Team Performance Inventory

Organizations have seen a significant movement away from individual role-based structures to cooperative team-based structures. Statistics show a dramatic increase in teaming and collaboration in the workplace. Understanding the behaviors that drive performance or impede performance is essential in today's organizations.

When you and other members of your team complete this *Team Performance Inventory* (TPI), the results will provide a current view of where your team is on a performance curve, where you need to be to become a high-performing team, and what development activities will help you get there.

This assessment is to help you assess your team's performance and determine in what stage your team normally or enates. The TPI consists of forty characteristics of a team and its members. You will note that the assessment questions are in both negative and positive formats. Please take time to read and, if necessary, re-read the questions before responding.

Scoring for Individual Assessments

To score the assessment, complete the following worksheet. Using your completed questionnaire, calculate the scoring as follows:

Begin with the category "I."

Column 1 contains the applicable question number.

Column 2 is where you will fill in a value for each question according to how you answered that question.

Now look at your completed questionnaire and how you answered Question 1.

If you answered "Does Not Clearly Describe," enter a value of 0 in the Points column.

If you answered "Somewhat Clearly Describes," enter a value of 2 in the Points column.

If you answered "Very Clearly Describes," enter a value of 5 in the Points column.

Continue the process until you have completed all questions for category "I."

Repeat this process for categories "C," "S," and "P."

When you have completed all categories, add the numbers in each Points column and enter the sums in the Total field.

Permission Statement

By submitting this document, you give your permission for a facilitator, trainer, or team leader to use the data for the purposes of aggregating your results, together with other team members' results, to develop a composite team score for identifying your team's ranking on a scale of measurement to identify team strengths and development opportunities. The information collected will be summarized to show themes and trends without identifying individual responses.

Submittal Instructions

Please place this completed assessment in a plain, unmarked envelope and give it to your team facilitator. Thank you for participating in your team's assessment.
