Preface	xxi
Acknowledgments	xxiii
About the Editors	xxv
About the Contributors	xxvii
List of Abbreviations and Measurements	xxxvii

Chapter One

Introduction to the Clean Air Act: History, Perspective, and Direction for the Future	1
<i>Michael R. Barr</i>	
Overview	1
More History of the CAA	5
Directions for the Future	9

Chapter Two

Setting National Ambient Air Quality Standards	13
<i>Richard E. Ayres and Jessica L. Olson</i>	
The Role of the National Ambient Air Quality Standards	13
Statutory Requirements for Establishment of Air Quality Standards	14
Requirements for Listing Pollutants	14
Requirements for Publishing Air Quality “Criteria”	15
Requirements for Establishing NAAQS for Each Criteria Pollutant	15
The 1997 NAAQS Revisions and Subsequent Litigation	18
The NAAQS Review Process	20
The Scientific Assessment Phase	20
The Regulatory Development Phase	22
The Implementation Assessment Phase	22
Expediting the NAAQS Review Process	23
Ozone and Photochemical Oxidants	23
Rationale for Control of Tropospheric Ozone	23
A History of Ozone Regulation	24
Particulate Matter	27
Rationale for Controlling Particulate Matter	27
A History of Particulate Regulation	28
Sulfur Oxides	31
Rationale for Control of Sulfur Oxides	31
A History of Sulfur Oxide Regulation	32

Nitrogen Dioxide	34
Rationale for Regulation of Nitrogen Dioxide	34
A History of Nitrogen Dioxide Regulation	34
Lead	35
Rationale for Controlling Lead	35
A History of Airborne Lead Regulation	36
Carbon Monoxide	37
Rationale for Regulating Carbon Monoxide	37
A History of Carbon Monoxide Regulation	37
Conclusion	38

Chapter Three

Meeting Ambient Air Standards: Development of the State Implementation Plans 43

Alec C. Zaccaroli

Introduction	43
Air Quality Control Regions: Classification of Areas	43
Designation of AQCRs	43
Redesignation of AQCRs	44
Interstate Transport Regions and Commissions	44
Designation and Redesignation of AQCRs According to Attainment Status	44
Designation	44
Redesignation	45
SIP Framework and Procedures	46
Basic Elements of SIPs	46
Federalism Impact on SIPs	48
Four Approvability Principles of SIPs	48
Nonattainment SIPs: RACT	49
EPA's SIP Review Process	52
Economic Incentive Programs	54
SIP Requirements for Attainment and Unclassified Areas	55
Requirements for Ozone Nonattainment SIPs	55
The <i>American Trucking</i> Decision	55
President's Implementation Plan for Revised Ozone and PM Standards	56
EPA Implementation of the Revised Eight-Hour Ozone Standard	57
Requirements for Nonattainment Areas	58
Marginal Areas	58
Moderate Areas	60
Serious Areas	62
Severe Areas	63

Extreme Areas	64
Nonattainment Plan Requirements for NO _x Sources.	65
Particulate Matter Nonattainment Plan Requirements	66
Regional Haze Regulations.	69
Sulfur Dioxide Nonattainment Area Plans	70
Nitrogen Dioxide Nonattainment Area Plans	71
Lead Nonattainment Area Plans.	72
Nonattainment Plans for GHG Sources	72
<i>Chapter Four</i>	
Transportation and Conformity Requirements in State Implementation Plans . . .	79
<i>Monica Derbes Gibson</i>	
Introduction	79
Transportation-Related SIP Requirements.	80
Inspection and Maintenance Programs	80
Transportation Controls	83
Limits on Land Use Authority	86
Funding Transportation Control Measures	87
Conformity under the Clean Air Act: Overview	88
Conformity under the 1990 CAA Amendment	89
Conformity under the 1997 Transportation Conformity Rule Amendments	89
The Transportation Conformity Rule	90
Scope of the Transportation Conformity Rule	90
Assessing the Conformity of Transportation Actions	92
Transportation Conformity Determinations—General Information	92
Specific Statutory Criteria	93
Regulatory Criteria for All Plans, Programs, and Projects.	94
Regulatory Criteria for Projects from a Conforming Plan and TIP	96
Regulatory Criteria for Projects Not from a Conforming Plan and TIP	96
General Conformity	96
Overview	96
Scope of the General Conformity Rule	96
General Conformity Determinations—Procedures	100
General Conformity Determinations—Analysis	102
Enforcement and Sanctions	103
Challenging SIP Revisions.	103
Challenging Conformity Determinations	104

Chapter Five

Interstate Transport and Regional Implementation Plans 111
Philip E. Karmel

Introduction 111

The Need for Regional Planning 111

The Statutory Framework 112

 Transport Commissions 112

 The Good Neighbor Provision 113

The NO_x Budget Program 114

The NO_x SIP Call 115

The Clean Air Interstate Rule 117

EPA's Proposed Transport Rule 118

Conclusion 122

Chapter Six

The New Source Review Program 125
Bernard F. Hawkins Jr. and Mary Ellen Ternes

Introduction 125

 Amendments to the NSR Program 127

 Additional Amendments to the NSR Program 131

 Pending Proposed Amendments to the NSR Program 132

 Greenhouse Gas Regulation under the NSR Program 133

General Framework of the NSR Program 136

 The NSR Program's General Focus 136

 Pathways for NSR Permit Review 137

 Permits Required 138

 Overview of the Application and Permit Process 138

 Existing Guidance on the NSR Process 139

Prevention of Significant Deterioration Review Pathway 140

 Introduction 140

 Timing of Permitting Analysis 140

 Applicability to New Sources 141

 Applicability to Major Modifications 146

Plantwide Applicability Limits 156

 Permit Application Requirements 156

 Determination of PAL Level 157

 Effective Period of PAL and Expiration 157

 Increasing PAL Levels 158

 Unilateral Adjustment of PAL during Effective Period 158

 Impact of PAL on Previously Enforceable Limitations 158

Compliance Demonstration Requirements	158
PAL and Title V	159
Determining What Pollutants Must Be Analyzed under the PSD Pathway	159
Preparing the Permit Application	159
The Process.	159
BACT Determination	160
Ambient Air Quality Impacts Analysis	168
Additional Impacts Analysis	173
Class I Area Impacts Analysis	174
Processing the Permit Application.	177
Nonattainment Area Applicability Program	180
Differences between the PSD and Nonattainment Area Applicability Permit Review Pathways.	180
Definition of Stationary Source.	180
Major Source Thresholds	181
Applicability to Pollutants	182
Applicability to Major Modifications	182
Lowest Achievable Emission Rate Determination	182
Emissions Offsets: Process and Goals	183
Compliance Certification for Other Sources Operating in the Permit State	184
Conclusion	184
 <i>Chapter Seven</i>	
The Visibility Protection Program	201
<i>M. Lea Anderson</i>	
Overview.	201
Areas Protected under the Visibility Program: Mandatory Class I Federal Areas	202
Section 169A of the Clean Air Act: Statutory Framework for Implementation of Visibility Protection	203
EPA's 1980 Visibility Protection Regulations.	204
Clean Air Act Amendments of 1990 Propel Regional Haze Regulations: Overview of Section 169B and Its Relation to Section 169A	209
The 1999 Regional Haze Rule and Implementation Program	211
Legal Challenges to the Regional Haze Rule.	215
Alternatives to BART and the Western Backstop Market Trading Program	216
The BART Guidelines and EPA's Response to the BART Remand.	219
State Implementation of the Regional Haze Rules.	223

<i>Chapter Eight</i>	
Hazardous Air Pollutants	231
<i>Robert J. Martineau Jr. and Ben Snowden</i>	
Introduction	231
Historical Background	231
Congressional Reaction.	233
The MACT Standards: Applicability.	234
Overview	234
Listing of Hazardous Air Pollutants	236
Definition of Major Source and Area Source	238
Source Category Listings	243
Technology-Based MACT Standards.	247
The Standards-Setting Process	248
Area Source Standards and the Urban Air Toxics Strategy	256
Revisions to Technology-Based Standards.	259
Case-by-Case MACT	260
Section 112(g): Title V and New-Source MACT.	260
The Section 112(g) Rule	261
Section 112(j): The MACT Hammer.	262
Application of Section 112(j) to Vacated MACT Standards	264
Delegation of the MACT Program to States	265
Emissions Averaging, Pollution Prevention, and Work Practice Standards.	266
Compliance Issues	267
Compliance Deadlines	268
The Early Reductions Program.	269
Preconstruction Review Provisions	270
Start-up, Shutdown, and Malfunction Provisions	271
Beyond the MACT Standards	273
Residual Risk Analysis	274
Risk Assessment and Analysis Methodology.	275
Risk and Technology Review	276
Mercury and Regulation of Utility Mercury Emissions.	277
Great Waters Study.	279
The Section 112(r) Accidental Release Program	280
Overview of CAA Section 112(r)	281
EPA's List of Regulated Substances and Thresholds	284
EPA's Risk Management Plan Rules	285
Other Section 112(r) Provisions	290
Appendix 1: National Emission Standards for Hazardous Air Pollutants (NESHAP).	292

Appendix 2: Area Source MACT/GACT Standards	304
Appendix 3: Residual Risk and Technology Review	307
 <i>Chapter Nine</i>	
New Source Performance Standards	321
<i>Robert J. Martineau Jr. and Michael K. Stagg</i>	
Introduction	321
Applicability of the NSPS Program	324
Stationary Source and Affected Facility.	324
Listing of Source Categories	324
Regulation of New Sources.	325
Control of Existing Sources	326
Setting the Performance Standard	328
Best Demonstrated Technology Standards	328
Work Practice Standards.	330
Innovative-Technology Waivers	330
Guidelines for Existing Sources under Section 111	330
Scope of Regulatory Authority	331
Implementation Mechanism to Control Existing Sources	331
Implementation of Section 111	332
Notification of Construction and Start-up	332
Delegation of Authority to Implement the Program	333
Solid Waste Combustion and Section 129	333
Background	333
The 1990 CAA Amendments and 1995 MWC Regulations	334
The MACT Standards	336
Large Municipal Waste Combusters	337
Small Municipal Waste Combusters	338
Non-MWC Solid Waste Combustion	338
Medical Waste Incineration	338
Industrial and Commercial Waste Incineration	339
Other Solid Waste Incineration.	339
Requirements Applicable to All Solid Waste Incineration Units.	340
Permits	340
Operator Training.	340
Monitoring, Reporting, and Record Keeping	340
Residual Risk Analysis	341
Appendix: EPA New Source Performance Standards	342

<i>Chapter Ten</i>	
Regulation of Mobile Sources: Motor Vehicles, Nonroad Engines, and Aircraft.	351
<i>Michael J. Horowitz</i>	
Introduction	351
Historical Development.	352
Early Motor Vehicle Control Legislation	352
The 1970 Clean Air Act	353
The 1977 CAA Amendments	354
The 1990 CAA Amendments	355
Regulatory Programs.	356
Light-Duty Vehicles and Light-Duty Trucks	356
Emission Standards for Heavy-Duty Vehicles and Engines	363
Emission Standards for Nonroad Sources	366
Compliance and Enforcement Programs	369
Aircraft.	371
Preemption	371
 <i>Chapter Eleven</i>	
Regulation of Fuels and Fuel Additives	381
<i>Jonathan S. Martel</i>	
Introduction	381
Conceptual Overview of Programs	382
Historical Development.	383
Explanation of Regulatory Programs	388
Information Programs	388
New Fuels and Additives: “Substantially Similar” and Waivers	393
General Authority to Regulate Fuels and Fuel Additives.	398
Reformulated Gasoline	415
Detergent Additives	429
Oxygenated Gasoline	431
Renewable Fuels.	435
Penalties Provisions	436
Outlook	438
 <i>Chapter Twelve</i>	
The Acid Rain Program	449
<i>Debra J. Jezouit</i>	
Overview.	449
Sulfur Dioxide Program	451
Statutory Provisions	451
Regulatory Provisions.	456

Nitrogen Oxides Program	461
Statutory Provisions	461
Regulatory Provisions	462
Permitting, Monitoring, and Enforcement Provisions	465
Permits	465
Monitoring	467
Excess Emissions Penalty	468
Administrative Appeals Rule	468
Success of the Acid Rain Program and Its Future	469

Chapter Thirteen

Stratospheric Ozone Protection	473
<i>Diane E. McConkey and Peter H. Wyckoff</i>	
Introduction	473
International Agreements and Conventions	474
The Vienna Convention	474
The Montreal Protocol	474
Early Domestic Action	481
Title VI of the 1990 CAA Amendments	481
General Information	481
Production and Consumption Phaseout	482
Labeling	488
Safe Alternatives Policy: EPA's SNAP Program	492
Recycling and Emissions Reduction	494
Motor Vehicle Air Conditioners	497
Ban on Nonessential Products with Ozone-Depleting Substances	499
Federal Procurement	502
Enforcement	502

Chapter Fourteen

The Clean Air Act and Global Climate Change	521
<i>Kyle Danish, Tomás Carbonell, and Kevin Gallagher</i>	
Introduction	521
Laying the Foundations for Regulation of GHGs under the Clean Air Act	522
Massachusetts v. EPA	522
Endangerment Finding	524
California's GHG Emission Standards for Motor Vehicles	525
Regulation of GHGs from Stationary Sources under the Prevention of Significant Deterioration and Title V Programs	529
Mandatory Reporting Rule	534
Issues and Options for Further Regulation under the CAA	534
New Source Performance Standards	535
National Ambient Air Quality Standards	540

Regulation under CAA Title II	542
Actions in the Courts and Congress Affecting EPA Regulation under the Act . . .	544
Judicial Branch: Challenges to EPA’s GHG Rulemakings	544
Judicial Branch: Nuisance Suits	545
Congress: Initiatives to Enact Comprehensive Cap-and-Trade Legislation . .	546
Congress: Initiatives to Limit EPA Regulation under the Act	547
Conclusion	548

Chapter Fifteen

Overview of the Title V Operating Permit Program	557
---	------------

Angela R. Morrison

Introduction	557
Goals of the Title V Permit Program	559
Applicability	559
Definition of Major Source	560
Potential to Emit and Synthetic Minors	561
EPA Guidance on Potential to Emit	561
Permanent Exemptions and Deferral for Nonmajor Sources	562
Applicable Requirements	563
State Permit Programs and EPA Review of Programs	564
State Program Requirements	564
EPA Review of State Programs	565
Partial and Interim Approvals	566
Permit Applications	567
Timely and Complete Applications	567
Content of Applications	568
Insignificant Activities and Emission Units	568
Compliance Plans, Schedules, and Certifications	569
Permit Content	570
Permit Terms	570
Equivalency Determinations and Alternative Scenarios	572
General Permits	573
The Permit Shield	573
Permit Issuance, Judicial Review, Renewals, and Reopenings	575
Provisions Affecting a Source’s Operational Flexibility	575
Section 502(b)(10) Operational Flexibility Changes	576
Off-Permit Changes	577
Minor Permit Modifications and Other Permit Revisions	578
The August 1995 Supplemental Proposal	579
Permit Review and EPA Oversight over State Programs	580
Review of Permits by EPA and Neighboring States	580

EPA Oversight over State Permit Programs	580
Permit Fees	581
Requirement for Fee Demonstration.	581
Two Program Support Tests	581
Title V Task Force.	582
Conclusion	582

Chapter Sixteen

Managing Your Title V Permit	591
<i>Shannon Broome, Charles H. Knauss, and Matthew D. Raeburn</i>	
Introduction	591
Considering a Permit Appeal.	592
Meeting Appeal Deadlines	593
Permit Terms to Consider Appealing	594
Legitimacy and Stringency of Additional State-Imposed Monitoring and Testing Requirements	595
Citizen Petitions Seeking EPA Objections to New or Renewal Title V Permits.	597
How the Permit Objection Process Works	597
Judicial Interpretations of the CAA’s Permit Objection Provision and Policy Implications for Facilities	598
What a Facility Can Do if a Petition for Objection Is Filed with EPA Regarding Its Permit.	600
Special Considerations Related to Title V Deviation Reports, Semiannual Reports of Required Monitoring, and Compliance Certifications.	600
Regulatory Provisions Related to Deviation Reporting.	601
Determining Whether a Reportable Deviation Has Occurred	602
Determining Whether to Certify “Continuous” or “Intermittent” Compliance	603
Preparing to Sign the Certification	604
Potential Title V Application Requirements and Permit Terms Related to Greenhouse Gases	605
Conclusion	606

Chapter Seventeen

Civil Enforcement	611
<i>Julie R. Domike, Alec C. Zaccaroli, and Ben Snowden</i>	
Introduction	611
Investigatory Authorities.	612
Inspection, Monitoring, and Information-Gathering Authority.	612
Administrative Subpoena Authority	616

The Good-Faith Defense to Penalties for Refusal of Subpoenas and Information Requests	617
Monitoring, Record-Keeping, and Reporting Requirements	618
The Credible Evidence Rule	618
Operating Permits.	619
Greenhouse Gas Reporting	619
Enforcement Authority	620
National Enforcement Initiatives	621
High Priority Violations	621
System-Wide and Sector-Based Litigation and Settlement	622
Enforcement Responses.	623
Administrative Enforcement Options	623
The Federal Procurement Bar	628
Judicial Enforcement Actions	629
Penalties	633
The Role of Self-Policing, Self-Disclosure of Violations, and Privileges	637
Audit Privilege Laws.	637
EPA's Audit Policy.	638
The Role of Citizens in CAA Enforcement	642
Pre-suit Matters: Notice and Jurisdiction	643
Proof of Violation.	644
Remedies	644
Nonoperative Enforcement Provisions	645
Stationary Source Noncompliance Penalty Assessment Actions	645
Field Citations	646
Citizen Awards	646
 <i>Chapter Eighteen</i>	
Criminal Enforcement	665
<i>Robert Brager, Laura McAfee, and Heidi Knight</i>	
Introduction	665
Knowing Violations of CAA Requirements.	666
Knowingly False Statements and Failure to Pay Fees.	668
Knowing, Endangering Releases of Hazardous Air Pollutants.	669
Negligent Releases.	670
The Rule of Lenity and the Fair Notice Principle.	670
 <i>Chapter Nineteen</i>	
Implementation of Clean Air Act Programs by American Indian Tribes	675
<i>Jill E. Grant</i>	
CAA "Treatment as a State"	676
Requirements for TAS under Section 301(d).	676

Comparison with TAS Provisions in Other Statutes	677
Grant Provisions	678
The CAA “Tribal Authority Rule”	678
Background of the Rulemaking	678
Main Provisions of the TAR	678
Major Issues Raised by the TAR	679
Streamlining the TAS Application Process	682
2008 TAS Strategy	683
Environmental Program Grants	683
CAA Program Implementation	684
Filling the Regulatory Void	685
EPA Strategy to Address Permitting on Reservations and Fill Gaps in Program Implementation	685
Federal Implementation Plans	686
Delegated Federal Programs	686
Additional Strategies	687
 <i>Chapter Twenty</i>	
Rulemaking and Judicial Review under the Clean Air Act	695
<i>William F. Pedersen</i>	
Introduction	695
EPA Rulemaking Procedures	696
Section 307(d)	696
EPA Rulemaking beyond Section 307(d)	697
Judicial Review	699
Where to File	699
When to File	700
Stays	702
Substantive Judicial Review	702
The Requirements of Section 307(b)	702
The Case Law on CAA Judicial Review	703
Suits to Compel Agency Action	705
Deadline Suits	706
Unreasonable Delay	707
Conclusion	707
 Appendix: Air-Related Websites	713
Index	717
