1 Introduction: The Market Context	1
1.1 Capital and the Capital Markets	1
1.2 The Euromarkets (International Capital Markets)	4
1.3 Modern Investment Banking	5
1.4 The Clients of Investment Banks	8
1.5 About this Book	11
2 The Money Markets	15
2.1 Chapter Overview	15
2.2 Domestic Money Markets	15
2.3 US Domestic Markets	16
2.4 The European Central Bank (ECB)	18
2.5 Sterling Money Markets	19
2.6 The Bank of Japan	20
2.7 Systemic Risk and Moral Hazards	20
2.8 Treasury Bills	21
2.9 Discounting Treasury Bills	21
2.10 US Commercial Paper	24
2.11 Credit Risk on USCP	25
2.12 Bankers' Acceptances	26
2.13 The Eurocurrency Markets	26
2.14 Eurocurrency Loans and Deposits	27
2.15 Eurocurrency Interest and Day-Count	29
2.16 Eurocurrency Certificates of Deposit	30
2.17 CD Yield-to-Maturity	31
2.18 Euro-Commercial Paper	31
2.19 Repos and Reverses	32
2.20 Repo: Case Study	33
2.21 Other Features of Repos	33
2.22 Chapter Summary	34

3	The Foreign Exchange Market	37
3.1	Chapter Overview	37
3.2	Market Structure	37
3.3	FX Dealers and Brokers	38
3.4	Spot Foreign Exchange Deals	39
3.5	Sterling and Euro Quotations	40
3.6	Factors Affecting Spot FX Rates	41
3.7	Spot FX Trading	44
3.8	Spot Position Keeping	45
3.9	FX Risk Control	47
3.10	Cross-Currency Rates	49
3.11	Outright Forward FX Rates	50
3.12	Outright Forward FX Hedge: Case Study	51
3.13	Forward FX Formula	52
3.14	FX or Forward Swaps	53
3.15	FX Swap Two-Way Quotations	55
3.16	Chapter Summary	56
4	Major Government Bond Markets	59
4.1	Chapter Overview	59
4.2	Introduction to Government Bonds	59
4.3	Sovereign Risk	60
4.4	US Government Notes and Bonds	62
4.5	US Treasury Quotations	64
4.6	US Treasury Strips	66
4.7	Bond Pricing	67
4.8	Pricing Coupon Bonds: Examples	68
4.9	Detailed Bond Valuation: US Treasury	69
4.10	Bond Yield	71
4.11	Reinvestment Assumptions	72
4.12	Annual and Semi-Annual Bond Yields	73
4.13	UK Government Bonds	74
4.14	Japanese Government Bonds (JGBs)	77
4.15	Eurozone Government Bonds	77
4.16	Chapter Summary	78
5	Bond Price Sensitivity	81
5.1	Chapter Overview	81
5.2	Bond Market Laws	81
5.3	Other Factors Affecting Price Sensitivity	83
5.4	Macaulay's Duration	83
5.5	Calculating Macaulay's Duration	84
5.6	Duration of a Zero	85
5.7	Modified Duration	86
5.8	Price Value of a Basis Point	87
5.9	Convexity	88

5.10	Measuring Convexity	88
5.11	Convexity Behaviour	90
5.12	Portfolio Duration	91
5.13	Dedication	92
5.14	Immunization	94
5.15	Duration-Based Hedges	96
5.16	Convexity Effects on Duration Hedges	97
5.17	Chapter Summary	98
6	The Yield Curve	99
6.1	Chapter Overview	99
6.2	Real and Nominal Interest Rates	99
6.3	Compounding Periods	100
6.4	The Yield Curve Defined	101
6.5	Theories of Yield Curves	102
6.6	Zero Coupon or Spot Rates	104
6.7	Bootstrapping	106
6.8	Spot Rates and the Par Curve	108
6.9	Pricing Models Using Spot Rates	108
6.10	Forward Rates	109
6.11	Discount Factors	110
6.12	Chapter Summary	112
7	Credit Spreads and Securitization	113
7.1	Chapter Overview	113
7.2	Basics of Credit Spreads	113
7.3	The Role of the Ratings Agencies	115
7.4	Credit Spreads and Default Probabilities	117
7.5	Credit Default Swaps	118
7.6	Index Credit Default Swaps	121
7.7	Basket Default Swaps	122
7.8	Credit-Linked Notes	123
7.9	Securitization and CDOs	124
7.10	Rationale for Securitization	126
7.11	Synthetic CDOs	126
7.12	Chapter Summary	128
8	Equity Markets and Equity Investment	129
8.1	Chapter Overview	129
8.2	Comparing Corporate Debt and Equity	129
8.3	Additional Features of Common Stock	130
8.4	Hybrid Securities	131
8.5	Equity Investment Styles	132
8.6	Efficient Markets	133
8.7	Modern Portfolio Theory (MPT)	135
8.8	Primary Markets for Common Stock	138

8.9	Subsequent Common Stock Issues	140
8.10	Secondary Markets: Major Stock Markets	142
8.11	Depository Receipts	145
8.12	Stock Lending	146
8.13	Portfolio (Basket) Trading	148
8.14	Chapter Summary	148
9	Equity Fundamental Analysis	151
9.1	Chapter Overview	151
9.2	Principles of Common Stock Valuation	151
9.3	The Balance Sheet Equation	152
9.4	The Income Statement	154
9.5	Earnings Per Share (EPS)	156
9.6	Dividend Per Share (DPS)	157
9.7	Ratio Analysis	158
9.8	Liquidity Ratios	159
9.9	Profitability Ratios	159
9.10	Leverage Ratios	161
9.11	Investor Ratios and Valuation	162
9.12	Applying Valuation Multiples	163
9.13	Firm or Enterprise Value Multiples	165
9.14	Chapter Summary	166
10	Cash Flow Models in Equity Valuation	169
10.1	Chapter Overview	169
10.2	The Basic Dividend Discount Model	169
10.3	Constant Dividend Growth Models	170
10.4	The Implied Return on a Share	172
10.5	Dividend Yield and Dividend Growth	172
10.6	Price/Earnings Ratio	173
10.7	Stage Dividend Discount Models	175
10.8	Two-Stage Model: Example	175
10.9	The Capital Asset Pricing Model (CAPM)	176
10.10	Beta	177
10.11	Estimating the Market Risk Premium	178
10.12	The Equity Risk Premium Controversy	178
10.13	CAPM and Portfolio Theory	180
10.14	Free Cash Flow Valuation	183
10.15	Forecasting Free Cash Flows	184
10.16	Weighted Average Cost of Capital (WACC)	185
10.17	Residual Value	186
10.18	WACC and Leverage	187
10.19	Assets Beta Method	189
10.20	Company Value and Leverage	190
10.21	Chapter Summary	191

11 Interest Rate Forwards and Futures	193
11.1 Chapter Overview	193
11.2 Forward Rate Agreements (FRAs)	193
11.3 FRA Application: Case Study	194
11.4 Borrowing Costs with an FRA Hedge	196
11.5 FRA Market Quotations	197
11.6 The Forward Interest Rate	199
11.7 Financial Futures	201
11.8 CME Eurodollar Futures	203
11.9 Eurodollar Futures Quotations	203
11.10 Futures Margining	204
11.11 Margining Example: EURIBOR Futures on Eurex	205
11.12 Hedging with Interest Rate Futures: Case Study	208
11.13 Futures Strips	209
11.14 Chapter Summary	211
Appendix: Statistics on Derivative Markets	211
12 Bond Futures	213
12.1 Chapter Overview	213
12.2 Definitions	213
12.3 The CBOT 30-Year US Treasury Bonds Futures	213
12.4 Invoice Amount and Conversion Factors	214
12.5 Long Gilt and Euro-Bund Futures	216
12.6 Forward Bond Price	217
12.7 Carry Cost	218
12.8 The Implied Repo Rate	218
12.9 The Cheapest to Deliver (CTD) Bond	219
12.10 CTD Behaviour	221
12.11 Hedging with Bond Futures	222
12.12 Basis Risk	223
12.13 Hedging Non-CTD Bonds	224
12.14 Using Futures in Portfolio Management	225
12.15 Chapter Summary	226
13 Interest Rate Swaps	227
13.1 Chapter Overview	227
13.2 Swap Definitions	227
13.3 The Basic Interest Rate Swap Illustrated	228
13.4 Typical Swap Applications	230
13.5 Interest Rate Swap: Detailed Case Study	231
13.6 Interest Rate Swap Terms	233
13.7 Comparative Advantage	234
13.8 Swap Quotations and Spreads	236
13.9 Determinants of Swap Spreads	237
13.10 Hedging Swaps with Treasuries	238

13.11	Cross-Currency Swaps: Case Study	239
13.12	Cross-Currency Swap Revaluation	241
13.13	Chapter Summary	242
	Appendix: Swap Variants	242
14	Interest Rate Swap Valuation	245
14.1	Chapter Overview	245
14.2	Valuing a Swap at Inception	245
14.3	Valuing the Swap Components	246
14.4	Swap Revaluation	247
14.5	Revaluation Between Payment Dates	248
14.6	The Forward Rate Method	249
14.7	Forward Rate Method on a Spreadsheet	251
14.8	Swap Rates and LIBOR Rates	251
14.9	Pricing a Swap from Futures	252
14.10	Hedging Interest Rate Risk on Swaps	256
14.11	Chapter Summary	257
15	Equity Index Futures and Swaps	259
15.1	Chapter Overview	259
15.2	Index Futures	259
15.3	Margining Procedures	260
15.4	Final Settlement and Spread Trades	262
15.5	Hedging with Index Futures: Case Study	263
15.6	Hedge Efficiency	264
15.7	Other Uses of Index Futures	265
15.8	Pricing an Equity Forward Contract	266
15.9	Index Futures Fair Value	267
15.10	The Basis	268
15.11	Index Arbitrage Trade	269
15.12	Running an Arbitrage Desk	270
15.13	Features of Index Futures	271
15.14	Equity Swaps	272
15.15	Managing the Risks on Equity Swaps	273
15.16	Structuring Equity Swaps	274
15.17	Benefits and Applications of Equity Swaps	275
15.18	Chapter Summary	276
16	Fundamentals of Options	277
16.1	Chapter Overview	277
16.2	Definitions	277
16.3	Basic Option Trading Strategies	278
16.4	Long Call: Expiry Payoff Profile	279
16.5	Short Call: Expiry Payoff Profile	281
16.6	Long Put: Expiry Payoff Profile	282
16.7	Short Put: Expiry Payoff Profile	284

16.8 Summary: Intrinsic and Time Value	284
16.9 CBOE Stock Options	285
16.10 CME S&P 500 Index Options	286
16.11 Stock Options on LIFFE	287
16.12 FT-SE 100 Index Options	288
16.13 Chapter Summary	289
Appendix: Exotic Options	289
17 Option Valuation Models	293
17.1 Chapter Overview	293
17.2 Fundamental Principles: European Options	293
17.3 Synthetic Forwards and Futures	295
17.4 American Options and Early Exercise	296
17.5 Binomial Trees	297
17.6 Expanding the Tree	300
17.7 Black-Scholes Model	302
17.8 Black-Scholes Assumptions	305
17.9 Chapter Summary	305
Appendix: Measuring Historic Volatility	306
18 Option Pricing and Risks	309
18.1 Chapter Overview	309
18.2 Intrinsic and Time Value Behaviour	309
18.3 Volatility Assumption and Option Pricing	311
18.4 Delta (Δ or δ)	312
18.5 Delta Behaviour	313
18.6 Gamma (Γ or γ)	314
18.7 Readjusting the Delta Hedge	315
18.8 Gamma Behaviour	316
18.9 Theta (Θ)	318
18.10 Vega	319
18.11 Rho (ρ) and Summary of Greeks	319
18.12 Chapter Summary	321
Appendix: Delta and Gamma Hedging	322
19 Option Strategies	325
19.1 Chapter Overview	325
19.2 Hedging with Put Options	325
19.3 Covered Call Writing	329
19.4 Collars	330
19.5 Bull and Bear Spreads	332
19.6 Other Spread Trades	334
19.7 Volatility Revisited	336
19.8 Volatility Trading: Straddles and Strangles	338
19.9 Current Payoff Profiles	339

19.10 Profits and Risks on Straddles	341
19.11 Chapter Summary	343
20 Additional Option Applications	345
20.1 Chapter Overview	345
20.2 OTC and Exchange-traded Currency Options	345
20.3 Hedging FX Exposures with Options: Case Study	346
20.4 Pricing Currency Options	348
20.5 Interest Rate Options	349
20.6 Exchange-Traded Interest Rate Options	350
20.7 Caps, Floors, and Collars	352
20.8 Interest Rate Cap: Case Study	353
20.9 Pricing Caps and Floors: Black Model	355
20.10 Swaptions	357
20.11 Interest Rate Strategies	359
20.12 Convertible Bonds	360
20.13 CB Measures of Value	361
20.14 Conversion Premium and Parity	363
20.15 Convertible Arbitrage	364
20.16 Chapter Summary	366
Glossary of Financial Terms	369
Index	415
