Index

adverse selection, 108
alpha, 44, 111
  persistence of, 46
arbitrage pricing theory, 2, 10
Arrow, Kenneth, 83
Ask, 7
author's motto, 20
auto regression, 22
autocorrelation, 99
average true range, 63

Bachelier, Louis, 3–4
Beat the Dealer, 78
bell shaped curve, 15
Bernoulli, Daniel, 37, 82–83
  proposed log utility, 37
Bernoulli, Nicolas, 37
beta, 44, 111
  persistence of, 46
bid, 7
bid-ask bounce, 24
Black Scholes model, 115
Black, Fisher, 10
Brownian Motion, 4
Burgi, Joost, 82

calls, similar to stop loss, 65
Capital Asset Pricing Model, 45, 46, 95–96
CAPM, *see* Capital Asset Pricing Model
cdf normal, 18
CD-ROM, 11
Churchill, Winston, 51–52
compensation, manager behavior at thresholds, 120
correlation, 76, 96, 99
  coefficient, definition, 42
  lagged, 99
  non-linear, 99
  of squared returns, 118
Covariance, defined, 42
  effect on variance, 95
Cramer, Gabriel, 82
cumulative density function, 16
  normal, 17

data adjustments, 109
  adjusting for holidays, 111
  mining, 64
  net changes, 103
  price levels, 103
  quality, 102
  round off errors in, 109
  sample bias, 106
  synchronization, 103
  time stamping, 106
Debreu, G., 83
distribution
  advantages of empirical, 69, 70
  binomial, 14
  choice of, 114
  continuous theoretical, 94
  definition, 14
  empirical, 23–24, 75, 96, 114–115
  empirical advantages of, 114–115
  empirical disadvantages of, 114
  empirical disadvantages of, 116
  empirical probability density function (pdf), 24
  log normal, 19–20
  lognormal as multiplicative model, 19, 61
  non-parametric, 24
  normal, 15–16
  normal, as additive model, 61
  parametric, 24
  probability, 14
  Student, 40
  tails, fat tails, 22, 114
  theoretical advantages of, 114
  theoretical disadvantages, 114
  theoretical, 114
diversification, effect of, 81
drawdown, 78
drift, 6

e, 33, 37
Efficient frontier, 46–47
efficient market hypothesis, 2–5, 9
EGARCH, 23
Einstein, Albert, 3–4
