

## Index

- agents, 15–16
- annuity hedging, 203–204
- ARCH models, 73–74
- asset swaps, 156–163, 170–173
  - and hedging, 201–203
  - and HER, 231
- assurance policies
  - See also* life insurance
  - introduction, 1
  - investment structure and risk, 3–4
- autoregressive conditional heteroskedasticity.
  - See* ARCH models
  
- bivariate copulas, 43–44
- bond constructions, 116–117
- brokers, 16, 92
  
- capital markets products
  - bond constructions, 116–117
  - CIOs (Collateralized Insurance Obligation), 138–141
  - convertable bonds, 120–125
  - coupon bonds, 119–120
  - equity-linked notes, 144–145
  - introduction, 115–116
  - longevity bonds, 126–137
  - PAC bonds, 141–144
  - power bonds, 137–138
  - principal protection, 125–126
  - Sharia compliant bonds, 137
  - zero coupon bonds, 117–119
- carriers, 17
- CDO contracts
  - credit correlation for CDO pricing, 47
  - gaussian copulas and correlation in CDO structures, 44
  - introduction, 27–29
  - life policy CDOs, 29
  - synthetic and cash flow CDOs, 29
- CDS contracts
  - bond pricing, 33–37
  - introduction, 27
- CIOs (Collateralized Insurance Obligation), 138–141
- collateral managers, 16–17, 93
- Collateralized Insurance Obligation. *See* CIOs
- convertable bonds, 120–125
- copulas, 43–44, 76–77
- coupon bonds, 119–120
- coupon tranching, 63
- CPPI study, 164–167
- credit enhancement for retail, 153–154
- credit risk and hedging, 227
- Credit Suisse Longevity Index, 184
- custodial agents, 57, 92–93
  
- deterministic mortality swaps, 170
- diversification and hedging, 227
  
- endowment insurance, 11–12
- equity bonds, 62
- equity reversal programme, 154–156
- equity-linked notes, 144–145
- escrow agents, 16
  
- FER (financial economists roundtable)
  - proposals for reform, 2–3
- financial economists roundtable. *See* FER
- floater/inverse pair, 64–65
- forward mortality, 176–178, 191
- forward rate agreement, 182
- forwards, 185–190, 219–220
- Franklin, Benjamin, 1
- futures, 185–190, 219–220
  
- GARCH models, 74
- gaussian copulas and correlation in CDO structures, 44

- generalized autoregressive conditional heteroskedasticity. *See* GARCH models
- generic life policy valuation, 37–38
- Goldman Sachs QXX index, 185
- Grigsby vs Russell (1911), 13
- group policies, 105
- guaranteed loan repayment
- asset swaps, 156–163
  - commercial and industrial uses, 147–151
  - CPPI study, 164–167
  - credit enhancement for retail, 153–154
  - pension swaps, 163–164
  - principal reduced mortgages, retail, 151–153
  - reverse mortgage or equity reversal programme, 154–156
- Health Insurance and Portability and Accountability Act. *See* HIPAA
- hedging, 4, 93
- caps, 222–224
  - credit risk, 227–228
  - futures–forwards, 219–220
  - HER for an inverse longevity bond, 228–232
  - introduction, 199
  - inverse longevity bonds, 208–219
  - liquidity risk, 226–227
  - longevity or extension risk, 199–208
  - options, 220–222
  - swaptions, 224–225
- HER (Hedge Efficiency Ratio)
- and inverse longevity bonds, 228–232
- HIPAA (Health Insurance and Portability and Accountability Act), 14
- home lease programme, 156
- implied models, 69–73
- insurance wraps and hedging, 211
- insured(s), 17
- interest rates, 178–179
- caps, 194–195
  - swap, 179–181
  - swaptions, 195–196
- inverse longevity bonds, 134–137
- and hedging, 208–219
  - and hedging, 208–219, 228–232
- investors, 16
- IO/discount fixed rate pair, 63
- IO/PO pair, 64
