Preface	xiii
About the Authors	xv
CHAPTER 1	
Introduction	1
Part One: The Cash Market	2
Part Two: The Structured Markets	3
Part Three: The Synthetic Markets	4
Part Four: How to Trade the Leveraged Finance Market	5
Part Five: Default Correlation	6
PART ONE	
<hr/>	
The Cash Market	9
CHAPTER 2	
The High-Yield Bond Market	11
The Reasons Companies Are Classified as High-Yield Issuers	11
Size and Growth of the Cash Market	13
Types of Structures	21
A Look at Ratings	22
Risk and Return for Bonds	26
What's Priced In?	31
How About Recoveries?	35
Summary	37

CHAPTER 3	
Leveraged Loans	39
A Tale of Two Loans	39
Introduction to Leveraged Loans	42
An Overview of Loan Terms	56
Loan Recovery Rates	65
Loan Default Rates	73
Summary	79
PART TWO	
Structured Market	81
CHAPTER 4	
Collateralized Loan Obligations	83
Understanding CLOs	83
Elaborations and Details	92
Summary	104
CHAPTER 5	
CLO Returns	105
Default and Recovery Scenarios	105
Distressed Loan Prices, Overflowing Triple-C Buckets, and CLO Returns	119
Summary	129
CHAPTER 6	
CLO Portfolio Overlap	133
Collateral Overlap in U.S. CLOs	134
Collateral Vintage vs. Deal Vintage	142
Favorite CLO Credits	142
Single-Name Risk and Tranche Protections	146
Excess Overcollateralization and Excess Overcollateralization Delta	150
Senior and Subordinate Excess OC Deltas	151
Equity Tranches and Distressed Tranches	157
Summary	157

PART THREE	
Synthetic Markets	159
CHAPTER 7	
Credit Default Swaps and the Indexes	161
What Are Credit Default Swaps?	162
Who Uses Protection, and for What?	168
Growth of the Market	168
Marking-to-Market: SDV01	170
Credit Default Swaps Indexes	172
Contrasting the LCDX and CDX Indexes	177
Beta: A Study of Movement	178
Summary	183
CHAPTER 8	
Index Tranches	185
Basic Mechanics of the Tranche Market	185
Loan Tranches	195
Summary	199
PART FOUR	
How to Trade the Leveraged Finance Market	201
CHAPTER 9	
Recessions and Returns	203
Broad Market Performance	204
Sector Performance	207
Performance by Rating	207
Summary	210
CHAPTER 10	
Framework for the Credit Analysis of Corporate Debt	211
Approaches to Credit Analysis	211
Industry Considerations	216
Financial Analysis	220
Quantitative Models	232
Summary	233

CHAPTER 11	
Trading the Basis	235
The Basic Basis Package	236
Constructing the Basic Package	236
Moving Away from the Basic Model	240
Adding Positive Convexity	249
Negative Convexity	254
A More Complex Basis Package	255
Hedge Ratios for CLO Hedging	259
Summary	260
CHAPTER 12	
How Much Should You Get Paid to Take Risk?	263
Single-Name Credit Risk	263
Curve Risk	267
Basis Risk	269
Capital Structure Risk	274
Summary	281
PART FIVE	
Default Correlation	283
CHAPTER 13	
Default Correlation: The Basics	285
Default Correlation Defined	285
Default Probability and Default Correlation	291
Summary	309
CHAPTER 14	
Empirical Default Correlations: Problems and Solutions	311
Empirical Results	311
Problems with Historical Default Correlations	315
Proposed Solutions	318
Summary	333
Index	335
