

# Contents

<b>Preface</b>	<b>xv</b>
<b>What's New in the Second Edition</b>	<b>xvii</b>
<b>Acknowledgments</b>	<b>xix</b>
<b>About the Author</b>	<b>xxi</b>
<b>Introduction</b>	<b>1</b>
<b>PART ONE</b>	
<b>Risk Identification</b>	
<b>CHAPTER 1</b>	
<b>Moving Beyond Uncertainty</b>	<b>11</b>
A Brief History of Risk: What Exactly is Risk?	11
Uncertainty versus Risk	12
Why is Risk Important in Making Decisions?	14
Dealing with Risk the Old-Fashioned Way	18
The Look and Feel of Risk and Uncertainty	21
Integrated Risk Management Framework	23
Questions	29
<b>PART TWO</b>	
<b>Risk Evaluation</b>	
<b>CHAPTER 2</b>	
<b>From Risk to Riches</b>	<b>33</b>
Taming the Beast	33
The Basics of Risk	35

<b>viii</b>	<b>CONTENTS</b>
The Nature of Risk and Return	36
The Statistics of Risk	36
The Measurements of Risk	42
Appendix—Computing Risk	44
Questions	54
<b>CHAPTER 3</b>	
<b>A Guide to Model-Building Etiquette</b>	<b>56</b>
Document the Model	56
Separate Inputs, Calculations, and Results	59
Protect the Models	61
Make the Model User-Friendly: Data Validation and Alerts	62
Track the Model	64
Automate the Model with VBA	65
Model Aesthetics and Conditional Formatting	66
Appendix—A Primer on VBA Modeling and Writing Macros	67
Exercises	76
<b>PART THREE</b>	
<b>Risk Quantification</b>	
<b>CHAPTER 4</b>	
<b>On the Shores of Monaco</b>	<b>81</b>
What Is Monte Carlo Simulation?	82
Why Are Simulations Important?	82
Comparing Simulation with Traditional Analyses	85
Using Risk Simulator and Excel to Perform Simulations	88
Questions	94
<b>CHAPTER 5</b>	
<b>Test Driving Risk Simulator</b>	<b>95</b>
Getting Started with Risk Simulator	95
Running a Monte Carlo Simulation	97
Using Forecast Charts and Confidence Intervals	108
Correlations and Precision Control	112
Appendix—Understanding Probability Distributions	118
Appendix—ROV Compiler: Protects and Converts Excel Files into Executable EXE	142

Appendix—ROV Extractor and Evaluator: Runs Extreme Super Speed Simulations and Converts Excel Models into a Calculator Environment	146
Questions	149
Exercises	149

**CHAPTER 6**

**Pandora's Toolbox 178**

Tornado and Sensitivity Tools in Simulation	178
Sensitivity Analysis	187
Distributional Fitting: Single Variable and Multiple Variables	192
Bootstrap Simulation	196
Hypothesis Testing	199
Data Extraction, Saving Simulation Results, and Generating Reports	203
Custom Macros	204
Distributional Analysis Tool	204
Scenario Analysis Tool	209
Segmentation Clustering Tool	209
Structural Break Analysis	210
Detrending and Deseasonalizing	212
Principal Component Analysis	212
Appendix—Goodness-of-Fit Tests	213
Questions	215
Exercises	216

**PART FOUR**

**Industry Applications**

**CHAPTER 7**

**Extended Business Cases I: Pharmaceutical and Biotech  
Negotiations, Oil and Gas Exploration, Financial Planning with  
Simulation, Hospital Risk Management, Risk-Based Executive  
Compensation Valuation, and Risk-Based Schedule Planning 285**

Case Study: Pharmaceutical and Biotech Deal Structuring	286
Case Study: Oil and Gas Exploration and Production	306
Case Study: Financial Planning with Simulation	318
Case Study: Hospital Risk Management	328
Case Study: Risk-Based Executive Compensation Valuation	348
Case Study: Risk-Based Schedule Planning with Simulation	357

**PART FIVE**

**Risk Prediction**

**CHAPTER 8**

<b>Tomorrow's Forecast Today</b>	<b>371</b>
Different Types of Forecasting Techniques	371
Running the Forecasting Tool in Risk Simulator	375
Time-Series Analysis	376
Multivariate Regression	380
Stepwise Regression	383
Stochastic Forecasting	386
Nonlinear Extrapolation	390
Box-Jenkins ARIMA Advanced Time-Series	392
Auto ARIMA (Box-Jenkins ARIMA Advanced Time Series)	397
Basic Econometrics	399
J-Curve and S-Curve Forecasts	401
GARCH Volatility Forecasts	403
Markov Chains	406
Maximum Likelihood Models on Logit, Probit, and Tobit	408
Spline (Cubic Spline Interpolation and Extrapolation)	411
Questions	411
Exercise: Forecasting	413

**CHAPTER 9**

<b>Using the Past to Predict the Future</b>	<b>426</b>
Time-Series Forecasting Methodology	426
No Trend and No Seasonality	427
With Trend but No Seasonality	433
No Trend but with Seasonality	435
With Seasonality and with Trend	439
Regression Analysis	441
The Pitfalls of Forecasting: Outliers, Nonlinearity, Multicollinearity, Heteroskedasticity, Autocorrelation, and Structural Breaks	457
Other Technical Issues in Regression Analysis	471
Regression and Forecasting Diagnostic Tool	473
Statistical Analysis Tool	483
Appendix—Forecast Intervals	489
Appendix—Ordinary Least Squares	490
Appendix—Detecting and Fixing Heteroskedasticity	493
Appendix—Detecting and Fixing Multicollinearity	494

*Contents* **xi**

---

Appendix—Detecting and Fixing Autocorrelation	496
Questions	497
Exercise	497

**PART SIX**

---

**Risk Diversification**

**CHAPTER 10**

<b>The Search for the Optimal Decision</b>	<b>501</b>
What Is an Optimization Model?	501
The Traveling Financial Planner	502
The Lingo of Optimization	504
Solving Optimization Graphically and Using Excel’s Solver	507
Questions	513

**CHAPTER 11**

<b>Optimization Under Uncertainty</b>	<b>514</b>
Optimization Procedures	514
Continuous Optimization	517
Discrete Integer Optimization	523
Efficient Frontier and Advanced Optimization Settings	526
Stochastic Optimization	530
Optimization Application Example: Military Portfolio and Efficient Frontier	535
Optimization Application Example: Optimal Pricing with Elasticity	539
Appendix—ROV Modeler Suite: Server-Based Applications for Running Data-Intensive Models at Extremely High Speeds	544
Appendix—Computing Annualized Returns and Risk for Portfolio Optimization	562
Exercise: Optimization	566
Questions	579

**PART SEVEN**

---

**Risk Mitigation**

**CHAPTER 12**

<b>What Is So Real About Real Options, and Why Are They Optional?</b>	<b>583</b>
What Are Real Options?	583
The Real Options Solution in a Nutshell	585

Issues to Consider	586
Implementing Real Options Analysis	587
Types of Real Options Strategies	588
Industry Leaders Embracing Real Options	590
More Sample Applications and Short Cases	593
What the Experts Are Saying	606
Criticisms, Caveats, and Misunderstandings in Real Options	609
Questions	612
<b>CHAPTER 13</b>	
<b>The Black Box Made Transparent: Real Options Super Lattice Solver Software</b>	<b>613</b>
Single Asset Super Lattice Solver	615
Multiple Asset Super Lattice Solver	624
Multinomial Super Lattice Solver	626
SLS Lattice Maker	628
SLS Excel Solution (SLS, MSLS, and Changing Volatility Models in Excel)	628
SLS Functions	631
Exotic Financial Options Valuator	635
Payoff Charts, Tornado Sensitivity, Scenario, and Convergence Analysis	635
Key SLS Notes and Tips	641
Exercises	644
<b>PART EIGHT</b>	
<b>More Industry Applications</b>	
<b>CHAPTER 14</b>	
<b>Extended Business Cases II: Real Estate, Banking, Military Strategy, Automotive Aftermarkets, Global Earth Observation Systems, Employee Stock Options, Oil and Gas Royalty Lease Negotiations, Real Options and IT Enterprise Risk Security, Basel II Credit and Market Risk Analysis, and IT Information Security Intrusion Risk Management</b>	<b>675</b>
Case Study: Understanding Risk and Optimal Timing in a Real Estate Development Using Real Options Analysis	676
Case Study: Using Stochastic Optimization and Valuation Models to Evaluate the Credit Risk of Corporate Restructuring	692

*Contents*

**xiii**

Case Study: Real Options and KVA in Military Strategy at the United States Navy	698
Case Study: Manufacturing and Sales in the Automotive Aftermarket	709
Case Study: The Boeing Company's Strategic Analysis of the Global Earth Observation System of Systems	719
Case Study: Valuing Employee Stock Options Under the 2004 FAS 123R	729
Case Study: Oil and Gas Royalty Lease Negotiation	760
Case Study: How Real Options Mitigates IT Enterprise Security Risks	780
Case Study: Basel II Credit Risk and Market Risk	795
Case Study: IT Information Security Intrusion Risk Management	841

**PART NINE**

**Risk Management**

**CHAPTER 15**

**The Warning Signs**

**865**

The Problem of Negligent Entrustment	865
Management's Due Diligence	866
Sins of an Analyst	866
Reading the Warning Signs in Monte Carlo Simulation	868
Reading the Warning Signs in Time-Series Forecasting and Regression	879
Reading the Warning Signs in Real Options Analysis	884
Reading the Warning Signs in Optimization under Uncertainty	887
Questions	888

**CHAPTER 16**

**Changing a Corporate Culture**

**889**

How to Get Risk Analysis Accepted in an Organization	889
Change-Management Issues and Paradigm Shifts	889
Making Tomorrow's Forecast Today	893
Parting Shots and a Word of Caution from the Author	894

**Notes**

**905**

<b>Tables You Really Need</b>	<b>915</b>
Standard Normal Distribution (partial area)	916
Standard Normal Distribution (full area)	917
Student's t-Distribution (one and two tails)	918
Durbin-Watson Critical Values (alpha 0.05)	919
Normal Random Numbers (standard normal distribution's random number generated $\sim N(0, 1)$ )	920
Random Numbers (multiple digits)	922
Uniform Random Numbers (uniform distribution's random number generated between 0.0000 and 1.0000)	924
Chi-Square Critical Values	926
F-Distribution Critical Statistics (alpha one tail 0.10)	928
F-Distribution Critical Statistics (alpha one tail 0.05)	930
F-Distribution Critical Statistics (alpha one tail 0.025)	932
F-Distribution Critical Statistics (alpha one tail 0.01)	934
Real Options Analysis Values (1-year maturity at 5% risk-free rate)	936
Real Options Analysis Values (3-year maturity at 5% risk-free rate)	938
Real Options Analysis Values (5-year maturity at 5% risk-free rate)	940
Real Options Analysis Values (7-year maturity at 5% risk-free rate)	942
Real Options Analysis Values (10-year maturity at 5% risk-free rate)	944
Real Options Analysis Values (15-year maturity at 5% risk-free rate)	946
Real Options Analysis Values (30-year maturity at 5% risk-free rate)	948
<b>Answers to End of Chapter Questions</b>	<b>951</b>
<b>About the DVD-ROM</b>	<b>959</b>
System Requirements	959
What's on the DVD	959
Customer Care	960
<b>Index</b>	<b>963</b>
