

Index

- Advancers, decliners:
 - NDX time graph performance comparison, 73–74
 - S&P500 performance comparison, 67
 - SPX time graph performance comparison, 71–72
- Advancing issues, declining issues:
 - comparison, 66
 - market comparison, 68
 - outperformance comparison, 69, 70
 - underperformance, occurrence, 66
- Anderson, Sparky, 2
- Annual returns, examination, 161
- Average daily gain:
 - lower lows, performance comparison, 25
 - NDX examination, 83
 - SPX, 7
 - SPX examination, 83
- Benchmarks:
 - market performance, comparison, 43
 - usage, 3
- Buyers, market involvement, 41
- Buying market weakness, superiority, 163
- Calendar days, examination, 157
- Call buying, 117
- Chicago Board Options Exchange (CBOE):
 - equity options, put/call ratio, 117
 - index options, put/call ratio, 117
 - Volatility Index (*see* Volatility Index)
- Clean market data, discovery, 4
- Closing data, usage, 117
- Cumulative return, 162
- Data, usage (impact), 4–5
- Decliners, advancers:
 - NDX time graph performance comparison, 73–74
 - S&P500 performance comparison, 67
 - SPX time graph performance comparison, 71–72
- Declines, gains (SPX outperformance comparison), 94–95
- Declining issues, advancing issues:
 - comparison, 66
 - market comparison, 68
 - outperformance comparison, 69, 70
 - underperformance, occurrence, 66
- Delisted stocks, examination, 157
- Down days, 43
 - comparison, 43
 - NDX price rise/fall, time graph performance comparison, 54–56
 - NDX up days, performance comparison, 48–50, 60–62
 - SPX price rise/fall, time graph performance comparison, 51–53
 - SPX up days, performance comparison, 45–47, 57–59
- Enron, examination, 157
- Equity options, put/call ratio, 117

- Falls, rises:
 NDX time graph performance comparison, 99
 SPX time graph performance comparison, 98
- 52-week highs:
 bullish perspective, 115
 NDX, 113–114
 SPX, 111–112
- 52-week lows:
 bearish perspective, 115
 NDX, 113–114
 SPX, 111–112
- Financial instrument, realized volatility, 157
- 5-day high, 5-day low:
 NDX put/call ratio, time graph performance comparison, 119
 SDX put/call ratio, time graph performance comparison, 118
- Five-week lows, five-week highs (returns comparison), 107
- Fourteen-period Relative Strength Index (RSI), test, 147
- Fundamental analysis, 164
- Gains:
 declines, SPX outperformance comparison, 94–95
 losses, NDX outperformance comparison, 96–97
 10-period moving average, market outperformance, 127–128
- General managers (GMs), usage, 2
- Higher highs, 25
 lower lows, performance comparison, 29, 30
 market losses, 25
 NDX, 38–40
 SPX, 35–37
- High flyers, avoidance, 158
- High Low (HILO) Index, 105
- NDX one-week lows/highs, gains comparison, 108
- S&P500 five-week lows/highs (returns comparison), 107
- S&P500 one-week lows/highs (outperformance comparison), 106
- High volatility stocks, perspective, 157
- Historical volatility (HV), 157
 concept, usage, 159
 test results, 158
- Implied volatility on the NASDAQ 100 option (VXN), 132
 10 percent VXN, stretch, 133
- Implied volatility on the NASDAQ 100 option (VXN) closure:
 10-period moving average, comparison, 134
 NDX time graph performance comparison, 137, 138
 SPX time graph performance comparison, 135, 136
- index options, put/call ratio, 117
- Indicators:
 caution, 164
 function/ability, 126
 usage, 91
- Investment rules, 159
- James, Bill, 1–2, 163
- Large moves, 93
 NDX, 102–103
 SPX, 100–101
- Large one-day moves, excitement, 93
- Large price declines/gains, outperformance comparison, 93
- Large volume days, insufficiency, 83–84
- Lehman Brothers, examination, 157
