<b><i>Preface</i></b>		ix
<b><i>Acknowledgments</i></b>		xiii
<b>CHAPTER 1</b>	Event Processing and the Survival of the Modern Enterprise	1
	Four Basic Questions about Events	2
	What Are Events and Which Ones Are Important?	3
	Why Invest in Event Processing?	5
	Know How Well You're Doing	9
	Use All Event Sources	10
	Detect When What You Need to Know Happens	11
	Event Processing in Use	16
	The Human Element and Other Sources of Errors	21
	Extract What You Want to Know	22
	Getting Started	25
<b>CHAPTER 2</b>	Sixty Years of Event Processing	27
	Event Driven Simulation	29
	Networks	33
	Active Databases	35
	Middleware	36
	The Enterprise Service Bus	38
	Chaos in the Marketing of Information Systems	39
	Service Oriented Architecture	40
	Event Driven Architecture	44
	Summary: Event Processing, 1950–2010	46

<b>CHAPTER 3</b>	First Concepts in Event Processing	49
	New Technology Begets New Problems	50
	What Is an Event?	51
	Event Clouds	54
	Levels of Events and Event Analysis	57
	Remark on Standards for Business Events	60
	Event Streams	61
	Processing the Event Cloud	64
	Complex Event Processing and Systems That Use It	69
	Discussion: Immutability of Events	75
	Summary	76
<b>CHAPTER 4</b>	The Rise of Commercial Event Processing	77
	The Dawn of Complex Event Processing (CEP)	78
	Four Stages of CEP	79
	Simple CEP (1999–2007)	81
	CEP versus Custom Coding	83
	Creeping CEP (2004–2012)	84
	Business Activity Monitoring	85
	Awareness and Education in Event Processing	87
	Languages for Event Processing	87
	Dashboards and Human-Computer Interfaces	89
	Human-Computer Interfaces	91
	CEP Becomes a Recognized Information Technology (2009–2020)	93
	Event Processing Standards	97
	Ubiquitous CEP	98
<b>CHAPTER 5</b>	Markets and Emerging Markets for CEP	101
	Market Areas	104
	Financial Systems, Operations, and Services	104
	Fraud Detection	110
	Transportation	113
	Security and Command and Control	121
	Command and Control for Security	123
	Health Care	126
	Energy	128
	Summary	133

<b>CHAPTER 6</b>	Patterns of Events	135
	Events and Event Objects	136
	Overloading Two Meanings	136
	Patterns and Pattern Matching	137
	Single Event Patterns	137
	Processing Patterns by Machine	139
	Patterns of Multiple Events Using Operators	140
	Event Patterns and State	143
	Event Patterns and Time	145
	Causality between Events	150
	Repetitive and Unbounded Behavior	154
	Requirements for an Event Pattern Language	158
	Correctness and Other Questions	159
<b>CHAPTER 7</b>	Making Sense of Chaos in Real Time: Part 1	161
	Event Type Spaces	163
	Restricting the Types of Event Inputs May Not Be an Option	164
	The Expanding Input Principle: Always Plan for New Types of Event Inputs and Event Outputs	166
	Architecting Event Processing Strategies	167
	Gross Filters	168
	Prioritization: Split Streaming, Topics, Sentiments, and Other Attributes	169
	Complex Filtering and Prioritization Using Event Patterns	171
	Summary	173
<b>CHAPTER 8</b>	Making Sense of Chaos in Real Time: Part 2	175
	Abstract Events and Views	176
	Levels of Abstraction and Views	180
	Organizing Views	183
	Computing Abstractions by Event Pattern Maps	184
	Computable Event Hierarchies	187
	Flexibility of Hierarchy Definitions	188
	Drill Down and Event Analysis	189
	Summary: Dealing with Information Overload	192

---

<b>CHAPTER 9</b>	The Future of Event Processing	195
	Taking Stock	196
	The Evolution of Holistic Event Processing Systems	198
	Crossing Boundaries	202
	The Beginnings of Holistic Event Processing Systems	203
	Future Air Travel Management Systems	206
	Monitoring Human Activities	212
	Pandemic Watch Systems	213
	Monitoring the Consequences	220
	Solving Gridlock in the Metropolis	226
	Monitoring Your Personal Information Footprint	230
	Summary: The Future of Complex Event Processing	234
<b>APPENDIX</b>	Glossary of Terminology: The Event Processing Technical Society: (EPTS) Glossary of Terms—Version 2.0	237
	Alphabetical List of Glossary Terms	241
	Glossary of Terms	243
	Glossary According to Lexicographic Order (definitions only)	255
	<b><i>About the Author</i></b>	259
	<b><i>Index</i></b>	261
