<b>Acknowledgments</b>	<b>xv</b>
<b>Preface</b>	<b>xvii</b>
<b>PART ONE</b>	
<b>The Aging Population: Issues for Retirement</b>	<b>1</b>
<b>CHAPTER 1</b>	
<b>Issues in Retirement</b>	<b>3</b>
1.1 Longevity and Changing Demographics across the World	4
1.2 The Evolution of Retirement	8
1.2.1 Older Workers as a Growing Share of the Work Force	11
1.3 Provision for Retirement	11
1.3.1 The Earliest Pensions	11
1.3.2 Early Corporate Pensions	12
1.3.3 Total Assets on Retirement	15
1.3.4 The Contribution of Various Assets at Retirement	15
References	19
<b>CHAPTER 2</b>	
<b>The Various Costs of Pensions: Macro and Micro</b>	<b>21</b>
2.1 Governmental Cost of Retirement	21
2.2 Pensions and Capital Formation	22
2.3 Regulating Corporate Pensions	24
2.3.1 US Regulations	24
2.3.2 Corporate Bankruptcies Leave a Trail of Broken Promises	30
2.3.3 Comparing Regulation of Occupational Pension Schemes in the EU and the United States	31
2.4 DC vs. DB: Shifting the Risks	33
2.4.1 Pensions, Corporate Earnings, and Tax Deferral	37
	<b>vii</b>

viii	CONTENTS
2.5	Freezing Pension Plans 39
2.6	Where Do We Go from Here? 40
	References 41
<b>CHAPTER 3</b>	
	<b>The Various Pillars of Retirement: Social Security, Company Pensions, Supplementary Pensions, and Private Savings 43</b>
3.1	Pillars of Retirement 43
3.2	Reforming OECD Pensions 51
3.3	Changing Role of Private Pensions 51
3.3.1	Summarizing Pension Reforms in the OECD 55
3.4	Plans for Reforming Social Pensions 56
3.4.1	Increase Contributions, Cut Benefits, Extend Working Life 56
3.4.2	Use the Contributions to Buy Stocks instead of Government Bonds 58
3.5	Rethinking Pension Promises: Breaking the Fixed Link to a Monetary Value 61
3.5.1	Feldstein's PRA with Guarantees 61
3.5.2	NDC: Notational or Nonfinancial Defined Contributions 62
3.5.3	The PAAW (Personal Annuitized Average Wage Security), a Variant of the NDC 66
3.6	Intergenerational Risk Sharing 67
3.7	Conclusions 69
3.8	Case Study: Public Sector vs. Private Pensions 70
3.8.1	Government Plans Are Different: US 70
3.8.2	Government Plans Are Different: Canada 72
3.8.3	What Do We Learn from These Comparisons? 73
	References 73
<b>CHAPTER 4</b>	
	<b>Asset Classes: Historical Performance and Risk 77</b>
4.1	Equities 77
4.2	ETFs: Exchange-Traded Funds 89
4.2.1	Levered ETFs 93
4.3	Bonds and Fixed Income 93
4.3.1	TIPS 95
4.4	The Bond-Stock Measure for Medium-Term Large Crash Prediction 95
4.4.1	The 2000–2003 Crash in the S&P 500 103

<i>Contents</i>	<b>ix</b>
4.5 Hedge Funds	112
4.6 Real Assets	121
4.6.1 REITs	121
4.7 Housing as an Asset Class	121
4.8 Gold and Other Commodities	125
4.9 Private Equity and Related Assets	126
4.10 Currencies	126
4.11 Evaluation of Great Investors	129
4.12 Fundamental and Seasonal Anomalies of Asset Returns	135
References	141
<b>CHAPTER 5</b>	
<b>The Current Economic Crisis and Its Impact on Retirement Decisions</b>	<b>145</b>
5.1 Household and Government Debt	145
5.2 Were the Crash Models Helpful in Signaling the US and Worldwide 2007–2009 Crash?	146
5.3 The Subprime Crisis and How It Evolved	148
5.3.1 Favoring the Financial Sector: Evaluating the Policy Responses	150
5.4 Impact on Retirement Expectations	153
5.4.1 Plan Sponsors in Trouble	156
5.5 Pensions in Trouble	160
5.6 State Pensions	161
5.7 Future ERP	162
5.7.1 Companies Freezing Pension Plans	165
5.7.2 The Ultimate Strategy: Bankruptcy	165
5.8 Future Inflation and Pensions	165
References	166
<b>PART TWO</b>	
<b>Special Issues and Models</b>	<b>169</b>
<b>CHAPTER 6</b>	
<b>The Impact of Population Aging on Household Portfolios and Asset Returns</b>	<b>171</b>
6.1 Introduction	171
6.2 The Empirical Evidence	172
6.2.1 The Empirical Evidence in a Micro-Perspective	173
6.2.2 The Empirical Evidence in a Macro-Perspective	181

<b>x</b>	<b>CONTENTS</b>
6.3	Models for Portfolio Choices and Life-Cycle Asset Allocations 193
6.3.1	The Seminal Models 194
6.3.2	More Realistic Portfolio Models 196
6.3.3	Life-Cycle Asset Allocation Models with Uninsurable Labor Risk 198
6.3.4	Life-Cycle Asset Allocation Models in the Presence of Annuities 204
6.4	Conclusions 207
	References 210
<b>CHAPTER 7</b>	
	<b>A Continuous Time Approach to Asset-Liability Surplus Management 217</b>
7.1	The Rudolf-Ziemba (2004) Intergenerational Surplus Management Model 218
7.2	A Case Study Application of the Rudolf-Ziemba Model 222
	References 226
<b>CHAPTER 8</b>	
	<b>Should Defined Benefit Pension Schemes Use Career Average or Final Salary? 227</b>
8.1	Introduction 227
8.2	Career Average Defined Benefit Schemes 228
8.3	Cost Neutrality 229
8.4	Choosing the Revaluation Rate 230
8.5	The Adoption of Career Average Pension Schemes 232
8.6	Advantages of a Switch to a Career Average Scheme 236
8.6.1	Employer 236
8.6.2	Members 240
8.7	Disadvantages of a Switch to a Career Average Scheme 241
8.7.1	Employer 241
8.7.2	Members 245
8.8	Redistribution Effects of a Switch to Career Average Pensions 245
8.8.1	Compensatory Salary Changes, Pension Contributions, NIC, and Income Tax 247
8.8.2	Model of the Redistributive Effects of a Switch to Career Average 248
8.8.3	Numerical Example of the Redistributive Effects of a Switch to Career Average 250
8.9	Conclusions 253
	References 254

**CHAPTER 9**

<b>Applying Stochastic Programming to the US Defined Benefit Pension System</b>	<b>259</b>
9.1 Introduction	260
9.2 Integrated Corporate/Pension Planning Model	261
9.2.1 Multiperiod Stochastic Programming Model	262
9.2.2 Alternative Goals	264
9.3 Assisting the Defined Benefit Pension System	265
9.3.1 Industry Projections	265
9.3.2 Applying Stochastic Programs to Industries in Trouble	270
9.4 Conclusions	273
References	274

**CHAPTER 10**

<b>Mortality-Linked Securities and Derivatives</b>	<b>275</b>
10.1 Introduction	275
10.2 Longevity Risk Transfers	278
10.2.1 Pension Buy-Outs	279
10.2.2 Securitization of Life Insurance Assets and Liabilities	281
10.3 Capital Market Solutions and the Development of Mortality-Linked Securities and Derivatives	282
10.3.1 The EIB Longevity Bond	283
10.3.2 Mortality Catastrophe Bonds	284
10.4 Recent Trends in Mortality-Linked Securities	286
10.4.1 Mortality Indexes	286
10.4.2 Mortality Swaps and Forwards	287
10.4.3 Mortality/Longevity Futures and Options	289
10.5 Hedging Pension Liabilities with Mortality-Linked Securities and Derivatives	290
10.5.1 Cash Flow Hedge Paradigm	290
10.5.2 Value Hedge Paradigm	291
10.5.3 Longevity Risk Pricing and Optimal Security Design	292
10.6 Conclusion	296
References	296

**CHAPTER 11**

<b>Asset Allocation and Governance Issues of Government-Owned Pensions</b>	<b>299</b>
11.1 Introduction	299
11.2 Types of Sovereign Funds	301

11.3 Is There a Common Asset Allocation for Pension Funds?	303
11.4 Sovereign Pension Funds and International Capital Markets	305
11.5 Governance Issues of Public Pension Funds	306
11.5.1 Intergenerational Borrowing	306
11.6 Regional Trends	309
11.7 Conclusion	313
References	314
<b>CHAPTER 12</b>	
<b>Issues in Individual Asset-Liability Management for Retirement</b>	<b>315</b>
12.1 Own Company Stock	315
12.2 The Role of Annuities	319
12.3 The Role of Insurance	321
12.4 The Role of Managed Withdrawal Plans	322
12.4.1 Mandatory Withdrawals	322
12.5 Where and How to Retire?	322
12.5.1 New Type Retirement Communities	323
12.5.2 Assisted Living	323
12.5.3 Reverse Mortgages	323
12.5.4 Does It Pay to Have Multiple Residences?	324
12.5.5 Interest-Free Loan	326
References	326
<b>PART THREE</b>	
<b>Modeling the Issues</b>	<b>329</b>
<b>CHAPTER 13</b>	
<b>Learning from Other Models</b>	<b>331</b>
13.1 Preserving Endowment Spending	331
13.1.1 Cloning the Yale Approach	335
13.1.2 Dealing with Liquidity the Yale Way	336
13.1.3 Swensen's Rule and Others	336
13.2 Devising a Rule So That Spending Never Falls	337
13.2.1 A Protective Spending Model	341
References	343
<b>CHAPTER 14</b>	
<b>The Innovest Austrian Pension Fund Financial Planning Model</b>	<b>345</b>
14.1 How Should Companies Fund Their Liabilities and Determine Allocations among Asset Classes and Hedging Instruments?	345

<i>Contents</i>	<b>xiii</b>
14.2 Formulating InnoALM as a Multistage Stochastic Linear Programming Model	349
14.3 Some Typical Applications	352
14.4 Some Test Results	356
14.5 Model Tests	359
14.5.1 Final Comments	362
References	364
<b>CHAPTER 15</b>	
<b>An Individual ALM Model for Lifetime Asset-Liability Management</b>	<b>365</b>
References	371
<b>CHAPTER 16</b>	
<b>Implementation and Numerical Results of Individual ALM     Model for Lifetime Asset-Liability Management</b>	<b>375</b>
References	392
<b>CHAPTER 17</b>	
<b>Conclusions</b>	<b>393</b>
<b>Index</b>	<b>397</b>
