

# INDEX

---

- abilities 4–6, 18–20, 55–9, 66, 71, 73–4, 113–28, 139, 158, 164, 167, 174–96, 199, 204
- absence rates 18–19, 23, 104, 179–81, 182
- accounting profits 2–4, 5, 9, 99–100, 104, 159–60, 163, 179–81
- achievement needs 107–8
- actors, implementation 80–5, 95, 202, 204–5
- actual HR practices 101–10, 139–40, 143–4, 179
- additive HR practices relationships 66, 193
- advanced manufacturing technology (AMT) 50–1
- affective (attitudinal) employee reactions 102–10, 165–6, 169, 174–5
- affective commitment (AC) 18–45
- age factors, well-being 27, 39–40
- agency theory 182, 185–6, 191–3
- aggregated measures 125, 127–8, 134–5, 142, 145, 157
- agreeableness personality trait 108, 116–17, 123
- AMO framework (ability, motivation, and opportunity) 4–5, 6, 18–19, 55–9, 158, 164, 167, 199
- analytical frameworks 48–50, 55–9, 77, 80–9, 110, 159, 169, 202
- ANCOVA (analysis of covariance) 162, 163–4
- Anglo-Saxon model 38, 57–8
- appraisals 8, 10, 17, 28–9, 32–7, 65, 73–4, 80–3, 105, 145–7, 174, 183, 189–90, 195
- Armed Forces Qualifying Test 115
- ASA (attraction, selection and attrition) model 39
- Australia 33, 54, 176
- automobile industry 3, 50, 100, 161
- autonomy 20–3, 26–9, 32–7, 41–5, 51–9, 107–8, 145–7, 175–96
- banks 3, 49, 88, 100, 135
- basketball teams, human capital 117, 120–1, 125–6
- 'bathtub' type model, HRM–WB–OP relationship 40–5
- behavioural theories of HRM 20–3, 102–10, 182
- Beijer, Susanne 13, 129–48, 199
- Belgium 94
- best fit approaches 3, 6, 8, 29, 37–40, 41–5, 62–77
- 'best practices' 3, 40, 48–59
- biases 6–7, 12, 126–7, 138–41, 151–3, 160–70, 190
- Big Five personality factors 108, 116, 123
- 'big research' concepts 7
- 'big science' approach to HRM–WB–OP relationship research 44–5
- 'black box' problem 16, 44, 49–50, 57, 59, 79–80
- Boon, Corine 12, 61–77, 199
- Bos-Nehles, Anna 12, 79–96, 201–2, 204–5
- Boselie, Paul 12, 17, 29, 37–8, 47–8, 61–77, 95, 167–8, 174–5, 178–9, 199

- box and arrows model 6  
 Boxall, Peter 9, 12, 17, 19, 42, 47–59, 62, 68, 75, 76, 77, 82, 144, 158, 167, 199–201  
 branding of the organization, graduate recruits 84  
 briefings 145–7  
 broaden-and-build theory (B&B) 23–9  
 bullying and harassment 88, 146–7  
 'bundling' of work practices 51–2, 53–4, 168  
 burnout 11, 18, 26–7, 30–7  
 business models, HRM–performance 53–5, 59  
 'business partner' role 91, 96, 203–4  
 business processes, implementation model of fit 69  
  
 Canada 15, 32, 34  
 capitalism 27, 57–8, 198–9  
 'caravan passageways' 44  
 cardiac health 59  
 career development 32–7, 114–15, 145–7  
 casual workers 54  
 causality 6–7, 18–19, 23, 25, 40–5, 99–100, 113–14, 129–30, 141, 148–71, 174–96, 200  
 CBA requirements 68, 71–2, 75  
 challenge job demands 26–7  
 change 39, 70, 75–7, 95, 101–10, 116–17  
 'check all that apply' rating scales 132–3  
 China 3, 50, 59, 135, 203  
 cinema chains 56  
 citizenship behaviours 20, 24, 66, 75, 107–8  
 clan feelings, family SMEs 192–3  
 cluster analysis 162  
 coaching, line managers 91–2  
 coercive mechanisms 68  
 cognitive processes 55–9, 101–10, 113, 114–15, 124–8, 190, 204  
 collective bargaining 27, 38, 73–4, 85  
 commitment 2–3, 4–5, 8, 17, 18–45, 53–9, 85–6, 88, 90, 103–10, 135–6, 174, 178–9, 182–4, 192–3, 198, 201, 203–4  
 communications 10–11, 17, 26–7, 32–7, 89–91, 97–8, 103–10, 113–14, 145–7, 184, 185–6, 202, 204–5  
 compensation levels 8, 32–7, 67–8, 119–20, 144–7, 178–9, 183  
 competencies 4–5, 72–3, 74–7, 91–2  
 competing values framework 9  
 competitive advantages 5–6, 58, 72–7, 80, 90–1, 105–10, 111–14, 120, 124–8, 156, 177–8, 180–1, 197–205  
 complements scenario, SMEs 191–6  
 computer numerical control machine tools (CNC) 50  
 computer-aided design (CAD) 50  
 confidence intervals 152–3, 160  
 configurational model of  
   HRM–performance predictors 3  
 'conflicting outcomes' model of the  
   HRM–WB–OP relationship 21–7, 29–37, 42–5, 57–8, 79–80, 90, 192–3, 201  
 conscientiousness personality trait 107–8, 116–17, 123  
 conservation of resources theory (COR) 23–4, 27–9, 43–5  
 construct validity 157–62  
 consultancy organizations 83–4, 95–6  
 content model of fit 62–77, 168–9, 202  
 'contextually based human resource theory' 73, 77  
 contingency (best fit) model of  
   HRM–performance predictors 3, 6, 8, 29, 37–40, 41–5, 62–77, 181–2, 188, 190–1, 197–8  
 control variables, omitted variable biases 162–6, 204  
 control-oriented practices 2–3, 6–7, 20–1, 26–8, 53, 57–8, 145, 146–7, 183, 192–3, 195  
 controlling personality trait 108  
 coordination between employees 19–20, 32–7, 101, 108–10, 117–28  
 coping methods 27–8, 75–7  
 correlation, statistical modelling 150–60, 164  
 cost savings 30–7, 53–9, 64–5, 75–7, 159, 183–4  
 counterproductive behaviour employee reactions, SHRM process model 103–10  
 covariance, causality inferences 153–4, 161–2  
 creativity 6, 10–11, 100, 119–20  
 criticisms of the HR role 93–5  
 Cronbach's alpha 154–6  
 cross-level well-being performance effects 25–9, 44

- cross-sectional study designs 11–12, 156–7, 162–3, 168–9, 200
- cultural issues 19–21, 26–9, 39–40, 52–3, 56–9, 68, 84–5, 89–91, 106, 113–14, 153, 181–2, 192–6, 200, 205
- customer satisfaction 9–10, 32–7, 81, 83, 104, 107, 118–19
