FOREWORD	xv
PREFACE	xvii

PART ONE INTRODUCTION TO BONDS

1 The Bond Instrument	3
The Time Value of Money	4
Basic Features and Definitions	5
Present Value and Discounting	6
Discount Factors	12
Bond Pricing and Yield: The Traditional Approach	15
Bond Pricing	16
Bond Yield	20
Floating Rate Notes	27
Accrued Interest	30
Clean and Dirty Bond Prices	30
Day-Count Conventions	32
2 Bond Instruments and Interest Rate Risk	35
Duration, Modified Duration, and Convexity	35
Duration	36
Properties of Macaulay Duration	40
Modified Duration	41
Convexity	45
3 Bond Pricing and Spot and Forward Rates	51
Zero-Coupon Bonds	51
Coupon Bonds	53
Bond Price in Continuous Time	55
Fundamental Concepts	55
Stochastic Rates	58
Coupon Bonds	60
Forward Rates	61
Guaranteeing a Forward Rate	61
The Spot and Forward Yield Curve	63
Calculating Spot Rates	64
Term Structure Hypotheses	67
The Expectations Hypothesis	67
Liquidity Premium Hypothesis	69
Segmented Markets Hypothesis	69

4	Interest Rate Modeling	71
	Basic Concepts	71
	Short-Rate Processes	72
	Ito's Lemma	74
	One-Factor Term-Structure Models	75
	Vasicek Model	75
	Hull-White Model	76
	Further One-Factor Term-Structure Models	77
	Cox-Ingersoll-Ross (CIR) Model	78
	Two-Factor Interest Rate Models	79
	Brennan-Schwartz Model	80
	Extended Cox-Ingersoll-Ross Model	80
	Heath-Jarrow-Morton (HJM) Model	81
	The Multifactor HJM Model	82
	Choosing a Term-Structure Model	83
5	Fitting the Yield Curve	87
	Yield Curve Smoothing	88
	Smoothing Techniques	90
	Cubic Polynomials	91
	Non-Parametric Methods	92
	Spline-Based Methods	92
	Nelson and Siegel Curves	95
	Comparing Curves	96
	Fitting the Term Structure of Interest Rates: The Practical Implementation of Cubic Spline Methodology	96
	Cubic Spline Methodology	97
	The Hypothesis	99
	Practical Approach	100
	A Working Environment	100
	The First Requirement	101
	The Second Requirement	101
	The Third Requirement	102
	Meeting All Requirements Simultaneously	102
	A Unique Solution	103
	The Solution	108
	A Look at Forward Rates	114
	Conclusion	117

PART TWO SELECTED CASH AND DERIVATIVE INSTRUMENTS

6	Forwards and Futures Valuation	121
	Forwards and Futures	121
	Cash Flow Differences	122

Relationship Between Forward and Futures Prices	124
Forward-Spot Parity	125
The Basis and Implied Repo Rate	127
7 Swaps	131
Interest Rate Swaps	132
Market Terminology	134
Swap Spreads and the Swap Yield Curve	135
Generic Swap Valuation	138
Intuitive Swap Pricing	138
Zero-Coupon Swap Valuation	139
Calculating the Forward Rate from Spot-Rate Discount Factors	139
The Key Principles of an Interest Rate Swap	143
Valuation Using the Final Maturity Discount Factor	143
Non-Plain Vanilla Interest Rate Swaps	146
Swaptions	148
Valuation	149
Interest Rate Swap Applications	150
Corporate and Investor Applications	150
Hedging Bond Instruments Using Interest Rate Swaps	153
8 Options	157
Option Basics	158
Terminology	160
Option Instruments	162
Option Pricing: Setting the Scene	164
Limits on Option Prices	165
Option Pricing	166
The Black-Scholes Option Model	168
Assumptions	169
Pricing Derivative Instruments Using the Black-Scholes Model	170
Put-Call Parity	173
Pricing Options on Bonds Using the Black-Scholes Model	174
Interest Rate Options and the Black Model	174
Comments on the Black-Scholes Model	180
Stochastic Volatility	180
Implied Volatility	180
Other Option Models	181
9 Measuring Option Risk	183
Option Price Behavior	183
Assessing Time Value	183
American Options	184
The Greeks	185

Delta	185
Gamma	187
Theta	189
Vega	189
Rho	190
Lambda	192
The Option Smile	193
Caps and Floors	194
10 Credit Derivatives	197
Credit Risk	198
Credit Risk and Credit Derivatives	200
Applications of Credit Derivatives	201
Credit Derivative Instruments	202
Credit Default Swap	202
Credit Options	203
Credit-Linked Notes	204
Total Return Swaps	205
Investment Applications	207
Capital Structure Arbitrage	209
Exposure to Market Sectors	210
Credit Spreads	210
Funding Positions	210
Credit Derivatives and Relative Value Trading	212
Relative Value Trading Strategies	212
Bond Valuation from CDS Prices: Bloomberg Screen VCDS	217
Credit-Derivative Pricing	218
Pricing Total Return Swaps	218
Asset-Swap Pricing	219
Credit-Spread Pricing Models	219
The Market Approach to CDS Pricing	220
Default Probabilities	220
Pricing a CDS Contract	226
Example Calculation	228
The ITraxx and CD-X Credit Indices Contracts	229
Index Tranche Market	236
Impact of the 2007–2008 Credit Crunch: New CDS Contracts	240
11 The Analysis of Bonds with Embedded Options	245
Understanding Option Elements Embedded in a Bond	245
Basic Options Features	246
Option Valuation	247
The Call Provision	248
The Binomial Tree of Short-Term Interest Rates	249

Arbitrage-Free Pricing	250
Options Pricing	252
Risk-Neutral Pricing	254
Recombining and Nonrecombining Trees	255
Pricing Callable Bonds	256
Price and Yield Sensitivity	261
Measuring Bond Yield Spreads	263
12 Option-Adjusted Spread Analysis	265
Introduction	265
A Theoretical Framework	266
The Methodology in Practice	272
13 Convertible Bonds	277
Basic Features	277
Trading Patterns of Convertible Bonds	279
Investor Analysis	280
Zero-Coupon Convertibles	284
Convertible Bond Default Risk	285
Advantages of Issuing and Holding Convertibles	285
Convertible Bond Valuation	288
Fair Value of a Convertible Bond: The Binomial Model	288
Model Parameters	297
Pricing Spreadsheet	299
14 Inflation-Indexed Bonds	303
Basic Concepts	303
Choice of Index	303
Indexation Lag	305
Coupon Frequency	306
Type of Indexation	306
Index-Linked Bond Cash Flows and Yields	308
TIPS Cash Flow Calculations	309
TIPS Price and Yield Calculations	309
Assessing Yields on Index-Linked Bonds	313
Which to Hold: Indexed or Conventional Bonds?	314
Analysis of Real Interest Rates	315
Indexation Lags and Inflation Expectations	315
An Inflation Term Structure	317
Inflation-Indexed Derivatives	318
15 Securitization and Asset-Backed Securities	327
The Concept of Securitization	328
Reasons for Undertaking Securitization	328

Benefits of Securitization to Investors	330
The Process of Securitization	331
Securitization Process	331
Credit Enhancement	335
Securitizing Mortgages	336
Growth of the Market	337
Mortgage Bond Risk	338
Types of Mortgage-Backed Securities	338
Cash Flow Patterns	339
Prepayment Analysis	340
Prepayment Models	344
ABS Structures: A Primer on Performance Metrics and Test Measures	345
Collateral Types	345
Summary of Performance Metrics	351
Securitization: Features of the 2007–2009 Financial Crisis	351
Impact of the Credit Crunch	351
16 Collateralized Debt Obligations	357
CDO Structures	359
Conventional CDO Structures	359
Synthetic CDO Structures	360
Motivation Behind CDO Issuance	362
Balance Sheet–Driven Transactions	362
Investor-Driven Arbitrage Transactions	363
Analysis and Evaluation	363
Portfolio Characteristics	363
Cash Flow Analysis and Stress Testing	364
Originator's Credit Quality	365
Operational Aspects	365
Legal Structure of the Transaction	365
Expected Loss	366
CDO Market Overview Since 2005	366
Risk and Capital Management	368
 PART THREE SELECTED MARKET TRADING CONSIDERATIONS	
17 The Yield Curve, Bond Yield, and Spot Rates	373
Practical Uses of Redemption Yield and Duration	373
The Concept of Yield	374
Yield Comparisons in the Market	376
Measuring a Bond's True Return	376
Illustrating Bond Yield Using a Microsoft Excel Spreadsheet	380
Implied Spot Rates and Market Zero-Coupon Yields	388

Spot Yields and Coupon-Bond Prices	389
Implied Spot Yields and Zero-Coupon Bond Yields	393
Determining Strip Values	394
Strips Market Anomalies	395
Strips Trading Strategy	396
Case Study: Treasury Strip Yields and Cash Flow Analysis	399
18 Approaches to Trading	401
Futures Trading	402
Yield Curves and Relative Value	406
Determinants of Government Bond Yields	406
Characterizing the Complete Term Structure	408
Identifying Relative Value in Government Bonds	409
Hedging Bond Positions	412
Simple Hedging Approaches	412
Hedge Analysis	413
Summary of the Derivation of the Optimum-Hedge Equation	415
19 Credit Analysis and Relative Value Measurement	417
Credit Ratings	418
Purpose of Credit Ratings	418
Formal Credit Ratings	419
Credit Analysis	420
The Issuer Industry	421
Financial Analysis	423
Industry-Specific Analysis	426
Utility Companies	426
Financial Sector Companies	427
The Art of Credit Analysis	428
Bond Spreads and Relative Value	429
Bond Spreads	429
Summary of Fund Managers' Approach to Value Creation	438
APPENDIX I: The Black-Scholes Model in Microsoft Excel	443
APPENDIX II: Iterative Formula Spreadsheet	445
APPENDIX III: Pricing Spreadsheet	447
