Foreword	xi
Acknowledgments	xiii
Introduction	xv
CHAPTER 1	
Developments of the Current Financial Crisis	1
The Environment Before the Summer of 2007	1
The Summer of 2007: Prelude	2
After the Summer: Continuous Surprises	3
The Summer of 2008 and After: Fully Fledged Crisis	6
Some Similarities Between the Current Crisis and the Japanese Banking Crisis	12
CHAPTER 2	
Overview of the Financial Crisis	17
Breakdown of Factors in the Current Crisis	17
Creation of the Financial Bubble and the Trigger for its Bursting	18
Factors that Enabled the Financial Bubble to Grow for a Long Period	19
The Rampant O&D Model	19
Failure of the O&D Model: Expansion of Information Asymmetry	22
The Mythification of Risk Management	26
Factors that Amplified the Impacts of the Bubble Bursting	27
Malfunction of the Market Infrastructure and System that Support Marketization and Socialization of Risks	27
Accounting	28
Disclosure	31
Liquidity	32
General Risk Management	34
Macroprudential Policy	36

CHAPTER 3	
First Reactions: Countermeasures and Recommendations	37
Recommendations for the Crisis: One Hundred Flowers Blooming	37
Overview of the Recommendations Made by International Organizations	39
Statement Made by US Bank Regulators (March 2007)	39
Senior Supervisors Group Report (March 2008)	41
FSF Report (April 2008)	42
Reports of BCBS, April and June 2008, JF, April 2008, CGFS, July 2008	43
UBS Report (April 2008), Report of IIF (August 2008)	46
UK FSA Report (March 2008)	47
IMF's GFSR (October 2008)	48
Liquidity Provision by Major Countries' Central Banks (Since the Summer of 2007)	49
Classification of the Recommendations Made by International Organizations	51
Evaluation of the Recommendations –Dejà Vu?	53
CHAPTER 4	
Various Issues Highlighted by the Financial Crisis	55
Why Were the Same Mistakes Repeated?	55
Confusion in the Risk Concept: the Meaning of VaR	57
The Assumptions of VaR	57
The World Assumed by VaR: the Meaning of Stability of the External Environment	59
The Meaning of Two Horizons for Measuring the Degree of Stresses	60
The Impacts Provided by Different Horizons	62
Confusion in the Risk Concept: the Limits and the Possibility of Stress Testing	66
The Salvation of VaR-Centered Risk Management: Mounting Expectations on Stress Testing	66
Classification of Stress Testing Concepts	67
What Went Wrong with Stress Testing?	68
Degree of Stresses: Arguments Over “Horizontal Frequency”	69
What Degree of Stresses Should Financial Institutions Absorb?	69
Degree of Stresses in VaR	70
Confusion About the Confidence Level in Economic Capital Management	72
Degree of Stresses: Arguments Over the “Historical Frequency”	76

The Search for the Appropriate Degree of Stress from the Viewpoint of Historical Frequency	76
Difficulty in Forming Consensus on Historical Frequency	77
Difference Between Monetary Policy and Macroprudential Policy	79
Differences in How Risk Is Captured by Different Risk Categories	80
Differences in Stress Testing Among Different Risk Categories	80
Op Risk Quantification Under Basel II	81
Degrees of Stress to be Assumed for Op Risk Quantification	83
Securing Comprehensiveness and Objectivity of Stress Scenarios	85
Degree of Stresses: Liquidity Risk	86
The Arguments Over the Burden Sharing of Liquidity Risk Management Between Authorities and Banks	86
Issues Related to Fair Value Accounting	87
Issues of Market Liquidity Risk Management	88
Issue of Fundraising Liquidity Risk	90
Major Differences in Approach Between European, US and Japanese Central Banks	91
Analysis of Risk Factors Behind Stresses	96
Lessons from Op Risk Management	96
The Method of Risk Factor Classification Based on Causes	97
Arguments Assuming Endogeneity of Risk Control	99
Establishment of a Sustainable Regulation Structure	100
Required Reactions by the Authorities	100
Financial Crisis and Basel II	101
Evaluation of the Regulatory Reaction to the Crisis: Pillar 1	103
Evaluation of the Regulatory Reactions to the Crisis: Pillar 2	103
Evaluation of the Regulatory Reactions to the Crisis: Pillar 3	106
Evaluation of the Regulatory Reaction to the Crisis: Accounting Rule and External Rating Agencies	107

CHAPTER 5

Reform of Risk Management Based on the Lessons Learned from the Crisis 109

Overview of the Reform of Risk Management	109
Comparison with the Proposal of Kashyap, Rajan, and Stein (2008)	112
Improvement of Individual Institutions' Risk Management	114

Identification of Risk Factors: the Importance of Breaking Silos	115
Treatment of Invisible Risks	116
Collection of Risk Factor Information	117
Risk Measurement Methods	118
Stress Testing Methodology	120
ICAAP Based on the Measured Risk Amounts and Senior Manager Involvement in Risk Management	122
Liquidity Risk Management	124
Formation of a National Consensus on Sharing Losses	126
The Authorities' Reactions to the Crisis So Far	126
Recognition of the Limited Ability of Individual Institutions to Deal with Stresses	127
Stresses to be Shared by the Authorities (or Stresses Beyond Individual Institutions' Management)	128
How to Share the Losses Between the Authorities and Financial Institutions	128
Judgments of Specific Risks to be Shared by the Authorities	130
Preparation by the Authorities and Individual Financial Institutions for Stresses	131
The Type of the Current Financial Crisis	131
The Authorities' Preparation for the Crisis	138
The Individual Institutions' Crisis Preparation	143
The Scope of Industries to be Covered by Prudential Regulation	145
Establishing the Infrastructure for Financial Transactions (Accounting and Disclosure)	148
Introduction of Flexible and Proactive Macroprudential Policy	151
Concerns about Procyclicality	151
The Need for a Credit-Cycle-Smoothing Macroprudential Policy	152
Policy Targets	153
Policy Tools	154
The Agency to Conduct the Policy	159

CHAPTER 6

Strategic Reaction to the Financial Crisis: the Japanese and Asian Perspective	161
Frustration of Asian Countries	161
The Differences Between the Japanese Banking Crisis, the Asian Crises and the Current Financial Crisis	161
Reasons Japan and Asian Countries Cannot Place Policy Demands on the US and European Countries	162

Seclusion of the Japanese Financial Industry from the Global Picture	164
Japan: A Rare Country that has Few Home–Host Issues	164
Reasons for Seclusion	166
Future Strategies of the Japanese and Asian Financial Industries	167
The Importance of Risk Management of The Financial Industry from the Strategic Point of View	167
Asian Strategy	168

CHAPTER 7

Conclusion: Post-Crisis Risk Management to be Established 171

Risk Management of Individual Institutions	171
Financial Infrastructure	172
Macroprudential Policy	173

Epilogue 177

Enhancement of Regulations for Financial Institutions	178
Improvement of the Risk Management of Individual Financial Institutions	180
Enhancement of the Means of the Authorities to Stabilize the Financial System	180
Lack of Analysis of Root Causes of Losses under the Financial Crisis	182
Alienation of Regulation-Aligned Risk Management Practices	182
Greater Incentive for Financial Institutions to Work Around Regulations and Take Higher Risks	183
Wrong Incentive for Financial Institutions in Non-Epicenter Countries	184
Undue Damage to the Macroeconomy	186
Lack of Governance of International Rule-Making Process	188
