PART I

Introduction

Chapter 1

Introduction and Overview	3
<i>Michael B. Gerrard</i>	
Introduction	3
Projections of Future Climatic Conditions.	4
Temperature	5
Sea Level.	5
Droughts	6
Extreme Precipitation	6
Heat Waves and Wildfires	6
Anticipated Impacts of Projected Climatic Conditions	6
Water Supplies	6
Food Supply	7
Human Health	7
Coastal Conditions.	8
Infrastructure	8
Ecosystems	8
Economic Losses.	8
Ways to Respond to Anticipated Climate Conditions	9
Typologies of Responses	9
Evaluating Possible Responses	9
Unique Challenges in Responding to Climate Change.	10
The Legal Response and the Plan of This Book	11
Conclusion	15

Chapter 2

Adaptive Management 19

Robert L. Fischman and Jillian R. Rountree

The Fixed Nature of Environmental Law 20

 Substantive Standards..... 20

 Procedures 21

 Institutions 21

Climate Change and Flexibility 23

Information Needs 25

 Agency Demands 25

 Information Acquisition and Bridging..... 27

 Information Dissemination 28

Finding Flexibility: The Potential of Adaptive Management 29

 The Theory of Adaptive Management..... 30

 Adaptive Management Variations..... 31

The Limitations of Adaptive Management 33

 The Policy of Adaptive Management 33

 Adaptive Management in Practice..... 33

 Law versus Management 35

 International Law Challenges 42

Conclusion 43

PART II

U.S. Aspects

Chapter 3

Managing Water Supplies 51

Robert W. Adler

Introduction 51

Effect of Climate Change on Water Supplies 52

 Effects on U.S. Water Supply Quantity 52

 Effects on U.S. Water Supply Quality 53

 Effects on U.S. Water Supply Systems 54

Adaptation through Water Law, Policy, and Institutions 54

 Legal Allocation of Water Supplies 56

 Groundwater Allocation 59

 Institutional Responses to Changing Water Supply 66

 Physical Enhancement and Reallocation of Water Supplies..... 71

Relationship to Water Quality and Environmental Management..... 76

Conclusion 78

<i>Chapter 4</i>	
Managing Demand for Water	95
<i>Benjamin Houston and Noah D. Hall</i>	
Introduction	95
Climate Change and Managing Demand through Efficiency and Conservation	96
Thermoelectric Power Generation.	96
Agriculture	98
Nonagricultural Irrigation, and Commercial and Residential Uses	99
Water Demand Challenges and Water Conservation Opportunities.	101
Leakage in Municipal Water Distribution Systems	101
Shale Gas Extraction	104
Ethanol and Biofuel Production	106
Water Reuse and Storage	108
Disappearing Snowpack: Coping with Snow Shortages in the West	109
Policy and Legal Tools.	111
The Common Law: Riparianism and Prior Appropriation	111
Economic Incentives and Water Marketing	114
Urban Planning and Climate Change	117
Additional Recommendations and Adaptation Tools.	119
Unifying Groundwater Law	119
Conclusion	122
 <i>Chapter 5</i>	
Energy System Impacts	133
<i>Robin Kundis Craig</i>	
The Effect of Climate Change on Energy Demand	133
Climate Change's Direct Effects on Energy Demand.	134
Effects on Energy Demand as a Result of Adaptation Efforts in Other Sectors	138
Adaptation Implications for Energy Demand: Conservation and Restructured Electricity	140
The Effect of Climate Change on Energy Supply and Energy Infrastructure.	142
Mitigation Policy and the Use of Fossil Fuels	143
Increasing Temperatures and Energy Production.	143
Thermoelectric Power Plants and the Problem of Cooling Water	145
Hydroelectricity Production and the Problem of Water Flows.	149
Extreme Weather Events and Energy Supply.	151
Energy Facilities and Sea-Level Rise	154
Climate Change Effects on Alternative Energy Supplies	155

Adaptation Implications from Climate Change's Impacts on Energy Production.	157
The Need to Link Energy Policy and Water Policy in Adapting to Climate Change	159

Chapter 6

Infrastructure	173
---------------------------------	------------

Gregory E. Wannier

Introduction	173
Background.	173
Roads and Rail	176
Impacts to Infrastructure	176
Policy Options	176
Legal Programs.	177
Storm Water Systems and Other Flood Controls	185
Impacts to Infrastructure	185
Policy Options	186
Legal Programs.	186
Airports and Seaports	193
Impacts to Infrastructure	193
Policy Recommendations	194
Legal Programs.	194
Wastewater and Solid and Hazardous Waste Facilities	196
Impacts to Infrastructure	196
Policy Recommendations	197
Legal Programs.	197
Conclusion	199

Chapter 7

Buildings	209
----------------------------	------------

J. Cullen Howe

Introduction	209
Land Use Techniques to Address Peak Energy Demand and Sea-Level Rise	210
Using Building Energy Codes to Reduce Peak Energy Demand.	210
Instituting Zoning Controls to Address Sea-Level Rise	213
Onsite Water and Storm Water Management	215
Increasing Water Efficiency in Buildings	215
Onsite Wastewater and Storm Water Management.	217
Ventilation and Cooling of Buildings.	219
Reducing the Heat Island Effect	219
Passive Cooling Techniques.	220

Design and Construction to Foster Climate Resilience	221
Mitigating Severe Wind and Rain Damage	222
Mitigating Flood Damage	223
Challenges and Opportunities Posed by Older and Historic Buildings	224
Advantages of Historic Buildings	224
Historic Buildings and Energy Codes	224
Architects' and Engineers' Liability for Failure to Address Future Climate Conditions	225
Applicable Ethical and Professional Standards of Care	225
Case Law Concerning Liability of Architects/Engineers	226
Conclusion	228
 <i>Chapter 8</i>	
Protecting the Coast	235
<i>Robert R.M. Verchick and Joel D. Scheraga</i>	
Overview	235
Guiding Principles	237
Taxonomy of Adaptation Strategies	239
Resistance: It's Not Always Futile	240
Hard Armoring (Artificial Infrastructure)	240
Soft Armoring (Natural Infrastructure)	250
Adjustment	256
An Overview	256
An Example: Saltwater Intrusion	256
Conclusion	258
 <i>Chapter 9</i>	
Coastal Retreat Measures	267
<i>J. Peter Byrne and Jessica Grannis</i>	
Statement of the Problem	267
Introduction to Retreat	268
Defining Retreat	268
Considerations and Barriers to Implementing Retreat	270
Legal Techniques for Retreat	270
Planning	271
Regulation	272
Capital Investments	281
Market-Based and Tax Incentives	286
Federal Role	289
Coastal Zone Management Act	289
National Flood Insurance Program	291

Coastal Barrier Resources Act	292
Federal Highways	293
Financing of Retreat	293
Federal Programs	293
State and Local Funding Mechanisms	294
Liability Issues	295
Conclusion	296

Chapter 10

Species and Ecosystem Impacts 307

Patrick Parenteau

Introduction	307
Ecosystems and Species at Risk	307
The Arctic	308
Oceans and Coastal Ecosystems	309
High-Elevation Ecosystems	310
Dryland Ecosystems	312
Coldwater Fisheries	313
Concepts of Ecosystem Adaptation and Sustainability	314
Resilience	314
Restoration	315
Connectivity	316
Assisted Migration and Colonization	317
Adaptive Management	318
Federal Law	319
The Endangered Species Act	319
The Marine Mammal Protection Act	331
The Clean Water Act and Ocean Acidification	332
State Wildlife Action Plans	333
Invasive Species	334
Water Resources and the Public Trust Doctrine	336
Conclusion	337

Chapter 11

Agriculture and Forestry 351

Debra L. Donahue

Agriculture and Forest Resources in the United States	351
Climate Change Impacts	352
Agriculture	352
Forests	353
Common Impacts and Considerations	354

A Common Framework for Adaptation	
in Agriculture and Forestry	354
Fundamental Ecological Concepts	355
Planning for Adaptation in Agriculture and Forestry	356
Adaptation Measures and Institutional Resources Applicable	
to Agriculture and Forestry	358
Information, Research, and Technical Assistance	358
Economic Incentives	360
Land Use Controls and Environmental Regulation	370
Adaptation Considerations Specific to Agriculture	373
Conventional versus Ecologically Based Agriculture	373
Agricultural Practices	374
Farm Safety Net	377
Regulation	381
Adaptation Considerations Specific to Forestry	383
Conserving Forestlands	383
Regulation and Land Use Planning	385
Fire: Agent of Natural Disturbance and Unnatural Destruction	388
Maladaptive Actions and Programs	394
Farm Bill Programs	394
Biofuel Subsidies: Corn Ethanol	394
“Healthy Forest” Policies	395
Subsidies for Development in WUI	397
Public Land Livestock Grazing	398
Conclusion	399

Chapter 12

Governance of Public Lands, Public Agencies, and Natural Resources	441
<i>Robert L. Glicksman</i>	
Introduction	441
The Effects of Climate Change on Public Lands and Resources	442
Changes in the Hydrological Cycle	442
Rising Sea Levels	443
Effects on Plant Life and Ecosystems	443
Effects on Wildlife	444
Recreational and Cultural Effects	445
The Need for Federal Adaptation Planning	446
The Adaptation Policy Vacuum	446
The Initiation of a Coordinated Federal Adaptation Framework	447
Adaptation Initiatives and Federal Lands	449
Cross-Cutting Statutory Authority	449
Agency-Specific Authority and Programs	452

The Future of Adaptation and Natural Resource Management	465
Institutional Challenges to Effective Adaptation	465
Geographic and Jurisdictional Challenges to Effective Adaptation.	466
Conclusion	468

Chapter 13

Domestic Disaster Preparedness and Response 481

Victor B. Flatt

Disaster Preparedness and Response in Light of Climate Change	481
Federal Laws of Disaster Preparedness and Response	482
Background and History	482
Current Federal Framework	483
Proposals for Change	490
Long-Term Recovery	491
State and Local Laws in Disaster Preparedness and Recovery	492
Laws Governing Specific Aspects of Disaster Preparedness and Response	494
Warning and Evacuation Systems	494
Maintenance and Restoration of Communication Systems	494
Particular Assistance to Vulnerable Populations	495
The Role of Volunteers—Volunteer Liability	495
Medical Treatment	496
Provision for Public Health and Services in Nonfunctioning Post-Disaster Systems	497
Model State Emergency Health Powers Act	498
Military Assistance	499
Assistance with Restoration and Reconstruction of Private Infrastructure and Markets	499
Role of Local Planning, and Relation to State and Federal Laws	500
Conclusion	500

Chapter 14

Insurance. 511

Sean B. Hecht

Introduction to the Insurance Industry	511
The Insurance Industry’s Influence and Role in Risk Management	511
Insurability	512
Climate Change, Catastrophe, and Insurance	513
Insurance and Catastrophes	513
Climate Change and Insurability.	514

Insurance's Relationship to Climate Resilience	515
Insurance, Loss Prevention, and Climate Resilience	515
Insurance, Land Use Planning, and Climate Resilience	517
Insurance and Resource Sustainability Infrastructure	519
The Potential Interaction between Specific Insurance Lines and Climate Change Adaptation	520
Private Insurance	520
State-Managed Residual Insurance	526
Federally Underwritten Insurance	527
Conclusion	534

Chapter 15

Impact Review, Disclosure, and Planning 543

Katrina Fischer Kuh

Introduction	543
The Legal Authority for Adaptation Review	544
The National Environmental Policy Act	544
State Environmental Review	548
Guidance	550
Managing Uncertainty, Temporal and Geographic Considerations, and Other Implementation Approaches	552
Managing Uncertainty	552
Temporal and Geographic Considerations	554
Review of Specific Strategies Employed in Select Environmental Review Documents	555
Private Disclosure	556
Adaptation Disclosure under Securities Laws	556
Shareholder Proposals, Voluntary Disclosure Programs, and Adaptation Due Diligence	558
Conclusion	559

Chapter 16

State and Local Adaptation 569

Vicki Arroyo and Terri Cruce

Adaptation and Federalism	569
Challenges to Federal-State Cooperation	570
Opportunities for State-Federal Cooperation	571
Beyond Federalism: Horizontal Coordination	573
State Adaptation Planning	574
State Adaptation Plan Components	574
Plan Origins and Authorities	576

Plan Recommendations for New Authorities	579
Single-Sector Adaptation Plans	579
State Efforts to Assist Local Governments	581
Mainstreaming State Adaptation	583
Local Adaptation Planning	585
Mainstreaming at the Local Level.	586
Coordination Required.	588
Programs That Support Local Government Adaptation Planning	588
Additional Adaptation Resources for States and Localities	590
Conclusion	593

PART III

International Aspects

Chapter 17

The International Legal Framework for Adaptation	603
<i>David Freestone</i>	
The Intergovernmental Panel on Climate Change	604
The Evolution of the UNFCCC Regime on Adaptation	604
The UN Framework Convention Text.	604
The Kyoto Protocol	606
Marrakesh and COP Decision 5/CP.7	607
Guidelines for the Preparation of NAFAs and the Establishment of the LDC Expert Group	607
Buenos Aires Programme of Work on Adaptation and Response Measures (Buenos Aires Programme)	608
Nairobi Work Programme on Impacts, Vulnerability, and Adaptation to Climate Change (Nairobi Work Programme)	608
Bali Action Plan	608
Copenhagen	609
The Cancun Adaptation Framework	610
Implementation of Adaptation: A Survey of International Organization Programs	611
FAO and Adaptive Forest Management	611
UNEP Adaptation Knowledge Platform	612
The GEF and National Adaptation Programmes of Action (NAPAs)	612
World Bank and the Economics of Adaptation to Climate Change Study (EACC)	613
The EU and Adaptation	615
Conclusion	616

<i>Chapter 18</i>	
Financing of Adaptation Measures	623
<i>Deepa Badrinarayana</i>	
Introduction	623
International Agreements and Resolutions	
on Adaptation Funding	625
The Framework of Obligations on Adaptation Funding	625
Establishment of Funds and Specific Financial Mechanisms	
for Adaptation	627
Adaptation Finance Framework Post-Kyoto in COP15, COP16,	
and COP17: The Green Climate Fund	630
Other Sources of Funding	634
Multilateral Development Bank Funding	634
Bilateral and Multilateral Initiatives of Governments	
to Assist National Programs	636
The Role of UN Organizations and Agencies	
in Adaptation Funding	637
Special Types of Funding: Insurance and Weather Derivatives	
and General Disaster Response Funding	637
Challenges to Adaptation Funding	639
Basis for Calculating Financial Estimates for Adaptation	639
Basis for Allocating Funds and Access to Funds	640
Diversion of Funds	641
Generation and Disbursement of Committed Funds	642
Administration of Funds: Transparency and Accounting Concerns	644
Conclusion	646
 <i>Chapter 19</i>	
Global Health and Disaster Preparedness	659
<i>Lindsay F. Wiley</i>	
The Human Impact: Disaster Preparedness and Global Health	
as Priorities for Adaptation	659
International Legal Frameworks	661
Disaster Management	661
Public Health Emergency Preparedness and Response	667
Routine Public Health Needs	671
Domestic Legal Frameworks	674
Disaster Preparedness and Response	675
Public Health Emergency Preparedness and Routine	
Public Health Needs	678
Conclusion: Challenges and Opportunities	679

Chapter 20

Population Displacement, Relocation, and Migration 693

Michelle Leighton

Introduction 693

Areas Where Populations Are Most Vulnerable 694

Government Recognition and Response to Migration
in Adaptation 696

Migration as a Failure of Adaptation or an Adaptive Strategy 697

Treatment of Migration in NAPAs and Preventative Measures 698

Internally Displaced Persons 698

Government Resettlement of Affected Populations 701

Moving across Borders in Search of Alternative Livelihoods 704

Slow-Onset and Drought-Related Disaster Migrants 704

Rapid-Onset Disaster Migrants 707

Sea-Level Rise and Migrants 709

Liberalizing Immigration to Protect Climate Change–
Related Migrants 710

Modifying Labor Agreements to Promote Development and Adaptation . . . 710

New Status of Protection 712

Finding Alternative Homelands and the Issue of Statehood 713

Conclusion 718

Chapter 21

Maritime Jurisdiction in a Changing Climate 731

Kate Purcell

Background: Sources of the Law of the Sea 735

Geographical Change in the Law of the Sea:
Conceptualizing the Threat of Climate Change 736

Maritime Baselines and Zonal Limits 737

The Ambulatory Baselines Thesis 737

Variations on the Ambulatory Baselines Thesis:
Automatic Adjustment or an Obligation to Adjust 738

Problems and a Reinterpretation 739

Geographic Features as a Basis of Entitlement to Maritime Zones 751

Islands Including “Rocks” 751

Low-Tide Elevations 753

Archipelagic States and Archipelagic Waters 754

International Maritime Boundaries 755

Geographical Circumstances in the Delimitation
of Maritime Boundaries 755

Between Process and Product 756

Ambulatory Maritime Boundaries 756

Termination of or Withdrawal from a Boundary Agreement	757
The Survival of Boundaries beyond an Agreement	759
Conclusion	759

Chapter 22

International Water Law and Adaptation	771
---	------------

A. Dan Tarlock

Introduction: International Climate Change Scenarios, Adaptation Strategies, and Reasons to Care	771
International Water Law	772
Sources: Custom and Treaty	772
International Court of Justice Precedents	775
Selected International Examples of Possible Adaptation Strategies	776
The Extreme Drought Provision of the 1944 Water Treaty between Mexico and the United States	776
The Great Lakes: Preservation of the Status Quo to Prevent Adverse Impacts of Climate Change	777
Transboundary Implications of Glacial Melt and Desalination	778
Glacial Melt	778
Desalination	779
International Water Law and Climate Change: An Assessment	780
Disincentives for Adaptation.	780
Adaptation Incentives: Toward a Hydrocommons	783
Conclusion	784

Chapter 23

Food Security, Fisheries, and Ecosystems	791
---	------------

Cinnamon Carlarne and Josh Eagle

Introduction	791
Climate Adaptation and Food Security	791
Introduction to Food Security.	792
Traditional Threats to Food Security	794
Climate-Related Threats to Food Security.	795
Existing Governance Structure and Adaptation Tools.	797
Climate Adaptation and Fisheries	801
Introduction	801
Fisheries and the Adaptive Capacity of Existing Institutions.	801
Social and Economic Obstacles to Adaptation	802
Climate Change Impacts on Fisheries	803
Quantitatively or Qualitatively Different Impacts?	804
Other International Marine Conservation Issues.	806
Conclusion	807

<i>Chapter 24</i>	
Legal Rights and Remedies	815
<i>Maxine Burkett</i>	
Introduction	815
Human Rights Theories and Obligations.	816
An Overview	816
Relevant Instruments and Dispute Resolution Mechanisms	819
Action in U.S. Domestic Courts—Alien Tort Statute	822
Tort Theories.	823
An Overview	823
Jurisdictional Hurdles—Political Question Doctrine and Standing	824
Public Nuisance Claims	824
Claims under Negligence Theory	827
The Challenge of Causation	828
Remedies under the United Nations Convention on the Law of the Sea.	829
An Overview	829
Provisions Relevant to Climate Change Adaptation	830
Straddling Fish Stocks Agreement.	831
Appropriate Fora and Potential Barriers.	831
Other Legal Theories.	832
Claims Brought before the International Court of Justice	832
International Trade Remedies	833
Remedies Available through International Financial Institutions.	834
The Public Trust Doctrine and U.S. Domestic Law	834
Conclusion: The Value of Available Remedies	834
 <i>Chapter 25</i>	
Human Security and Military Preparedness.	847
<i>Linda Malone</i>	
Introduction	847
Identification of Risks.	848
Vulnerability of Military Facilities, Personnel, and Infrastructure	849
The Arctic—A Special Case.	853
Emerging Security Issues	853
International Mechanisms for the Arctic.	859
International Mechanisms, Climate Change, and National Security.	861
Conclusion	862
Table of Cases	869
Index.	875
