

## A

### Application of DEA models

overview, 67–68, 110

results

- agricultural CTA input-oriented CRS and VRS models, 108
- agricultural CTA output-oriented CRS and VRS models, 108
- currency CTA input-oriented CRS and VRS models, 102–103
- currency CTA output-oriented CRS and VRS models, 104
- diversified CTA input-oriented CRS and VRS models, 95–96
- diversified CTA output-oriented CRS and VRS models, 97
- event-driven input-oriented CRS and VRS models, 73–74
- event-driven output-oriented CRS and VRS models, 75
- financials CTA input-oriented CRS and VRS models, 98–100
- financials CTA output-oriented CRS and VRS models, 101
- fund of hedge funds input-oriented CRS and VRS models, 70–71
- fund of hedge funds output-oriented CRS and VRS models, 72
- global emerging input-oriented CRS and VRS models, 81–82
- global emerging output-oriented CRS and VRS models, 83
- global established input-oriented CRS and VRS models, 84–85
- global established output-oriented CRS and VRS models, 86
- global international input-oriented CRS and VRS models, 87–88

- global international output-oriented CRS and VRS models, 89
- global macro input-oriented CRS and VRS models, 79
- global macro output-oriented CRS and VRS models, 80
- long only input-oriented CRS and VRS models, 93
- long only output-oriented CRS and VRS models, 93
- market-neutral input-oriented CRS and VRS models, 76–77
- market-neutral output-oriented CRS and VRS models, 78
- overview, 68–69
- sector input-oriented CRS and VRS models, 90–91
- sector output-oriented CRS and VRS models, 92
- short sellers input-oriented CRS and VRS models, 94
- short sellers output-oriented CRS and VRS models, 94
- Spearman correlation of hedge fund and CTA classifications, 109
- stock index CTA input-oriented CRS and VRS models, 105–106
- stock index CTA output-oriented CRS and VRS models, 107

## B

### Benchmarking models

application

overview, 139–140, 152

results

- agricultural CTA input- and output-oriented VRS fixed- and variable-benchmark scores, 151

- Benchmarking models (*Continued*)
- currency CTA input- and output-oriented VRS fixed- and variable-benchmark scores, 150
  - diversified CTA input- and output-oriented VRS fixed- and variable-benchmark scores, 148
  - event driven input-oriented VRS-CRS fixed- and variable-benchmark scores, 142
  - financials CTA input- and output-oriented VRS fixed- and variable-benchmark scores, 149
  - fund of hedge funds input-oriented CRS-VRS fixed- and variable-benchmark scores, 141
  - global established input- and output-oriented VRS fixed- and variable-benchmark scores, 145
  - global international input- and output-oriented VRS fixed- and variable-benchmark scores, 146
  - global macro input-oriented VRS fixed- and variable-benchmark scores, 144
  - long only input- and output-oriented VRS fixed- and variable-benchmark scores, 147
  - market neutral input-oriented VRS-CRS fixed and variable-benchmark scores, 143
  - overview, 140–141, 152
  - sector input- and output-oriented VRS fixed- and variable-benchmark scores, 147
  - short sellers input- and output-oriented VRS fixed- and variable-benchmark scores, 148
  - stock index CTA input- and output-oriented VRS fixed- and variable-benchmark scores, 151
  - fixed-benchmark model, 54–56
    - solving, 56
  - overview, 47
  - variable-benchmark model, 47–54
    - solving, 52–54
