

CONTENTS

Chapter 1: MONEY page 10*It's fairy dust, but because we believe in it, it works*

What happened before there was money? • When did barter become popular? • Isn't barter an awkward way to trade? • How did traders get around that complication? • When did coins appear? • Who decides what money is? • When did paper money begin? • What did early Americans use for money? • How did we get to the dollar bill? • If it isn't backed by gold, what makes the dollar mighty? • When did checking accounts start? • Why did electronic money catch on? • Will paper money disappear? • Whatever happened to barter?

Chapter 2: BOOMS & BUSTS page 42*As smart as they are, the pros can't remove all the bone-rattling bumps*

What do the experts mean when they say the economy is doing well or is doing poorly? • What makes up the GDP? • What makes the GDP grow? • When is the economy booming? • Why is overheating bad? • What's productivity? • How does an overheated economy cool down? • Is that what causes a recession? • What is deflation? • How do you end a recession? • How long can a bust last?

Chapter 3: TAXING & SPENDING page 66*Policy makers often argue over which is a better steering wheel*

What is fiscal policy? • Who controls tax policy? • Where do taxes come from? • How come the rich get away without paying taxes? • What's a flat tax? • What's a consumption tax? • Who decides how to spend money? • How can government spending increase GDP and employment? • Does it work? • Can government cut taxes to speed up the economy? • Can government increase taxes to slow down the economy? • What's the bottom line? Are government spending and taxing good ways to fix a troubled economy?

Chapter 4: GETTING INTO DEBT page 92*It's been around from the beginning, but the cause has become more worrisome*

What's the difference between deficit and debt? • How can the U.S. spend more money than it takes in? • Should the government ever borrow? • When is borrowing wrong? • How much debt is too much? • How long can the U.S. get away with this? • Do we need a balanced budget amendment to the Constitution? • So how do we get out of this mess? • What are entitlements? • So will Social Security be eliminated?

Chapter 5: **THE FED** page 114

This very powerful institution performs a kind of magic

If the Federal Reserve can't prevent banking failures, who needs it? • So what does the Fed do? • What's monetary policy? • Why not just make as much money available as people want? • How does the Fed set monetary policy? • How does the Fed increase and decrease the amount of money available in the economy? • Where does the Fed get the money to buy bonds? • So the Fed doesn't print money? • How does the Fed destroy money? • But where does it go? • How does the Fed's buying bonds on Wall Street increase the amount of money in the pockets of ordinary consumers and businesses? • Does the Fed's selling government bonds on Wall Street decrease the amount of money in the pockets of ordinary consumers and businesses? • How does the Fed influence interest rates? • What's the Fed funds rate? • Does the Fed have any control over rates on longer loans, such as car loans and mortgages?

Chapter 6: **HIGH-FLYING FINANCE** page 174

The Wall Street elite can make the planet tremble

Who were the first financiers? • How did Wall Street and big-time finance get started? • How do big companies finance themselves today? • How do new high-tech companies get financed? • What caused the financial crisis of 2007–2009? • What is leverage? • How do you “short” a stock? • What are hedge funds? • What are private equity funds? • What are derivatives? • Why do derivatives have a bad name? • What's a speculative bubble?

Chapter 7: **GLOBALIZATION** page 202

Nowhere to hide: Everywhere is connected to everywhere else

What is globalization? • Can Americans own and operate companies overseas? • What are financial and capital flows? • Is globalization good or bad? • How does trade affect inflation? • What is the balance of trade? • Must a country be in balance with every trading partner? • What happens when a country runs a trade deficit? • What is the balance of payments? • Is it bad for a country when its currency is cheap? • Do countries manipulate currencies to keep them cheap? • What does the World Trade Organization do? • What's the World Bank? • What's the International Monetary Fund? • What is the G-20? • What is the World Economic Forum?
