

## A

- Absolute performance, 81–82
- Advance-decline (AD) line, 75–76
- Asian currency crisis (1997–1998), 21, 25–32
  - bear market years following (2000–2002), 28
  - deflation
    - effect on bond yields, 30–31
    - events of 1990s, 29–30
    - Japanese, and U.S. interest rates, 31–32
    - trends, effect on U.S. economy, 29
  - lessons of, 29
  - onset of, 25–26
  - decoupling of bonds and stocks, 26–27
- Asset allocation
  - rotations, leading to 2007 top, 59–71
    - asset allocation, 60
    - asset classes, relative strength between, 59
    - bond/stock ratio, turns in, 62–66
    - shift back to bonds, 65–66
    - falling dollar, 67–69
    - falling U.S. interest rates, 67
    - global decoupling, myth of, 69–70
    - intermarket relationship of bonds and stocks, 66–67
    - commodity/bond ratio upturn, 61–62
    - market peaks, sequence of, 69
    - relative strength ratio, 60–61
    - shift from stocks to commodities, 61
  - strategies, 93–94, 219
    - stage of business cycle in determining, 93–94

## B

- Banking stocks, 221–222
- Bear market, defined, 39
- Bonds
  - and commodities, link between, 197–214
    - change in (2007), 199–200
    - commodity/bond ratio, 206–211
    - commodity inflation versus bond deflation, 211–212
    - commodity peak (1980) and, 198
    - copper bottom during 2009, 203–205
    - copper versus corn (2002), 200–202
    - copper and Treasury bond prices, comparison of, 202–293

- CRB Index/Treasury bond ratio, 205–207
  - inverse link (2003–2006), 198–199
  - inverse relationship, 198
  - links to China and Japan, 213
  - Thomson Reuters/Jefferies CRB Index, 205
  - traditional relationship, 197
- and stocks, link between, 179–195
  - bond yields and stocks, positive correlation between, 180
  - bonds, difference in, 185–188
  - competition for investor funds, 179–180
  - divergence of bond yield and stocks (2012), 192–192
  - falling bond yield and dividend-paying stocks, 182–183
  - head-and-shoulders top (2010–2011), 181–182
  - Operation Twist, 190–191
  - price trends, 188–189
  - quantitative easing, 189–190, 191
  - rising volatility, consumer staples and utilities and, 183–185
  - stock downturn (2010–2011), bond yields and, 181–182
  - TIPS and gold, 193–194
  - upturn in stocks (2012), 194–195
  - yield curve, 191–192
- Business cycle, 91–103, 105–120
  - impact on market sectors, 105–120
    - comparing absolute and relative performance, 118–119
    - exchange-traded funds, 120
    - importance of, 119–120
    - and industry groups, difference between, 110
    - industry group leadership, 112
    - market carpets, 116–118
    - market of groups, 110
    - performance bars, 116
    - sector rotation, 105–116
    - smaller stocks, 107
    - technology leadership, 106
    - transportation leadership, 107
    - trends, monitoring, 114
  - intermarket analysis and, 91–103
    - comparisons to 1920s and 1930s, 95–96
    - four-year cycle, 91

as framework for intermarket work, 103  
 housing, interest rate sensitivity of, 99  
 interest rate cuts (2001), 95  
 and intermarket rotation, 93–94  
 Kondratieff Wave, 97–98  
 lessons of long cycles, 97  
 lessons from 2000 and 2007, 94  
 lifetime cycle, dividing into seasons, 98  
 oil, and higher rates (2004–2006), 94–95  
 presidential cycle, 91–93  
 real estate, 99–102  
 rotating asset classes over decades, 96–97

## C

Canada, 173–175  
 dollar versus euro, 174  
 markets and commodities, 175  
 trading opportunities in, 173  
 Chartists, defined, 48  
 Charts, advantages of using, 8–9  
 Commodities, falling dollar and (2002), 46,  
 47–58. See also Bonds and commodities,  
 link between; Stocks and commodities,  
 correlation between; U.S. dollar, inverse  
 correlation with commodities  
 alternatives, 51  
 gain from battle against deflation, 49–50  
 gold  
 bottom, stock peak and, 53  
 and dollar, trend changes in, 51–52  
 breaking of 15-year resistance line, 54  
 new bull market in, 50  
 outperformance of stocks, 56  
 inflation of, 47–49  
 oil peak and 2003 stock bottom, 57–58  
 stocks, end of secular uptrend of, 54–55

Consumer staples, 106

## Copper

bottom during 2009, 203–205  
 versus corn (2002), 200–202  
 influence on stock market direction, 147–149  
 and Treasury bond prices, comparison of,  
 202–293  
 trend, China's influence on, 167  
 CRB Index, 5, 16, 19, 25–26, 48–49, 134,  
 140, 153–154, 198–200, 205–207,  
 224–225  
 during Asian currency crisis, 25–26  
 40-year trend of, 224  
 and Treasury bond ratio, 205–207  
 Cyclical stocks, 111

## D

Decoupling, 26  
 Deflation, 22–23, 29–31, 49–50, 96  
 during Asian currency crisis, 29–31  
 Disinflation, 22–23, 29, 198

Double bottom, defined, 108  
 Double top, defined, 64  
 Dow/gold ratio, 56  
 Dow Theory, 78–79  
 Downtrend, defined, 39

## E

Economic indicators, 8–9  
 Emerging markets, commodities link to, 166  
 Euro, 140, 168–172, 174  
 Canadian dollar versus, 174  
 EMU iShares divergence from, 171–172  
 versus gold, 140  
 Exchange-traded funds (ETFs), 6, 29, 60, 120,  
 123–128, 169–170  
 bond, 125–126  
 commodity, 126  
 currency, 29, 60, 127  
 dollar, trading, 127  
 defined, 123–124  
 effect on intermarket trading, 6  
 foreign, 127–128  
 currency trends' impact on, 169–170  
 inverse and leveraged, 128  
 mutual funds versus, 124–125  
 stock market, 125  
 top providers, 124–125

## F

Federal Reserve, U.S., 10, 11, 22, 28, 29, 37, 38,  
 45–46, 189–190, 197, 217–218  
 policy  
 interference with normal bond/stock  
 relationships, 217–218  
 in 1940s, 218

## G

GDX, defined, 156  
 Global decoupling, myth of, 69–70  
 Gold, 17–20, 22, 47, 50–57, 67–69, 137, 140–142,  
 156–158, 193–194  
 bottom, stock peak and, 53  
 breaking of 15-year resistance line, 54  
 bull market in, 50  
 versus euro, 140  
 versus foreign currencies, 141–142  
 falling dollar and, 50  
 falling stocks and, 50  
 versus gold stocks, 156–157  
 miners, 157, 158  
 relink with gold, 158  
 versus other commodities, 140–141  
 outperformance of stocks, 56  
 record high of, 67–69  
 shares versus bullion (2011), 157–158  
 TIPS and, 193–194

trend changes in, 51  
Gordon, Ian, 98

## H

Head-and-shoulders top, defined, 181  
Homebuilding stocks, 82–85, 222

## I

Inflationary 1970s, 17–18  
Intermarket analysis, 1–13, 91–103  
  asset allocation strategies, 5–6  
  and the business cycle, 91–103  
  comparisons to 1920s and 1930s, 95–96  
  four-year cycle, 91  
  as framework for intermarket work, 103  
  housing, interest rate sensitivity of, 99  
  interest rate cuts (2001), 95  
  and intermarket rotation, 93–94  
  Kondratieff Wave, 97–98  
  lessons of long cycles, 97  
  lessons from 2000 and 2007, 94  
  lifetime cycle, dividing into seasons, 98  
  oil, and higher rates (2004–2006), 94–95  
  presidential cycle, 91–93  
  real estate, 99–102  
  rotating asset classes over decades, 96–97  
  charts, advantages of using, 8–9  
  exchange-traded funds, effect on intermarket trading, 6  
  oil, role of, 7–8  
  principles, 11–13  
  changes in, 12–13  
  recap of, 216  
  relationship of markets, 3–4, 11  
  asset classes involved in, 4  
  changes in, 11  
  sector rotation and the business cycle, 6  
  stock peaks and troughs, 7  
  technical analysis, implications for, 9–10  
  a new dimension to, 10  
  technical theory and practice, evolution of, 10  
  visual tools, importance of, 9  
Intermarket Analysis (Murphy), 95–96  
Intermarket model, old, 15–23  
  comparison with 1930s, 21–22  
  deflation, 22–23  
  inflationary 1970s, end of, 17–18  
  Iraq wars, 18–20  
  Japanese bubble, bursting of (1990), 23  
  stealth bear market (1994), 20–21  
  stock market crash (1987), 18  
  turning point (1980), 15–17  
Intermarket principles  
  changes in, 216–217  
  recap of, 216  
Inverted yield curve, 38–39

Iraq wars, effect on financial markets, 18–20  
iShares, 124–126  
  Brazil and China, 166  
  EAFE and Emerging Markets, stability at end of 2011, 172–173  
  EMU, divergence from euro, 171–172  
  France (2010), 170–171

## J

Japanese bubble, bursting of (1990), 23  
Japanese deflation, and U.S. interest rates, 31–32

## K

Kondratieff Wave, 97–98

## L

Logarithmic price scale, defined, 56  
Logarithmic scale, defined, 54  
Long, Clarence, 100

## M

Market breadth, defined, 75  
Market carpets, 116–117  
Market sectors, impact of business cycle on, 105–120  
  comparing absolute and relative performance, 118–119  
  exchange-traded funds, 120  
  importance of, 119–120  
  and industry groups, difference between, 110  
  industry group leadership, 112  
  market carpets, 116–118  
    using to find leading stocks, 117–118  
  market of groups, 110  
  performance bars, 116  
  sector rotation, 105–116  
    model, 110–112  
    in 2000 favored contraction, 105–106  
    in 2003 favored expansion, 106  
    in 2007, weakness in, 107–108, 111  
    in 2009, upturn in, 112–114  
    in 2011, 114–116  
    two sides of, 108–109  
  smaller stocks, 107  
  technology leadership, 106  
  transportation leadership, 107  
  trends, monitoring, 114  
MSCI World Index–ex USA, 165  
Mutual funds, 124–125

Nasdaq/bond ratio, 220  
Nasdaq Composite Index, 106, 221  
Negative divergence, defined, 75, 150  
Neural networks, 223

NYSE advance-decline (AD) line, 75–76

## O

Oil, role of in stock market, 7–8, 38, 57–58, 94–95  
and higher short-term interest rates (2004–2006),  
94–95  
peak and 2003 stock bottom, 57–58  
tripling of price (1999), 38  
Old normal. See Intermarket model, old  
Operation Twist, 46, 190–191

## P

Performance bars, 116  
PHLX Housing Index, 80, 82–83  
Power Shares QQQ Trust (QQQ), 125

## Q

Quantitative easing, 189–190  
impact on yield curve, 191–192

## R

Ratio charts, 59  
Real estate investment trusts (REITs), 40  
Real estate market, business cycle and, 99–102  
18-year cycle, 100–101  
and interest rates, 99  
and inflation, 100  
peak, 101–102  
Relative performance, 81–82  
Relative strength, defined, 41  
Relative strength ratio, 60–61, 82  
Resistance, defined, 55, 74  
Russell 2000 Small Cap Index, 106

## S

Sector rotation, 6, 60, 105–116  
and the business cycle, 6, 105  
defined, 60  
model, 110–112  
in 2000 favored contraction, 105–106  
in 2003 favored expansion, 106  
in 2007, weakness in, 107–108, 111  
in 2009, upturn in, 112–114  
in 2011, 114–116  
two sides of, 108–109  
Secular trend, defined, 54, 221  
Selling short, defined, 123–124  
Silver stocks (2011), 150–152  
Silver/gold ratio, influence on stock market,  
149–150  
SPDR (Standard & Poor's Depository Receipts), 125  
Stagflation, 17–18  
Stock/commodity ratio, 226  
Stock market crash (1987), 18  
Stock market top (2000), events surrounding, 37–46

bottoms, sequence of, 45  
commodities, upturn in 2002, 46  
consumer staples, 41–42  
crude oil, tripling of price, 38  
deflation, 45–46  
events leading up to, 37  
market lessons from, 42–43  
market peaks, sequence of, 43–45  
real estate investment trusts (REITs), 40  
short-term interest rates, rise in, 38–39

## Stocks

and bonds, link between, 179–195  
bond yields and stocks, positive correlation  
between, 180  
bonds, differences in, 185–188  
competition for investor funds, 179–180  
divergence of bond yield and stocks (2012),  
192–192  
falling bond yield and dividend-paying stocks,  
182–183  
head-and-shoulders top (2010–2011), 181–182  
Operation Twist, 190–191  
price trends, 188–189  
quantitative easing, 189–190, 191  
rising volatility, consumer staples and utilities  
and, 183–185  
stock downturn (2010–2011), bond yields and,  
181–182  
TIPS and gold, 193–194  
upturn in stocks (2012), 194–195  
yield curve, 191–192  
and commodities, correlation between, 145–159  
after 2008, 146–147  
commodities' loss of value, 146  
copper, influence on stock market direction,  
147–149  
deflationary environment, side effect of, 145  
foreign stocks, dollar direction's impact on, 159  
gold, 156–158  
key commodities, drop in (2011), 153–154  
sector performance, influence of commodities  
on, 152–153  
sector rotations, influence of commodity peak  
on, 156–154  
silver stocks (2011), 150–152  
silver/gold ratio, influence on stock market,  
149–150  
and the dollar, 161–177  
Canada, trading opportunities in, 173  
Canadian dollar versus euro, 174  
Canadian markets and commodities, 175  
commodities, link to emerging markets, 166
