- Algorithm, 151–152, 299
- Analytical measures, 248, 251–255
- Analytical perspective, 173–174, 299
- Analytics:
 - business analytics comparison, 10–12
 - defined, 299
 - delivering value example, 49
 - selling value of, 86–89
- Analytics platform, 54–55, 60–62, 299
- Analytics Process Designer, 71*f*, 79–80
- Analytics Team Lead, 70–72
- Anchoring, 112–113, 300
- Assets, 56–60, 300
- Average revenue per user (ARPU), 142, 300

- Bargaining power, 30*f*, 31
- Base rate bias, 113, 300
- Best product strategy (Delta model), 39–40
- Big data, 4, 300
- Business analytics:
 - challenges in, 83–85, 90–96
 - challenges of applying, 83–85
 - comprehensive example, 285–296
 - customer view, 39–44
 - defined, 10–12, 300
 - delivering value, 46–51
 - external view, 28–35
 - fostering innovation and invention, 44–46
 - internal view, 35–39
 - market view, 39–44
 - reasons behind strategic planning, 17–25
 - role of organization, 9, 13–17
 - selling value of, 86–89
 - traditional view, 25–28
- Business analytics team:
 - about, 54–55
 - common team structures, 66–68
 - delivery plans and, 191–192
 - measurement framework and, 238–240, 278–281
 - reasons for failure, 88–89
 - roles and responsibilities, 68–83
- Business cases:
 - communicating financial release with, 110–112
 - creating focus with, 114–115
 - minimizing bias with, 112–113
 - reasons for building, 108–110
 - simulating, 134–140
- Business intelligence, 11, 300
- Business measures, 247–251
- Business planning, 21–23, 300–301
- Butter's law, 4, 301

- Campaign optimization, 206, 301
- Catch-22, 216–217, 245, 301
- Centrality measures, 230, 301
- Champion/challenger processes, 270–273, 301
- Churn, 140–143, 301
- Coase, Robert, 13
- Communication strategies:
 - awareness and, 158–163
 - checklist for, 186–187
 - conceptual relevancy, 172–178
 - defining communication process, 155–157
 - forecasting model for planning, 182–185
 - four-step framework, 96*f*
 - information relevancy and, 158–163
 - organizational considerations, 163–172
 - path to persuasion, 178–182
 - planning, 148–153
 - reasons for, 154–158
 - societal cultural considerations, 163–172
 - subjectivity of perception, 92–94
 - tailoring, 181–182
- Competencies, 55–56, 301
- Competitive advantage, 44–46, 203–207, 301
- Competitive rivalry, 30–31
- Contagious churn (viral churn), 55, 134, 301–302
- Converting (planning technique), 27, 302

- Cost leadership strategy, 33–34, 302
- Cross-sectional modeling, 72, 302
- Cross-selling, 127, 302
- Cultural considerations, 163–172
- Customer targeting, 43–44
- Customer view. *See* Delta model (Hax and Wilde)
- Data cleansing, 223, 302
- Data management process, 57–60, 302
- Datamarts, 58–59, 302
- Data quality, 59, 302
- Data Steward, 71*f*, 77–79
- Data warehouses, 78, 199, 302
- Davenport, Thomas, 6
- Decision-making process, 179–181
- Decision trees, 11, 55, 302
- Defining value in business analytics:
 - about, 99–100
 - checklist for, 144–145
 - different types of value, 103–108
 - identifying intangible value, 131–134
 - identifying tangible value, 115–131
 - reasons for, 100–103
 - role of business cases, 108–115
 - simulating business cases, 134–140
 - telecommunications example, 140–143
- Delivery plans. *See* Execution plans

- Innovation, 43–46, 206–207, 305
- Intangible value:
 - common financial measures, 117–124
 - defined, 306
 - identifying, 131–134
 - tangible value comparison, 104–106
 - in value matrix, 107*f*
- Intentional planning, 24–25, 306
- Internal rate of return, 103, 123–124, 306
- Internal view. *See* Resource-based view of the firm
- International Data Corporation (IDC), 4
- Invention, fostering, 44–46
- Join (merge), 58, 306
- Kryder's law, 3–4, 306
- Lift (measure), 254, 306
- Linear programming, 72, 306
- Low-context culture, 170–172, 306
- Market failure, 15–16, 306
- Market view. *See* Delta model (Hax and Wilde)
- Matching (planning technique), 27, 307

- Measurement framework:
 about, 235–236
 analytical measures, 248, 251–255
 automating, 266–268
 business analytics team and, 238–240, 278–281
 business measures, 247–251
 checklist for, 282–283
 common measures, 103
 delivering, 263–268
 developing platform for, 264–266
 essential nature of, 236–241
 establishing, 260–263
 four-step framework, 96*f*
 importance of, 95–96
 power as information, 1–3
 role of, 241–247
 statistical sampling, 268, 277–278
 for tangible value, 117–124
 technical measures, 248, 255–260
 test-and-learn strategies, 268–277
- Merge process, 58, 307
- Microsegmentation modeling, 205, 267, 307
- Model deployment, 19, 79, 82, 307
