

## INDEX

- Accenture, xi–xiii
- Access Database, as project tracking tool, 264
- Accountability
  - cost, 259–260
  - project, 47–48
- Active versus passive sources of customer data, 54
- Agility, enterprise. *See also* Speed
  - benefits of, 5, 19–20
  - overview, 175
- Alignment, corporate
  - analytics, 160–162
  - leadership, 151
  - PVC mapping and, 189
- Analysis, using data
  - benefits of, 97–98, 114–115
  - design of experiments (DOE), 109–114
  - measurement system analysis (MSA), 62–63
  - root cause, 107–109
  - to understand variation, 98–107
- Applied learning model, 292–295
- Assessment
  - change readiness, 248–250
  - complexity, 177–178, 182–194
  - operational excellence, 313–316
  - process ownership, 310–311
  - project selection, 217–226
  - value stream analysis (VSA), 293
- Asset management/utilization
  - and complexity issues, 180–181
  - and Return on Invested Capital, 141–143
- AVR Associates, xi
- Banking. *See* Service industries
- Batch sizes
  - optimization of, 169–173
  - affecting transportation costs, 28–29
- Belts, LSS
  - training, 284–285, 286–290, 292–297
  - types of, 264, 279
- Benchmarks
  - in complexity analysis, 184
  - for project selection, 233–234
- Benefit/effort matrix
  - for identifying Kaizen projects, 120–122
  - in complexity analysis, 184, 194
  - in project selection, 222–223, 225
- Best practices
  - at Owen-Illinois, 155
  - in service environments, 43
- Black Belts. *See* Belts, LSS
- Blended e-learning, 295–297
- Brainstorming, 107, 108
- Business value-add (BVA)
  - activities, 75

- Buy-in
  - building, 251–259
  - performance management and, 265
- Capability analysis. *See* Process capability analysis
- Capacity, business
  - excess, xv–xvi, 8–9
  - optimizing, 12
- Capacity, process
  - defined, 99
  - and variation analysis, 98–102
- Capital, waste of, 37
- Carter, Eric, 255
- Case studies
  - complexity analysis, 193–196
  - design of experiments (DOE), 111–114
  - enterprise flexibility, 173–175
  - Kaizen, 117–119
  - legacy Lean Six Sigma programs, 316–318
  - measurement system analysis (MSA), 62–63
  - root cause analysis, 107–109
  - skill-building, 288–289, 293–295
  - Tier 1 automotive supplier, 1–5, 169–170
  - transformation, 133–135, 146–151, 155–157
  - types of waste (TIMWOOD), 37–38
  - U.S. Navy, 6
  - value drivers, 243–245
  - value stream mapping, 65–67, 78–82
  - variation analysis, 97–98, 103
  - waste-related, 25–26, 37–38
- Cause-and-effect analysis, 107, 108
- CCRs. *See* Critical Customer Requirements (CCRs)
- Center of Excellence (CoE)
  - benefits of, 261–263, 279
  - fitting into strategic plan, 277–279
  - objectives of, 263–265
  - performance management and, 265–270
  - replication function, 270–272
  - structuring of, 274–277
- Change management
  - and cost accountability, 259
  - assessment, 248–250
  - benefits of, 247–248, 260
  - communication issues, 253–259
  - leadership challenges, 250–253
  - managing accountabilities, 260
- Charters, project, 49, 224–225
- Coaching
  - in applied learning model, 293
  - Six Sigma, 47
  - using external coaches, 284–285
  - value of, 150
- Communication
  - and change management, 253–259
  - importance of, 48–49
  - Kaizen-related, 127–128
  - of replicated results, 272
- Complexity
  - assessing, 177–178, 182–192
  - case studies, 193–196
