and Hypothesis Testing</b>	<b>75</b>
9.1	Introduction	75
9.2	Estimation of the Mean	75
9.2.1	An example of estimating a confidence interval for an experimental mean	76
9.3	Choice of the Sample Size	77
9.3.1	An example of selecting sample size	77
9.4	Hypothesis Testing	77
9.4.1	An example of hypothesis testing	78
9.5	Comparison of Two Sample Means	79
9.5.1	An example of a two-sample $t$ test	79
9.6	Type I and Type II Errors	80
9.6.1	An example of type I and type II errors	80
<b>10</b>	<b>Comparison of Variances</b>	<b>83</b>
10.1	Introduction	83
10.2	Chi-Squared Test	83
10.2.1	An example of the chi-squared test	83
10.3	$F$ Test	85
10.3.1	An example of the $F$ test	85
10.3.2	An example considering the normal distribution	85

<b>11</b>	<b>Chi-squared Goodness of Fit Test</b>	<b>91</b>
11.1	Introduction	91
11.2	Contingency Tables	92
11.3	Multiway Tables	94
11.3.1	An example of a four by four table	94
<b>12</b>	<b>Analysis of Paired Data</b>	<b>97</b>
12.1	Introduction	97
12.2	$t$ Test	97
12.3	Sign Test	98
12.4	The $U$ Test	99
12.4.1	An example of the use of the $U$ test	101
<b>13</b>	<b>Linear Regression</b>	<b>103</b>
13.1	Introduction	103
13.2	Linear Regression	103
13.3	Correlation Coefficient	104
13.3.1	An example of examining correlation	105
13.4	Estimation of the Uncertainties	109
13.5	Statistical Analysis and Interpretation of Linear Regression	110
13.6	ANOVA for Linear Regression	110
13.7	Equations for the Variance of $a$ and $b$	112
13.8	Significance Test for the Slope	112
13.8.1	An example of slope analysis	113
13.8.2	A further example of correlation and linear regression	115
<b>14</b>	<b>Analysis of Variance</b>	<b>121</b>
14.1	Introduction	121
14.2	Formal Background to the ANOVA Table	121
14.3	Analysis of the ANOVA Table	122
14.4	Comparison of Two Causal Means	123
14.4.1	An example of extinguisher discharge times	123
14.4.2	An example of the lifetime of lamps	125
<b>15</b>	<b>Design and Approach to the Analysis of Data</b>	<b>129</b>
15.1	Introduction	129
15.2	Randomised Block Design	129
15.2.1	An example of outsourcing	130
15.3	Latin Squares	131
15.4	Analysis of a Randomised Block Design	132
15.5	Analysis of a Two-way Classification	135
15.5.1	An example of two-way analysis	137
15.5.2	An example of a randomised block	140
15.5.3	An example of the use of the Latin square	143
<b>16</b>	<b>Linear Programming: Graphical Method</b>	<b>149</b>
16.1	Introduction	149

	Contents	ix
16.2	Practical Examples	149
16.2.1	An example of an optimum investment strategy	149
16.2.2	An example of the optimal allocation of advertising	154
<b>17</b>	<b>Linear Programming: Simplex Method</b>	<b>159</b>
17.1	Introduction	159
17.2	Most Profitable Loans	159
17.2.1	An example of finance selection	164
17.3	General Rules	167
17.3.1	Standardisation	167
17.3.2	Introduction of additional variables	167
17.3.3	Initial solution	167
17.3.4	An example to demonstrate the application of the general rules for linear programming	167
17.4	The Concerns with the Approach	170
<b>18</b>	<b>Transport Problems</b>	<b>171</b>
18.1	Introduction	171
18.2	Transport Problem	171
<b>19</b>	<b>Dynamic Programming</b>	<b>179</b>
19.1	Introduction	179
19.2	Principle of Optimality	179
19.3	Examples of Dynamic Programming	180
19.3.1	An example of forward and backward recursion	180
19.3.2	A practical example of recursion in use	182
19.3.3	A more complex example of dynamic programming	184
19.3.4	The 'Travelling Salesman' problem	185
<b>20</b>	<b>Decision Theory</b>	<b>189</b>
20.1	Introduction	189
20.2	Project Analysis Guidelines	190
20.3	Minimax Regret Rule	192
<b>21</b>	<b>Inventory and Stock Control</b>	<b>195</b>
21.1	Introduction	195
21.2	The Economic Order Quantity Model	195
21.2.1	An example of the use of the economic order quantity model	196
21.3	Non-zero Lead Time	199
21.3.1	An example of Poisson and continuous approximation	200
<b>22</b>	<b>Simulation: Monte Carlo Methods</b>	<b>203</b>
22.1	Introduction	203
22.2	What is Monte Carlo Simulation?	203
22.2.1	An example of the use of Monte Carlo simulation: Theory of the inventory problem	203
22.3	Monte Carlo Simulation of the Inventory Problem	205

22.4	Queuing Problem	208
22.5	The Bank Cashier Problem	209
22.6	Monte Carlo for the Monty Hall Problem	212
22.7	Conclusion	214
<b>23</b>	<b>Reliability: Obsolescence</b>	<b>215</b>
23.1	Introduction	215
23.2	Replacement at a Fixed Age	215
23.3	Replacement at Fixed Times	217
<b>24</b>	<b>Project Evaluation</b>	<b>219</b>
24.1	Introduction	219
24.2	Net Present Value	219
24.2.1	An example of net present value	219
24.3	Internal Rate of Return	220
24.3.1	An example of the internal rate of return	220
24.4	Price/Earnings Ratio	222
24.5	Payback Period	222
24.5.1	Mathematical background to the payback period	222
24.5.2	Mathematical background to producing the tables	223
<b>25</b>	<b>Risk and Uncertainty</b>	<b>227</b>
25.1	Introduction	227
25.2	Risk	227
25.3	Uncertainty	227
25.4	Adjusting the Discount Rate	228
25.5	Adjusting the Cash Flows of a Project	228
25.5.1	An example of expected cash flows	228
25.6	Assessing the Margin of Error	229
25.6.1	An example of break-even analysis	229
25.7	The Expected Value of the Net Present Value	231
25.7.1	An example of the use of the distribution approach to the evaluation of net present value	231
25.8	Measuring Risk	232
25.8.1	An example of normal approximation	234
<b>26</b>	<b>Time Series Analysis</b>	<b>235</b>
26.1	Introduction	235
26.2	Trend Analysis	236
26.3	Seasonal Variations	236
26.4	Cyclical Variations	240
26.5	Mathematical Analysis	240
26.6	Identification of Trend	241
26.7	Moving Average	241
26.8	Trend and Seasonal Variations	242
26.9	Moving Averages of Even Numbers of Observations	244
26.10	Graphical Methods	247

<b>27 Reliability</b>	<b>249</b>
27.1 Introduction	249
27.2 Illustrating Reliability	249
27.3 The Bathtub Curve	249
27.4 The Continuous Case	251
27.5 Exponential Distribution	252
27.5.1 An example of exponential distribution	252
27.5.2 An example of maximum of an exponential distribution	254
27.6 Weibull Distribution	255
27.6.1 An example of a Weibull distribution	256
27.7 Log-Normal Distribution	257
27.8 Truncated Normal Distribution	260
<b>28 Value at Risk</b>	<b>261</b>
28.1 Introduction	261
28.2 Extreme Value Distributions	262
28.2.1 A worked example of value at risk	262
28.3 Calculating Value at Risk	264
<b>29 Sensitivity Analysis</b>	<b>267</b>
29.1 Introduction	267
29.2 The Application of Sensitivity Analysis to Operational Risk	267
<b>30 Scenario Analysis</b>	<b>271</b>
30.1 Introduction to Scenario Analysis	271
30.2 Use of External Loss Data	271
30.3 Scaling of Loss Data	272
30.4 Consideration of Likelihood	272
30.5 Anonimised Loss Data	273
<b>31 An Introduction to Neural Networks</b>	<b>275</b>
31.1 Introduction	275
31.2 Neural Algorithms	275
<b>Appendix Mathematical Symbols and Notation</b>	<b>279</b>
<b>Index</b>	<b>285</b>
