<i>Introduction</i>	1
About This Book	1
Conventions Used in This Book	2
What You're Not to Read	3
Foolish Assumptions	3
How this Book Is Organized	4
Part I: Introducing Dashcode and How You Can Use It	4
Part II: Constructing Your Projects' Pieces and Parts	4
Part III: Integrating Data	4
Part IV: Trying Out Each Environment	5
Part V: Refining Your Project	5
Part VI: The Part of Tens	5
Icons Used in this Book	5
Where to Go from Here	6

Part 1: Introducing Dashcode and How You Can Use It 7

Chapter 1: Exploring the World of Apps and Widgets 9

Developing Software for Apple Computers	9
Introducing Dashcode	11
Talking the Dashcode Talk	12
Visiting a Small World: Apps and Widgets	13
Categorizing Widgets and Apps Apple's Way	17
Navigating the Data	19
Understanding the Structure of Apps and Widgets	20
Dashing through Dashboard Widgets	21
Trekking with Safari Web Apps	25
Calling iPhone Web Apps	27

Chapter 2: Getting to Know Your Development Tools 31

Getting Dashcode Installed	32
Introducing the Dashcode Window	32
Tooling through the Dashcode toolbar	33
Navigating the navigator	38
Exploring the canvas	40
Working Through the Workflow Steps List	40
Looking Inside an App or Widget	42
Packaging Your Apps and Widgets	43
Packaging a Safari Web application	43
Packaging a Dashboard widget	45
Packaging a Dashcode project	45

Introducing Views.....	48
Checking Out the Library	50
Looking at parts	52
Exploring code	53
Using your photos	54
Starting Out with the Canvas	55
Testing and Deploying Your Work	55

Chapter 3: Creating Your First Dashcode Project. 59

Stepping Through the Development Process	59
Thinking about What a Mobile Device Is for the Purposes of a Web App	61
Looking at Your First Dashcode Project.....	63
Casting an eye to design	64
Navigating around your app.....	65
Creating a New Project from a Template.....	66
Testing your project in the simulator	68
Adding the photo	69
Adding the Text	72
Testing Your Project	74
Setting Up Your Destinations.....	75
Turning on your web server.....	76
Turning on your MobileMe account.....	77
Adding WebDAV or FTP destinations	78
Deploying Your App	79
Deploying a Widget	80

Part II: Constructing Your Projects' Pieces and Parts..... 83

Chapter 4: Inspecting the Inspector 85

Using the Inspector Window	85
Handling elements in the inspector window.....	86
Exploring the inspector window tabs	87
Using the Attributes Inspector	88
Using attributes to identify elements	88
Adding elements to your project.....	88
Using other attributes	92
Manipulating Text with Element Attributes and Library Code Snippets.....	96
Creating two fields	96
Writing code to switch field contents	97
Looking at Attributes for a Text Field	101
Working with Fill and Stroke	102
Choosing colors	104
Setting effects	106

Using the Metrics Inspector 106
 Positioning objects with document flow and absolute settings ... 106
 Adjusting the autoresize settings 107

Chapter 5: Working with Library Parts 115

 Knowing What You Can and Cannot Do with the Library 116
 Working with Text Parts from the Library 117
 Using the search field when possible..... 118
 Using text areas and text fields 119
 Working with Media Parts from the Library 121
 Video..... 122
 Image 122
 Canvas 123
 Quartz Composer..... 124

Chapter 6: Behaving Well with Buttons 125

 Handling Behaviors 125
 Controlling the Interface with Buttons 126
 Working with the basic buttons for Safari..... 128
 Working with the buttons for Mobile Safari apps (iPhone) 133
 Working with widget buttons 134
 Understanding the Behavior Structure..... 136
 Looking at a button in action 137
 Making the button useful 139
 Taking stock 145

Chapter 7: Viewing the Interface 147

 Aligning, Distributing, and Setting Layers for
 Objects with Graphics Tools 147
 Autoguides 147
 Front-to-Back Arrangement 148
 Alignment and Distribution 150
 Locking 150
 Guides..... 151
 Packing Up Your Interface in Containers and Groups 152
 Using graphics to organize information..... 152
 Grouping objects to organize information 153
 Using Dashcode containers to organize information..... 153
 Organizing Information with Scroll Areas, Lists, and Grids 156
 Scrolling forever with a scroll area..... 156
 Making a list..... 159
 Moving to the next dimension..... 163

Chapter 8: Finishing Up in Style 165

 It’s Your Own Fault if You Don’t Use Defaults 166
 Setting Dashboard Widget Attributes 167
 Identifying your widget 169
 Allowing data access 171

Adding extensions to your widget	171
Using plug-ins with your widget.....	171
Setting your widget's properties.....	171
Localizing your widget	172
Setting Safari Web Application Attributes.....	172
Setting Mobile Safari Application Attributes	174
Managing the Viewport	174
Setting Web clip options	179
Using Run & Share	180
Deploying your widget	180
Deploying a Safari application.....	181
Doing the deployment	183

Part III: Integrating Data..... 185

Chapter 9: Working with Data Sources 187

Introducing Data Sources and Data Models.....	187
Viewing Data Sources and Data Models in Dashcode.....	189
Looking at data sources	189
Looking at files	191
Looking inside a data model.....	192
Binding Data Sources and your Interface.....	193
The Model-View-Controller pattern made simple	194
How bindings work.....	195
Exploring a binding.....	195
Creating a Data Source.....	196
Choosing the data to use	197
Adding a file to your project.....	197
Adding a data source to your project	198
Creating Bindings	199

Chapter 10: Binding Data to your Dashcode Project 203

Putting Data into Your Project with XML and JSON	204
Reviewing the JSON data source	204
Structuring the data elements.....	205
Structuring the Items list	206
Adding the title.....	206
Tying up the container	207
Exporting XML or JSON from other applications	209
Using a New Data Source in the Browser Template.....	210
Creating a new data file.....	212
Creating the project and adding the data.....	214
Connect existing interface parts.....	216
Add and connect new interface parts	223

Chapter 11: Using XMLHttpRequest to Get Live Data When You Need It	227
Introducing XMLHttpRequest	228
Understanding the XMLHttpRequest Structure	229
Partial page loads	229
Asynchronous processing	230
Setting Up a Request	231
Loading a Response	233
Creating the callback routine	233
Checking status and data	235
Chapter 12: Navigating through Data	237
Helping Users Find Their Way through Data	237
Working with a List View	238
Setting list labels and values with the Attributes inspector	239
Setting list labels and values with a data source	239
Exploring with the Bindings inspector	243
Working with Multiple Controllers	245
Working with Stack Layouts	251
Chapter 13: Preferring Preferences for User Options and Saving Data	253
Whose Data Is It Anyway?	253
Looking at your project data	254
Looking at your users' data	254
Using Key/Value Pairs for Preferences	255
Using Key/Value Preferences in Mobile Safari Apps	257
Setting up the database	260
Storing a key/value pair	266
Using Key/Value Preferences in Safari Web Applications	268
Setting up the database	270
Storing a key/value pair	272
Using Key/Value Preferences in Dashboard Widgets	272
Setting a global preference	274
Getting a global preference	274
Setting an instance preference	275
Getting an instance preference	275
Part IV: Trying Out Each Environment	277
Chapter 14: Creating a Browser Safari Application	279
Creating the Unmodified Browser Project	279
Testing the Project . . . for Real	285

Testing the deployed Safari Web site on Mac OS X.....	285
Testing the deployed Safari Web site on Windows	285
Testing the iPhone version of the project	286
Setting up the Code for iPad	286
Checking Out the Template Behavior	290
The data bindings	291
The behaviors	294
Chapter 15: Creating a Multilevel Navigator for Mobile Safari. . . .	297
Starting the Multilevel Navigator Project	297
Planning Your Work	299
Creating the Data Sources	299
Creating the top-level data for all regions	299
Creating the second-level data for specific regions	300
Adding the files to the project.....	302
Renaming the views	303
Creating the data sources	307
Creating the Interface	309
Implementing the top-level navigation.....	309
Moving to the second navigation level	312
Building the second navigation level views	314
Chapter 16: Creating a Custom Web App/Dashboard	
Widget for a Web Site	317
Setting Up the Web Site	317
Setting Up the Projects	318
Creating the Dashboard Widget	319
Test each and every deployment	321
Give yourself credit	324
Work on the front of the widget.....	326
Creating the Mobile Safari Web App	332
Test each and every deployment	332
Give yourself credit	333
Finish the app.....	333
Part V: Refining Your Project	337
Chapter 17: Adding to Your Code	339
Comparing Value Transformers with Behaviors and Handlers.....	339
Using and Reusing Library Code	340
Identifying files you can modify	341
Identifying files you should not modify	342
Identifying files you should be careful with	342

Using Transformers.....	345
Using a simple transformer	345
Creating your own transformer	350
Using built-in transformers.....	352
Writing Your Own Handlers	353
Chapter 18: Improving Your Interface	357
Getting Deeper into Data Sources and the Data Model View.....	357
Looking closer at the data model view	358
Moving data into and out of a data source.....	361
Using a data source for a variety of bindings.....	366
Handling Localization	370
Chapter 19: Testing and Monitoring Your Work	375
Conserving Resources	375
There's not much space.....	377
Apps and widgets run while other things occur.....	377
Exploring the Debugging Tools.....	378
Creating a problem.....	379
Reviewing the run log.....	381
Looking at stack frames	383
Using breakpoints.....	385
Monitoring Performance.....	387
Part VI: The Part of Tens	389
Chapter 20: Ten Tips for Creating Better Apps and Widgets	391
Focus on One Thing	391
Make Your App or Widget Self-Contained in Every Possible Way	392
Add Internet Functionality for Necessary Additions	393
Keep the User in Control	394
Make Your App or Widget Interruptible.....	394
Use Common Interface Tools.....	395
Make Your App or Widget Predictable	396
Talk the Talk and Walk the Walk	396
Don't Be Afraid to Start Over	397
Provide Feedback Tools for Users	397
Chapter 21: Ten Simplifications for Your Apps and Widgets	399
Use a Verb to Identify Every Interface Element You Can	399
Make Errors Impossible or Unlikely.....	401
Use Localizations and Preferences for Set-and-Forget Customizations.....	403

Organize Lists and Groups from Complex to Simple Rather than Alphabetical.....	403
Recruit Right- and Left-Handed Testers	404
Integrate with the User’s Data So That It “Just Works” the First Time	404
Stay in Your Space Without Scrolling	405
Make Certain Data Fields Are Big Enough for All Languages	406
Test, Test, and Test Some More	406
Use Your Own Apps and Widgets.....	407

Appendix: JavaScript Quickies 409

Identifying your JavaScript Code.....	409
Looking at JavaScript	410
Putting the Script in JavaScript	411
Objecting to Everything	412
Understanding objects and their methods.....	412
Using object properties.....	413
Using object events	414
What to Look for in JavaScript Code.....	414
Statements end with a semicolon.....	414
Comments matter	414
Capitalization matters	415
Indenting doesn’t matter but is a great idea	415
Turning on syntactical formatting in Dashcode	416
JavaScript Snippets	416
Get an element value by ID	417
Set an element value by ID.....	417

Index 419
