<i>Foreword</i>	v
<i>Acknowledgements</i>	vii
<i>Abbreviations</i>	xv
<i>Table of Cases</i>	xvii
<i>Table of Treaties, Legislation and other Legislative Instruments</i>	xxiii
1. Introduction	1
I. The Subject	1
II. Background	1
III. Role of Economic Analysis in Competition Law and its Limitations	6
IV. EU Competition Policy and the Nature and Scope of the Analysis	10
V. Analytical Framework and Outline	13
2. ICT Network Industries	15
I. General	15
II. Electronic Communications Network and Services	16
A. General	16
B. Telecommunications Networks and Services	20
C. Cable and Broadcasting Networks and Services	20
D. Internet, Internet Access and Internet Related Services	21
III. Hardware Platforms	22
IV. Software Platforms	23
V. Electronic Financial Sector Platforms	25
A. Card-based Payment Systems	25
(i) General	25
(ii) Card Systems	26
(iii) Issuing of Payment Cards	27
(iv) Acquiring of Card-holders and Merchants	28
(v) ATM Networks	29
B. Electronic Financial Exchanges with Clearing and Settlement	29
(i) Electronic Financial Exchanges	29
(ii) Clearing and Settlement	30
3. The Economics of Competition Policy	32
I. Major Economic Theories of Competition and their Evolution	32
A. Classical Era of Antitrust	32
B. Structural Era and the Harvard School	33
C. Efficiency Era and the Chicago School	34
D. The Post-Chicago Developments and the Era of Synthesis	36
II. Basic Economic Framework of Competition Policy	38
A. General	38
B. Economic Efficiency and Market Power	40

C. Efficiency Trade-offs.....	43
(i) Allocative versus Productive Efficiencies.....	43
(ii) Static versus Dynamic Efficiencies.....	45
D. Welfare Standards.....	47
(i) Consumer Welfare Standard.....	47
(ii) Total Welfare Standard.....	49
(iii) Alternative Welfare Standards.....	49
(iv) Existence of Optimal Welfare Standard?.....	50
4. The Economics of the ICT Network Industries.....	53
I. Introduction.....	53
II. Fundamental Characteristics of Networks.....	53
III. The Economics of Innovation.....	57
A. General.....	57
B. Economic Theories of Innovation.....	59
C. Public Policies and Incentives to Innovate.....	62
D. Innovation in Network Systems.....	64
IV. Major Theories of Economic Harm: Vertical Foreclosure and Raising Rivals' Costs.....	67
A. Economic Theories of Vertical Foreclosure.....	68
B. Raising Rivals Costs as Alternative Method of Foreclosure.....	70
V. (Dynamic) Nature of Competition in the ICT Industries: Interplay of Networks, Innovation and Competition.....	71
A. Competition in Dynamic Markets: the Relations between Market Structure and Innovation.....	71
(i) General.....	71
(ii) Austrian School's Approach and Related Dynamic Theories.....	71
(iii) Limits of the Austrian School's Approach.....	74
(a) Intensive Innovation: Competition or Monopoly Driven?.....	74
(b) Links between Market Concentration or Company Size and Innovation: Empirical Studies.....	76
(c) Influence of Fundamental Technology Characteristics on Market Structure and Innovation Activity.....	78
(d) Innovation and Market Structure: Importance of Competitive Process.....	79
B. Special Economic Characteristics and Sources of Market Power in the ICT Industries.....	80
(i) Innovation and IPRs.....	81
(ii) Network Effects and Tipping.....	82
(a) Types of Network Effects.....	82
(b) Network Effects and Network Size.....	83
(c) Sub-optimal Networks: Network Competition, First-mover Advantage and Tipping.....	85
(iii) Switching Costs and Lock-ins.....	86
(iv) Compatibility and Standards.....	87
(v) High Fixed/Sunk Costs and Low Marginal Costs.....	89

(vi) Two-sided Platforms	91
(a) Economic Background of Two-sided Platforms	91
(b) Pricing.....	93
(c) Industrial Organisation of Two-sided Markets.....	94
C. Competition <i>in</i> the Market versus Competition <i>for</i> the Market: Applicability of Schumpeterian Competition to Characteristics of Competition in the ICT Industries.....	96
5. Analytical Framework, Market Definition and the Assessment of Market Power	99
I. Background.....	99
II. General Observations on EU Legal Framework and Competition Policy.....	100
A. Choice of the Welfare Standard Under EU Competition Policy	102
III. Appropriate Framework for Competition Analysis in the ICT Industries.....	103
A. Adequacy of Traditional (Static) Approach to Competition Analysis.....	103
B. Effects- versus Form-based Approach: the ‘First Principles’ Approach to Competition Analysis.....	105
C. Effects-based Approach: Per Se Rule versus the Rule of Reason.....	106
D. Preliminary Screening for Possible Anti-competitive Effects.....	107
E. Competitive Harm and Consumer Welfare.....	108
F. General Framework for Competition Assessment: Analysis of Existing EU Competition Policy	110
IV. Market Definition.....	115
A. General	115
B. Market Definition in the Context of ICT Industries.....	115
C. Some Specific Issues with the Role of Market Definition in the ICT Industries	117
(i) The SSNIP Test and ICT Industries	117
(ii) Concept of Innovation Markets	118
(iii) After-markets and ICT Industries.....	121
(iv) Market Definition: Analysis of Existing EU Competition Policy.....	122
V. Market Power.....	128
A. Market Power: Pricing Power and Exclusionary Power	128
B. Market Power in the Context of ICT Industries	129
C. Some Specific Issues with Existence of Market Power in the ICT Industries.....	130
(i) Market Share and Level of Concentration.....	130
(ii) Barriers to Expansion or Entry	131
D. Market Power: Analysis of Existing EU Competition Policy	133
6. Unilateral Exclusionary Conduct and ICT Network Industries	139
I. General Comments on Unilateral Exclusionary Conduct and Abuse of Market Power.....	139
II. Unilateral Exclusionary Conduct: Analysis of Existing EU Competition Policy.....	142

III. Predation.....	146
A. General	146
B. Predation and ICT Industries	147
(i) Legal Standard(s) for Predation in ICT Industries	147
(ii) Detection of Predation: Winner-Takes-(Almost)-All Markets versus Network Effects and Strategic Entry Deterrence.....	149
C. Predation: Analysis of Existing EU Competition Policy	151
IV. Tying and Bundling.....	159
A. General	159
B. Tying and Bundling and ICT Industries.....	161
C. Tying and Bundling: Analysis of Existing EU Competition Policy	162
V. Exclusive Dealing.....	170
A. General	170
B. Exclusive Dealing and ICT Industries.....	171
C. Exclusive Dealing: Analysis of Existing EU Competition Policy	173
VI. Refusal to Deal.....	176
A. General	176
B. Refusal to Deal and ICT Industries.....	179
(i) Duty to Deal: Equivalence of Physical Property and IPRs	179
(ii) Unilateral Compatibility Decisions, Interconnection and Mandating Access	180
C. Refusal to Deal: Analysis of Existing EU Competition Policy	183
7. Collective Behaviour and ICT Network Industries	193
I. General Comments on Horizontal Co-operation Among Direct Competitors.....	193
II. Co-operative Standard Setting.....	193
A. General	193
B. Costs and Benefits of Compatibility and Standard Setting.....	194
C. Abuse of the Standard Setting Process	196
D. Co-operative Standard Setting and Competition Policy.....	197
E. Co-operative Standard Setting: Analysis of Existing EU Competition Policy.....	198
III. Accumulation of IPRs: Cross-Licensing and Technology Pools.....	204
A. General	204
B. Accumulation of IPRs: Analysis of Existing EU Competition Policy	206
IV. Collaborative Arrangement: Research and Platform Joint Venture	210
A. General	210
B. Collaborative Arrangements: Analysis of Existing EU Competition Policy	212
8. Mergers and ICT Network Industries	217
I. General	217
II. Horizontal Mergers	219
A. Horizontal Mergers and Competition in the Market.....	219
B. Horizontal Mergers and Competition for the Market.....	221
C. Horizontal Mergers: Analysis of Existing EU Competition Policy	222
III. Non-Horizontal Mergers	228
A. General	228
B. Non-Horizontal Mergers: Analysis of Existing EU Competition Policy	230

9. Two-sided Platforms and Competitive Harm.....	237
I. General.....	237
II. Two-sided Platforms: Analysis of Existing EU Competition Policy.....	239
10. Conclusion and Outlook.....	244
<i>Bibliography</i>	249
