

Index

A

Accountability
 journey to increased, 81
 trend toward increased, 13–14, 52
Acquisition costs, 33
Annualized values, 58–59
Anthony, R., 71
Application data
 Retail Merchandise Company case
 study on, 130–132
 ROI forecasting with, 129–130

B

Benchmarking
 limitations of, 15
 program costs, 2–5
Benefit-cost ratio (BCR), 59–60, 76,
 77
Bernthal, P., 80
Bowers, D., 132
Byham, B., 80

C

Cascio, W., 80
Coordinator expenses, 34
Cost accumulation, 42–43
Cost classification matrix, 40–42
Cost Estimating Worksheet,
 44–46
Cost estimation
 cost accumulation used for,
 42–43

 cost classification matrix for,
 40–47
 process and worksheet for, 43–46
Cost forecasting, 6
Cost reporting, 38–40
Cost Worksheet, 47
Costs
 calculating fully loaded, 23–26
 employee benefits, 30
 as essential to ROI
 Methodology, 1
 estimating, 40–46
 reasons for developing, 2–7
 See also Program costs

D

Data
 ROI forecast using application,
 129–132
 ROI forecast using learning,
 125–129
 ROI forecast using reaction,
 119–125
Delivery/implementation costs,
 33–36
Designing/development costs, 31–33
Discounted cash flow, 76–78

E

Economic value added (EVA), 82
Efficiency improvement, 6
Employee benefits costs, 30
