Foreword	xi
Preface	xiii
Addendum: A Path to Economic Renaissance	xv
PART I BUILDING BLOCKS	
1 Interest Rate	3
1-1 Measuring Time	3
1-2 Interest Rate	4
1-2.1 Gross Interest Rate	4
1-2.2 Compounding: Compound Interest Rate	5
1-2.3 Conversion Formula	6
1-2.4 Annualization	6
1-3 Discounting	7
1-3.1 Present Value	7
1-3.2 Discount Rate and Required Return	8
1-4 Problems	8
2 Classical Investment Rules	11
2-1 Rate of Return, Time of Return	11
2-1.1 Gross Rate of Return (ROR)	11
2-1.2 Time of Return (TOR)	11
2-2 Net Present Value (NPV)	12
2-3 Internal Rate of Return (IRR)	13
2-4 Other Investment Rules	14
2-5 Further Reading	15
2-6 Problems	15
3 Fixed Income	19
3-1 Financial Markets	19
3-1.1 Securities and Portfolios	19

vi Contents

3-1.2	Value and Price	19
3-1.3	Financial Markets and Short-selling	20
3-1.4	Arbitrage	21
3-1.5	Price of a Portfolio	22
3-2	Bonds	23
3-2.1	Treasury Bonds	23
3-2.2	Zero-Coupon Bonds	23
3-2.3	Bond Markets	23
3-3	Yield	24
3-3.1	Yield to Maturity	24
3-3.2	Yield Curve	24
3-3.3	Approximate Valuation	26
3-4	Zero-Coupon Yield Curve. Arbitrage Price	27
3-4.1	Zero-Coupon Rate Curve	27
3-4.2	Arbitrage Price of a Bond	28
3-4.3	Zero-Coupon Rate Calculation by Inference: the 'Bootstrapping' Method	29
3-5	Further Reading	30
3-6	Problems	30
4	Portfolio Theory	35
4-1	Risk and Return of an Asset	35
4-1.1	Average Return and Volatility	35
4-1.2	Risk-free Asset. Sharp Ratio	37
4-2	Risk and Return of a Portfolio	38
4-2.1	Portfolio Valuation	38
4-2.2	Return of a Portfolio	38
4-2.3	Volatility of a Portfolio	39
4-3	Gains of Diversification. Portfolio Optimization	41
4-4	Capital Asset Pricing Model	43
4-5	Further Reading	44
4-6	Problems	44

PART II FIRST STEPS IN EQUITY DERIVATIVES

5	Equity Derivatives	49
5-1	Introduction	49
5-2	Forward Contracts	50
5-2.1	Payoff	51
5-2.2	Arbitrage Price	51
5-2.3	Forward Price	53
5-2.4	Impact of Dividends	53
5-2.4.1	Single Cash Dividend	54
5-2.4.2	Single Proportional Dividend	55
5-3	'Plain Vanilla' Options	55
5-3.1	Payoff	56
5-3.2	Option Value	57

5-3.3	Put-Call Parity	57
5-3.4	Option Strategies	58
5-3.4.1	Leverage	58
5-3.4.2	Covered Call	59
5-3.4.3	Straddle	60
5-3.4.4	Butterfly	61
5-4	Further Reading	61
5-5	Problems	61
6	The Binomial Model	65
6-1	One-Step Binomial Model	65
6-1.1	An Example	65
6-1.2	General Formulas	67
6-2	Multi-Step Binomial Trees	67
6-3	Binomial Valuation Algorithm	69
6-4	Further Reading	70
6-5	Problems	70
7	The Lognormal Model	75
7-1	Fair Value	75
7-1.1	Probability Distribution of S_T	75
7-1.2	Discount Rate	76
7-2	Closed-Form Formulas for European Options	76
7-3	Monte-Carlo Method	78
7-4	Further Reading	78
7-5	Problems	78
8	Dynamic Hedging	83
8-1	Hedging Option Risks	83
8-1.1	Delta-hedging	84
8-1.2	Other Risk Parameters: the ‘Greeks’	85
8-1.3	Hedging the Greeks	86
8-2	The P&L of Delta-hedged Options	86
8-2.1	Gamma	86
8-2.2	Theta	87
8-2.3	Option Trading P&L Proxy	88
8-3	Further Reading	89
8-4	Problems	89
PART III ADVANCED MODELS AND TECHNIQUES		
9	Models for Asset Prices in Continuous Time	95
9-1	Continuously Compounded Interest Rate	95
9-1.1	Fractional Interest Rate	95
9-1.2	Continuous Interest Rate	96
9-2	Introduction to Models for the Behavior of Asset Prices in Continuous Time	96

9-3	Introduction to Stochastic Processes	97
9-3.1	Standard Brownian Motion	98
9-3.2	Generalized Brownian Motion	99
9-3.3	Geometric Brownian Motion	100
9-4	Introduction to Stochastic Calculus	101
9-4.1	Ito Process	101
9-4.2	The Ito-Doeblin Theorem	101
9-4.3	Heuristic Proof of the Ito-Doeblin Theorem	102
9-5	Further Reading	103
9-6	Problems	103
10	The Black-Scholes Model	109
10-1	The Black-Scholes Partial Differential Equation	109
10-1.1	Ito-Doeblin Theorem for the Derivative's Value	110
10-1.2	Riskless Hedged Portfolio	111
10-1.3	Arbitrage Argument	111
10-1.4	Partial Differential Equation	111
10-1.5	Continuous Delta-hedging	112
10-2	The Black-Scholes Formulas for European Vanilla Options	112
10-3	Volatility	113
10-3.1	Historical Volatility	113
10-3.2	Implied Volatility	114
10-4	Further Reading	114
10-5	Problems	114
11	Volatility Trading	117
11-1	Implied and Realized Volatilities	117
11-1.1	Realized Volatility	117
11-1.2	Implied Volatility	117
11-2	Volatility Trading Using Options	118
11-3	Volatility Trading Using Variance Swaps	119
11-3.1	Variance Swap Payoff	120
11-3.2	Variance Swap Market	120
11-3.3	Variance Swap Hedging and Pricing	120
11-4	Further Reading	123
11-5	Problems	123
12	Exotic Derivatives	127
12-1	Single-Asset Exotics	127
12-1.1	Digital Options	127
12-1.2	Asian Options	127
12-1.3	Barrier Options	128
12-1.4	Lookback Options	129
12-1.5	Forward Start Options	129
12-1.6	Cliquet Options	130
12-1.7	Structured Products	130

12-2	Multi-Asset Exotics	131
12-2.1	Spread Options	131
12-2.2	Basket Options	132
12-2.3	Worst-of and Best-of Options	132
12-2.4	Quanto Options	133
12-2.5	Structured Products	133
12-2.6	Dispersion and Correlation Trading	134
12-3	Beyond Black-Scholes	134
12-3.1	Black-Scholes on Multiple Assets	134
12-3.2	Fitting the Smile	135
12-3.2.1	Stochastic Volatility	135
12-3.2.2	Jumps	135
12-3.2.3	Local Volatility	136
12-3.3	Discrete Hedging and Transaction Costs	137
12-3.3.1	Discrete Hedging	137
12-3.3.2	Transaction Costs	137
12-3.4	Correlation Modeling	138
12-4	Further Reading	139
12-5	Problems	139

SOLUTIONS

Problem Solutions	145
Chapter 1	145
Chapter 2	148
Chapter 3	151
Chapter 4	156
Chapter 5	161
Chapter 6	167
Chapter 7	172
Chapter 8	182
Chapter 9	186
Chapter 10	194
Chapter 11	197
Chapter 12	199

APPENDICES

A Probability Review	205
A-1 States of Nature. Random Variables. Events	205
A-2 Probability. Expectation. Variance	206
A-3 Distribution. Normal Distribution	207
A-4 Independence. Correlation	209
A-5 Probability Formulas	210
A-6 Further Reading	211

B	Calculus Review	213
	B-1 Functions of Two Variables x and y	213
	B-2 Taylor Expansions	214
C	Finance Formulas	217
	C-1 Rates and Yields	217
	C-2 Present Value. Arbitrage Price	217
	C-3 Forward Contracts	217
	C-4 Options	218
	C-5 Volatility	219
	C-6 Stochastic Processes. Stochastic Calculus	220
	C-7 Greeks etc.	220
	Index	223
