

# Index

## A

- Action planning, 168
- Activity/Discussion/Application (ADA) approach, 159–160
- ADDIE analysis stage: analyzing the information, 36–42; considering the learners, 44–49; considering the stakeholders, 42–44; decision to design versus buy training program, 52–59; determining involvement in designing process, 51–52; gathering information during, 25–36; identifying constraints and other impacting factors, 49–51; needs assessments during the, 19–24; overview of, 7–8; tip on paying enough attention to, 10
- ADDIE design stage: choosing delivery of training, 102–125; designing distance learning programs, 261–276; enabling objectives, 87–91, 96; overview of, 8. *See also* Learning objectives
- ADDIE development stage: developing materials/validating program, 210–235; identifying content, 128–147, 187; overview of, 9; planning the learning activities, 150–182, 187, 190, 225; structuring training program, 184–207
- ADDIE evaluation stage: applications of, 253–259; conducting the evaluation, 241–252; function of the, 239–240; importance of, 238–239; overview of, 9; questions to ask during the, 240–241
- ADDIE implementation stage, 9
- “The ADDIE Instructional Design Model” ([www.intology.com](http://www.intology.com)), 248
- ADDIE model: analysis stage of, 7–8, 10, 17–67; design stage of, 8, 69–99, 102–125, 261–276; development stage of, 9, 128–147, 150–182, 184–207, 210–235; evaluation stage of, 9, 237–259; illustrated diagram of, 6, 17, 69, 101, 127, 149, 209, 237; implementation stage of, 9; issues to consider when using the, 9–13; overview of the, 5–9; planning instruction programs using the, 3. *See also* ISD (instructional systems design)
- Agendas: “at-a-glance,” 222; build flexibility into, 203; “lag” time component of the, 193, 201–202; preparing preliminary, 200–202; “red flagging” possible problems, 201; sample workshop, 202; template for organizing, 207
- Airline simulations, 173
- American Management Association, 54
- Analyzing the information: to determine urgency of change, 37–39; to identify needed change, 37; issues to consider when, 37
- Analyzing the situation: gathering information for, 25–36; needs assessment for, 19–24
- Application learning activity, 174
- Apply What You Learn icon: on delivery of training, 120; on designing distance learning, 273–274; on designing training programs, 60–63; on developing materials and validating program, 230; on evaluating training, 253; on identifying content, 143; on learning activities, 178–180; on learning objectives, 92, 143, 178–180; on planning training programs, 14–15; on structuring the training, 204
- Assessments: gathering information using, 31; issues to consider when using, 33; as learning activity, 176; needs, 19–24. *See also* Evaluation
- ASTD, 54
- ASTD Learning Circuits* (2006), 112

ASTD's 2007 State of the Industry Report, 104, 263, 264

Asynchronous training: characteristics and types of, 109–112; comparing synchronous and, 104–105, 121; using technology to support, 272

“At-a-glance” agendas, 222

Attitudes: description of, 84; learning objectives that involve, 85

Audio podcasts, 110–111, 118, 198

Auditory learners, 155

Avatars, 266

## B

Beta testing (or validating) training program, 225–229

Between-session assignments, 195

“Blended Learning: Why Everything Old Is New Again—But Better” (Gray), 112

Blended learning, 112–113, 118

Blogs, 265

Bloom, B., 84

Bruner, J., 160

Budget issues: distance learning, 267; off-the-shelf training program costs, 55–56; ROI of evaluation, 252; training program costs, 50

## C

Case studies learning activity, 170, 176

Certification requirements, 56

Changes: assessing urgency of, 37–39; identifying need for, 37; identifying priorities of, 38–39;

“nice-to-have” versus urgent, 39, 65

Chat coaching, 265

Chat rooms, 265

Check What You Know icon: ADDIE model characteristics, 5–6, 16; analysis of training needs, 17–18; delivering the training, 102, 104, 121; designing distance learning programs, 261–262, 263, 266–267, 269, 272, 274–276; e-mail training programs, 1–2, 58–59, 70, 92, 128, 141, 177, 237–238; enabling objectives, 87, 96; evaluating the training, 237–238, 239, 240, 243, 245, 246–247,

248, 250, 254–256; experiential learning activities, 159, 181; gathering information, 21, 26, 36, 64; identifying content, 128, 129, 131, 141, 144; learning activities, 150, 152, 159, 164, 177, 181, 182; learning objectives, 71, 73, 93, 144; off-the-shelf training programs, 55; performance gap, 40–41, 66–67; planning an e-mail workshop, 4; questions to ask about target audience, 45; structuring the training, 184, 191, 196, 200, 206, 210; synchronous and asynchronous training, 121; training materials, 213, 220–221, 223, 225, 230–234; validating or pilot testing programs, 234; visuals, media, and training aids, 196

Chunking: description and application of, 189; distance learning content, 271

Closed-ended questions, 29

Closing activities, 167

Closing the workshop, 191

Cognitive domain, 84. *See also* Knowledge

Content: consistency between slides and, 224; how to identify, 132–147; learner-centered approach to, 129–130; nice-to-know vs. must-know, 131; principle of chunking for remembering, 189, 271; sequencing, 187; too much or too little, 139–140. *See also* Information

Copyright issues, 214

Covey, S., 38

Covey's priority identification matrix, 38

“Creating Sacred Space” (Milano), 151

*Creative Training Technique* (Pike), 21, 159, 195

Crediting sources, 214

Cultural issues: impacting design and development process, 51; learning activities and, 157

Customized in-house workshops, 53

## D

Data collection. *See* Gathering information

Debriefing learning activities, 161–162

Decision-makers, 43

Declarative knowledge, 153–154

Demonstrations, 170–171, 175

Design. *See* Training program design

*Designing and Assessing Courses and Curricula* (Diamond), 77

Dewey, J., 160

Diamond, R. M., 77

Discovery learning, 160

Distance learning programs: "chunking" content of, 271; deciding when and how to use, 266–269; design principles for, 269–272; new technologies allowing, 261–263; overview of, 263–264; types of, 265

## E

E-Learning programs, 53–54, 111

E-mail coaching, 265

E-mail communication: concerns about employee, 1–2; decision to use training to improve, 3

E-mail workshop: analyzing the situation for, 58–59; building flexibility into, 203; designing distance learning version of, 261–262, 272; evaluating the training, 237–238, 251; identifying content of, 128, 141–142; learning objectives for, 70, 89–91; planning the, 4–9; validating or pilot testing the, 228. *See also* Training programs

Enabling objectives: comparing learning objectives to, 88–89, 96; description of, 81, 87–88; when to use, 96. *See also* Learning objectives

Equipment reservations, 218

*Evaluating Training Programs* (Kirkpatrick), 242

Evaluation: applying principles of, 253–256; determining which level to use for, 250–252; functions of, 239–240; how to conduct an, 241–252; importance of conducting, 237–239; questions answered by the, 240–241; "Smile Sheet" Evaluation Worksheet, 257–259. *See also* Assessments

Evaluation levels: 1: participants' reaction to training, 242, 243–244; 2: participants' learning, 242, 245–246; 3: participants' behavior, 242, 246–248; 4: results of training, 242, 248–249; 5: ROI (return on investment), 242, 249

Evaluation methodologies: determining which level to use, 253–256; determining which to

use, 250–252; Kirkpatrick's Four Levels of Evaluation, 242–249; Phillips ROI (return on investment), 242, 249

Experiential learning activities: application of the, 162; debriefing process of, 161–162; description and setting up, 161, 181–182; introduction of, 160–161; matching learning objective to, 181; variations in, 159–160; what, so what, now what questions to ask about, 163

Experts. *See* Subject-matter experts

## F

Facilities, 218

Feedback, 172

*The First-Time Trainer* (Goad), 25

Flip charts, 197–198

Focus groups: gathering information using, 29–30; issues to consider when using, 33

Follow-up interview questions, 29

Foshay, W., 154

"Front-End Analysis, Implementation Planning, and Evaluation" (Stolovitch), 19, 185

## G

Games, 172, 176

Gargiulo, T. L., 5, 19, 36, 44, 151, 185

Gathering information: assessments used for, 31, 33; focus groups used for, 29–30, 33; how to start, 32; interviews used for, 26–29, 32; about learners and target audience, 44–49; observation used for, 31, 33; purpose of, 25–26; surveys and questionnaires used for, 30, 33; tests used for, 30–31, 33

GIGO (garbage in, garbage out), 10

Goad, T. W., 25

Graphic development, 215

Gray, C., 112

Ground rules, 190

Group discussions/projects, 169–170

## H

Handouts, 199, 214

Hodell, C., 239

HRD Press, 54

## I

- Icebreakers, 166, 177
- Identifying content: brainstorming for, 138; how to, 132–138; Identifying Content Worksheet, 146–147; using learning objectives for, 133–134, 137, 139–145; mind mapping for, 135–136; suggested working process for, 138; too much or too little, 139–140
- Identifying priorities, 38
- Information: analyzing the, 36–42; gathering, 25–36, 44–49; principle of chunking for remembering, 189, 271; providing trainers with needed supplementary, 219; providing workshop logistical, 190; required for trainers to prepare for training, 218–219. *See also* Content
- Initial interview questions, 29
- Interactive lectures, 167–169, 175
- Interviews: gathering information using, 26–27; guidelines for, 27; issues to consider when using, 32; questions asked during, 28–29, 32
- ISD From the Ground Up: A No-Nonsense Approach to Instructional Design* (Hodell), 239
- ISD (instructional systems design): analyzing the information process of, 37–39; analyzing the situation process of, 19–36; gathering information process of, 25–33; planning the, 5–9. *See also* ADDIE model
- “ISD—Faster/Better/Easier” (Sink), 5

## K

- Keeps, E. J., 73, 103
- Kinesthetic learners, 155
- Kirkpatrick’s Four Levels of Evaluation: level 1: participants’ reaction to training, 242, 243–244; level 2: participants’ learning, 242, 245–246; level 3: participants’ behavior, 242, 246–248; level 4: results of training, 242, 248–249; overview of, 242. *See also* Phillips’ ROI (return on investment)
- Knowledge: assessing learner’s current and needed, 47; declarative, 153–154; learning objectives related to, 84; procedural, 154. *See also* Cognitive domain
- KSAs (knowledge, skills, and attitude), 84, 154

## L

- “Lag” time, 193, 201–202
- Learner-centered content, 129–130
- Learner-Centered Teaching* (Weimer), 129, 130
- Learner-generated cases, 171
- Learners: considerations when designing training programs, 44–49; current knowledge/ability and needed knowledge/ability, 47; feedback given to, 172; identifying characteristics of, 45–46; identifying reasons for taking training, 46–47; matching learning activities to characteristics of, 157–158; matching learning activities to learning preferences of, 155; questions to ask about, 48; as training delivery consideration, 116; as training program stakeholders, 44; VAK model of, 155. *See also* Participants; Target audience
- Learning: discovery, 160; evaluating participant, 242, 245–246; types of, 83–85
- Learning activities: action planning for, 168; experiential, 159–163, 181–182; factors to consider for selecting, 153–158; group size consideration of, 158; identifying materials for, 225; learning benefits of, 150–153; matching learning objectives to, 178–180; matching learning type to, 153, 154; purpose of, 155; relevance of, 156; sequencing, 187, 190; teaching procedural vs. declarative knowledge, 154; types of, 164–176
- Learning activity types: application, 174; case studies, 170, 176; closing activities, 167; demonstrations, 170–171; games, 172, 176; group discussions and projects, 169–170; icebreakers, 166, 177; interactive lectures, 167–169, 175; learner-generated cases, 171; lecture, 175; observations and demonstrations, 175; opening activities, 165–166; practice exercises, 171–172, 176; pre-work, 164–165; questionnaires and assessments, 176; reflection, 174; role plays, 173, 175; simulations, 173–174, 176; stories, 169; structured discussions, 175
- Learning management systems (LMS), 110

Learning objectives: clarifying conditions and standards of, 75, 76; comparing enabling objectives to, 88–89; components of, 75–77; considering elimination due to time limits, 194; creating useful, relevant, and meaningful, 79–83; deciding on number of, 86; description of, 73–75; determining sequence using the, 189; development of, 83–87; e-mail workshop, 89–91; evaluating how well participants' achieved, 245–246; identifying content using, 133–134, 137, 139–145; matching learning activities to, 178–180; S.M.A.R.T. guidelines for creating, 82–83; which involve attitudes, 85; why they matter, 71–73; worksheet on writing, 97–99; writing, 85–87. *See also* ADDIE design stage; Enabling objectives

Learning preferences, 155

Learning types: KSAs (knowledge, skills, and attitude), 84, 154; matching learning activities to, 153, 154

Lectures: description of, 175; interactive, 167–169, 175

Licensing off-the-shelf programs, 56

Live trainer-led classroom training, 106, 117

Live trainer-led virtual training, 106–107, 117, 264, 265

## M

Mager, R. F., 3, 76, 77

Management: training program design role by, 24; as training program stakeholder, 43

Marrapodi, J., 36, 44

Materials. *See* Training materials

- Training development: identifying content, 128–147; learning activities, 150–182; materials/validating program, 210–235; structuring the training, 184–207
- Training facilities, 218
- Training material work plan: planning and using a, 211; sample of, 213; worksheet for, 235
- Training materials: considering the trainers and learners, 217–222; developing, 216–222; developing participant, 213–215; developing the slides, 223–224; handouts, 199, 214; identifying learning activities, 225; for learning activities, 225; questions to ask when making decisions about, 219; slides, 197, 215, 223–224; thinking creatively to prepare, 215; trainer scripts to use for, 220–221; validating or testing the, 225–229; visuals, media, and training aids, 195–199; using a work plan to organize, 211–213
- Training needs assessment: description and functions of, 21–22; questions to be asked during, 22–24; “triggers” for, 22
- Training program design: analyzing the information, 36–42; considering the leaders for, 44–49; considering the stakeholders, 42–44; decision to buy program vs., 52–57; determining who should be involved in, 51–52; distance learning programs, 261–276;

gathering information, 25–36; identifying constraints and other factors impacting, 49–51; needs assessment, 19–24

Training programs: ADDIE model used to plan, 6–13; choosing delivery of, 102–125; considering the learners when designing, 44–49; distance learning, 261–276; enabling objectives of, 87–91; establishing ground rules of, 190; evaluating the, 237–259; identifying key stakeholders of, 11–12, 43–44; learning objectives of, 70–87, 92–99; structuring the, 184–207; validating or pilot testing the, 225–229. *See also* E-mail workshop; Training

Training structure: determining sequence, 186–189; identifying visuals, media, and training aids, 195–199; planning the opening and closing, 189–191; preparing agendas, 193, 200–203, 207, 222; tasks involved in creating the, 185–186; time issues related to, 191–195

*Training the Active Way* (Silberman), 159, 166, 167, 169, 170
