<b>Preface</b>	<b>xiii</b>
<b>To the Student</b>	<b>xv</b>
<b>To the Teacher: How to Build a Course Around This Book</b>	<b>xvii</b>
<b>CHAPTER 1 How Are We Doing? Data-Driven Views of Business Performance</b>	<b>1</b>
1.1 Setting Out Business Data	2
1.2 Different Kinds of Variables	5
1.3 The Idea of a Distribution	8
1.4 Typical Performance: The Sample Mean	13
1.5 Uncertainty in Performance: SD	15
1.6 Changing Units	18
1.7 Shapes of Distributions	20
<b>CHAPTER 2 What Stands Out and Why? Who Wins? Data-Driven Views of Performance Dynamics</b>	<b>25</b>
2.1 Different Layouts of Business Data	27
2.2 Comparing Performance across Different Segments	29
2.3 Complex Comparisons: Using Pivotables	30
2.4 Unusually High or Low Outcomes: z-Scores	35
2.5 Homogeneous Peer Groups	39
2.6 Combining Different Performance Measures	41
<b>CHAPTER 3 Dealing with Uncertainty and Chance</b>	<b>51</b>
3.1 Framing What Could Happen: Outcomes and Events	52
3.2 How Likely Is It? Probability Basics	55
3.3 Market Segments and Behavior; Probability Tables	57
3.4 Example in Health Care: Testing for a Disease	59
3.5 Conditional Probability	61
3.6 How Strong Is the Relationship? Measuring Dependence	66
3.7 Probability Trees	71

<b>CHAPTER 4</b>	<b>Let the Data Change Your Views: The Bayes Method</b>	<b>79</b>
4.1	The Bayes Method in Pictures	80
4.2	The Bayes Method as an Algorithm	81
4.3	Example 1: A Simple Gambling Game	83
4.4	Example 2: Bayes in the Courtroom	87
4.5	Some Typical Business Applications	90
<b>CHAPTER 5</b>	<b>Valuing an Uncertain Payoff</b>	<b>97</b>
5.1	What Is a Probability Distribution?	98
5.2	Displaying a Probability Distribution	100
5.3	The Mean of a Distribution	103
5.4	Example: Fines and Violations	104
5.5	Why Use the Mean?	107
5.6	The Standard Deviation of a Distribution	109
5.7	Comparing Two Distributions	112
5.8	Conditional Distributions and Means	114
<b>CHAPTER 6</b>	<b>Business Problems That Depend on Knowing “How Many”</b>	<b>121</b>
6.1	The Binomial Distribution	123
6.2	The Mean and Standard Deviation	125
6.3	The Negative Binomial Distribution	128
6.4	The Poisson Distribution	132
6.5	Some Typical Business Applications	135
<b>CHAPTER 7</b>	<b>Business Problems That Depend on Knowing “How Much”</b>	<b>141</b>
7.1	The Normal Distribution	142
7.2	Calculating Normal Probabilities in Excel	145
7.3	Combining Normal Variables	149
7.4	Comparing Two Normal Distributions	152
7.5	The Standard Normal Distribution	153
7.6	Example 3: Dealing with Uncertain Demand	156
7.7	Dealing with Proportional Variation	160
<b>CHAPTER 8</b>	<b>Making Complex Decisions with Trees</b>	<b>169</b>
8.1	Elements of Decision Trees	171
8.2	Solving the Decision Tree	175
8.3	Multistage Decision Trees	181
8.4	Valuing a Decision Option	186
8.5	The Cost of Uncertainty	188
<b>CHAPTER 9</b>	<b>Data, Estimation, and Statistical Reliability</b>	<b>195</b>
9.1	Describing the Past and the Future	197
9.2	How Were the Data Generated?	199

9.3	Law of Large Numbers	200
9.4	The Variability of the Sample Mean	201
9.5	The Standard Error of the Mean	204
9.6	The Normal Limit Theorem	208
9.7	Samples and Populations	212
<b>CHAPTER 10</b>	<b>Managing Mean Performance</b>	<b>219</b>
10.1	Benchmarking Mean Performance	221
10.2	The Statistical Size of a Deviation	224
10.3	Decision Making, Hypothesis Testing, and $p$ -Values	226
10.4	Confidence Intervals	230
10.5	One-Sided and Two-Sided Tests	232
10.6	Using StatproGo	232
10.7	Why Standard Deviation Matters	234
10.8	Assessing Detection Power	235
<b>CHAPTER 11</b>	<b>Are These Customers Different? Did the Intervention Work? Looking at Changes in Mean Performance</b>	<b>243</b>
11.1	How Variable Is a Difference?	245
11.2	Describing Changes in Mean Performance	247
11.3	Example 2: Is Product Placement Worth It?	249
11.4	Performing the $t$ -Test with StatproGo	255
11.5	Different Standard Deviations	258
11.6	Analyzing Matched-Pairs Data	261
<b>CHAPTER 12</b>	<b>What Is My Brand Recognition? Will It Sell? Analyzing Counts and Proportions</b>	<b>271</b>
12.1	How Accurate Are Percentages?	272
12.2	Tests and Confidence Intervals for Proportions	277
12.3	Assessing Changes in Proportions	280
12.4	Using StatproGo	284
12.5	Alternative Methods	284
<b>CHAPTER 13</b>	<b>Using the Relationship between Shares to Build a Portfolio</b>	<b>293</b>
13.1	How to Measure Financial Growth	295
13.2	Risk and Return: Both Matter	298
13.3	Correlation and Industry Structure	300
13.4	The Riskiness of a Portfolio	306
13.5	Balancing Risk and Return	310
13.6	Controlling Risk with TBs	312
<b>CHAPTER 14</b>	<b>Investigating Relationships between Business Variables</b>	<b>319</b>
14.1	Measuring Association with Correlation	320
14.2	Looking at Complex Relationships	324

14.3	Interpreting Correlations	328
14.4	What Is Autocorrelation?	331
14.5	Untangling Relationships with Partial Correlation	334
<b>CHAPTER 15</b>	<b>Describing the Effect of a Business Input: Linear Regression</b>	<b>341</b>
15.1	Linear Relationships	342
15.2	The Line of Best Fit	344
15.3	Computing the Least Squares Line	347
15.4	The Regression Model	351
15.5	How Reliable Is the Regression Line?	354
<b>CHAPTER 16</b>	<b>The Reliability of Regression-Based Decisions</b>	<b>365</b>
16.1	Three Kinds of Questions that Regression Answers	366
16.2	Estimating the Effect of a Change	369
16.3	Estimating the Trend Mean	370
16.4	Prediction	373
16.5	Prediction Errors and What They Tell You	374
<b>CHAPTER 17</b>	<b>Multicausal Relationships and Multiple Regression</b>	<b>387</b>
17.1	Multilinear Relationships	390
17.2	Multiple Regression	393
17.3	Model Assessment	400
17.4	Prediction and Trend Estimation	404
<b>CHAPTER 18</b>	<b>Product Features, Nonlinear Relationships, and Market Segments</b>	<b>413</b>
18.1	Accounting for Yes–No Features	415
18.2	Quadratic Relationships	417
18.3	Quadratic Regression	421
18.4	Allowing for Segments and Groups	425
18.5	Automatic Model Selection	429
<b>CHAPTER 19</b>	<b>Analyzing Data That Is Collected Regularly Over Time</b>	<b>437</b>
19.1	Measuring Growth and Seasonality	439
19.2	How Is the Growth Rate Changing?	443
19.3	Seasonally Adjusting Data	445
19.4	Delayed Effects	448
19.5	Predicting the Future (Using Autoregression)	453

<b>CHAPTER 20</b>	<b>Extending Regression Models: The Sky Is the Limit</b>	<b>461</b>
20.1	Inputs That Have Varying Effects: Interactions	462
20.2	Inputs That Have Proportional Impacts	470
20.3	Case Study: How Effective Are Catalog Mail-Outs?	474
20.4	More on Time Series	478
<b>Index</b>		<b>485</b>
