<b>Executive summary</b> .....	xvii
<b>About the authors</b> .....	xix
<b>Introduction</b> .....	3
<i>By Olga V. Mack, fellow at CodeX, The Stanford Center for Legal Informatics, and Generative AI Editor at law.MIT Computational Law Report, Humira Noorestani, visionary founder, DigiCounsel, and MbaMemme Onwudiwe, EVP legal and business intelligence</i>	
The LegalOps 2.0 Framework .....	5
LegalOps 2.0 Framework – the ISSUe model .....	6
Diving deeper into the ISSUe Model .....	8
1. Identify .....	9
2. Structure .....	11
3. Shape .....	13
4. Utilize effectively .....	15
LegalOps 2.0 Approach to law firms and corporate legal departments .....	16
Applying ISSUe to the CLOC core competencies .....	18
Three additional focus areas of LegalOps 2.0 .....	22
Our mission .....	23
<b>PART ONE: TECHNOLOGY</b> .....	27
<b>Introduction</b> .....	29
<i>by Paul Levy, senior consultant, Jameson Legal Tech</i>	

<b>Chapter 1: Automation in legal departments</b> .....	33
<i>By Tara Emory, senior vice president of legal AI strategy, Wilzette Louis, director of client solutions, and Adam Poeppelmeier, director of e-discovery at Redgrave Data, and Kassi Burns, senior attorney at King &amp; Spalding, LLP</i>	
Introduction .....	33
Automating administrative functions .....	35
Automation of legal research tasks .....	37
Automation of document drafting .....	39
Automation of e-discovery tasks .....	40
Automated e-discovery processes .....	40
Automation of reporting .....	43
Challenges and risks of automated systems .....	45
Conclusion .....	46
<b>Chapter 2: Revolutionizing legal operations with GPT – the power of AI in the legal industry</b> .....	49
<i>By Tom Dunlap, CEO and co-founder, Summize</i>	
Automation in legal operations .....	49
Getting rid of “legal jargon” .....	50
Enhanced research capabilities .....	50
More accurate decision-making .....	51
Increased accessibility .....	51
ChatGPT and the future of legal operations .....	51
Will ChatGPT replace humans? .....	51
Legal operations and ChatGPT – the future is bright .....	52
<b>Chapter 3: Leveraging AI and data in financial management for legal operations leaders</b> .....	55
<i>By Jake Sussman, chief operating and product officer, Evisort</i>	
Introduction .....	55
Utilizing e-billing tools for enhanced invoice management .....	56
Contracts as data – a paradigm shift in financial management .....	57
<b>Chapter 4: The Sherlock Holmes of legal operations – using business intelligence for law firm efficiency</b> .....	61
<i>By Nipun K. Bhatiaa, CEO, Legal League Consulting</i>	
Business intelligence – the skill of extracting value from complexity .....	61

Unlocking the power of resource allocation .....	62
The ally of efficiency – achieving more with less .....	63
A radar that helps you detect and respond to risks and opportunities .....	63
Transforming operations from reactive to proactive .....	64
Business intelligence for intelligent business – dial P for Profitability! .....	65
Keep your friends close, your competitors closer .....	65
The powerful AI-BI combination – a match made in heaven? .....	66
Conclusion .....	67
<b>Chapter 5: AI and privacy – balancing technological potential and protection of personal data .....</b>	<b>69</b>
<i>By Monika Kwiatkowska, senior commercial counsel, Zscaler, Inc., and Humira Noorestani, visionary founder, DigiCounsel</i>	
Safeguarding .....	72
Compatibility .....	73
Use it wisely .....	74
Consider liabilities .....	75
Next steps .....	75
<b>Chapter 6: The Brazilian Supreme Court’s AI-driven journey to a 100 percent digital judiciary system .....</b>	<b>77</b>
<i>By Caroline Francescato, lawyer, founder of LinkLei, and professor of law and technology</i>	
Introduction .....	77
The use of artificial intelligence in the Brazilian justice system .....	78
Incorporating artificial intelligence in the courts .....	80
Artificial intelligence and Brazilian law firms .....	84
Final considerations .....	86
<b>Chapter 7: Technical debt – the hidden cost of law firms’ digital transformation journey .....</b>	<b>89</b>
<i>By John Lindsey, InCite LegalTech</i>	
The concept of technical debt .....	89
Law firm applicability .....	89
Procrastination .....	90
Metrics for measuring technical debt .....	92
Strategies for managing technical debt .....	92
Conclusion .....	92

<b>Chapter 8: Powered by AI – shaping tomorrow’s workforce</b> .....	95
<i>By Natalie Pierce, partner, and Stephanie Goutos, practice innovation attorney, Gunderson Dettmer</i>	
AI uses for employers .....	95
Potential concerns and responsible implementation .....	99
Equipping the workforce for a future with AI .....	100
<b>Chapter 9: Using AI and data to support vendor management</b> .....	109
<i>By Amine Anoun, founder and chief technology officer, Evisort</i>	
Collecting and centralizing a single source of truth vendor agreements .....	109
Leveraging AI software tools and resultant data to reduce costs .....	110
Negotiate better and faster with vendors moving forward .....	111
Conclusion .....	112
<b>Chapter 10: Understanding the relationship between legal operations and legal technology</b> .....	113
<i>By Colin S. Levy, legal tech author, speaker, and director of legal for Malbek</i>	
Technological integration and automation .....	113
Standardization of legal processes .....	114
Data-driven decision-making .....	114
Enhancing collaboration and communication .....	115
Defining legal operations and legal technology .....	115
Enhancing process improvement .....	115
Boosting legal research .....	116
Enhancing data and matter management .....	116
Optimizing e-discovery .....	117
Strengthening contract management .....	117
<b>Chapter 11: One general counsel, two federal investigations, and an absence of legal technology</b> .....	119
<i>By Tara Trantham, RISE Legal</i>	
The story .....	119
The plot twist .....	120
How the story could have gone .....	121
The lesson .....	123

<b>Chapter 12: How legal operations teams should evaluate AI solutions</b> .....	125
<i>By MbaMemme Onwudiwe, EVP legal and business intelligence</i>	
Evaluating AI powered tools .....	126
Steps to evaluate AI and make sure it's not “two eyes” .....	126
Why is this important? .....	127
Conclusion .....	128
<b>Chapter 13: Unlocking the power of KPIs – a guide for law firms</b> .....	129
<i>By Gary Miles, The Free Lawyer</i>	
What are KPIs? .....	129
Why should a law firm use KPIs? .....	130
What are possible drawbacks to utilizing KPIs? .....	131
What are important KPIs to measure? .....	132
What is the process for utilizing KPIs in the law firm? .....	133
Conclusion .....	134
<b>Chapter 14: The importance of metrics in legal operations</b> .....	135
<i>By Sana Virani, contract consultant</i>	
Introduction .....	135
Matter management and internal workload metrics .....	135
External counsel evaluation metrics .....	136
Metrics around litigation avoidance .....	137
Turnaround time .....	138
Conclusion .....	139
<b>PART TWO: PROCESS</b> .....	141
<b>Introduction</b> .....	143
<i>by Tanisha Minev, legal counsel, Yoco, and Humira Noorestani, visionary founder, DigiCounsel</i>	
<b>Chapter 1: LegalOps 2.0 and the CLOC Core 12 – the “Identify” stage through integrating clients into legal teams</b> .....	145
<i>By Fatima M. Bolyea, Taft Stettinius &amp; Hollister LLP</i>	
Objective #1: Obtain knowledge (LegalOps 2.0 – “Identify” phase) ...	146
Objective #2: Preserve knowledge .....	146

Objective #3: Retain and analyze knowledge (LegalOps 2.0 – “Structure” and “Shape” phases) . . . . .	146
Best practice #1: A successful first meeting with your client . . . . .	147
Best practice #2: A comprehensive timeline and supporting documents . . . . .	150
Best practice #3: Your internal review of the clients’ documents . . . . .	154
Best practice #4: Ongoing client involvement during motion practice and discovery . . . . .	154
Best practice #5: Integrating your client into trial preparation . . . . .	156
Conclusion . . . . .	156
<b>Chapter 2: Shred those documents (periodically, systematically, objectively, defensibly, legally, and ethically)! . . . . .</b>	<b>159</b>
<i>By Jeff Cunningham, law firm general counsel, MGC Law</i>	
Record retention basics . . . . .	159
RRP logistics . . . . .	161
Conclusion . . . . .	163
<b>Chapter 3: Litigation management and the six Ps . . . . .</b>	<b>165</b>
<i>By Brewster Rawls, Rawls Law Group</i>	
Lessons to live by . . . . .	165
<b>Chapter 4: Model retention guidelines for external counsel – best practices for successful law firm relationships . . . . .</b>	<b>169</b>
<i>By Son Tran, chief legal advisor, TTC Group</i>	
Setting budgets . . . . .	169
Contact for relationship . . . . .	170
Billing requirements . . . . .	170
Litigation/early case assessment . . . . .	171
Consider alternative dispute resolution early and often . . . . .	171
Alternative fee arrangements . . . . .	171
Conclusion . . . . .	174
<b>Chapter 5: Winning at the new game – a blueprint for business strategies for law firms in the post-pandemic era . . . . .</b>	<b>175</b>
<i>By Yavanika Shah, legal business specialist, IndusLaw</i>	
What has changed in the post-pandemic era? . . . . .	175
Meeting clients’ expectations . . . . .	176
Remote work vs work from office . . . . .	177

Embracing technology .....	177
Focus on client experience .....	178
Prioritize diversity and inclusion .....	178
Alternative fee arrangements (AFAs) .....	179
Crisis management plan .....	179
A blueprint for change – case studies of successful law firms in the business .....	180
Summary .....	181
<b>Chapter 6: The art of vendor management for legal operations .....</b>	<b>183</b>
<i>By Navin Mahavijayan, head of legal operations, Modernizing Medicine</i>	
Vendor and supplier selection .....	183
Vendor contract intake .....	184
Reviewing and negotiating contracts .....	185
Renewing contracts .....	186
Conclusion .....	187
<b>Chapter 7: A gigabyte of work – information governance in a world of data .....</b>	<b>189</b>
<i>By Dan Cotter, member, Dickinson Wright PLLC</i>	
Inventory, inventory, inventory .....	189
Know where the data skeletons are buried .....	190
Know what type of information is in the inventory .....	190
Survey the field of workers .....	192
Develop or revise the policies .....	192
Litigation holds .....	192
Staging up an information management program .....	192
Remember, compliance is all about the PEOPLE .....	193
<b>Chapter 8: Contracts management planning – how to optimize processes and lift your organization .....</b>	<b>195</b>
<i>By Olga V. Mack, fellow, CodeX, The Stanford Center for Legal Informatics, and Generative AI editor, law.MIT</i>	
What is contract management planning? .....	197
Traveling the CMP path in four steps .....	197
Step 1: Set your contract management planning goals and strategies .....	198
Step 2: Articulate the value of CLM technology .....	200
Step 3: Assemble your contract management planning team .....	201

Step 4: Identify your contract management plan’s KPIs .....	203
Planning is prevailing .....	204
<b>Chapter 9: Recipe for success – how legal knowledge management drives business forward .....</b>	<b>207</b>
<i>By Jenna Sanz-Agero, of counsel, Business Affairs, Inc., and advisory board member, xMentium, Inc.</i>	
Identification and capture of relevant knowledge that is ongoing, preferably automated, and scalable .....	208
Organization and storage of knowledge so that it is easily accessible .....	209
Distribution and sharing of knowledge .....	209
Use and application of knowledge to improve business processes and decision making .....	210
Continual assessment and improvement of the knowledge management system .....	210
Tying KM to core legal operations competencies .....	211
<b>Chapter 10: A beginner’s guide for in-house legal counsel navigating legal operations .....</b>	<b>215</b>
<i>By Tanisha Minev, legal counsel, Yoco</i>	
What is legal operations, really? .....	216
Pillar one: Organization and elimination of waste .....	217
Pillar two: Reducing costs .....	222
Motivating for budget for technology .....	223
Pillar three: Optimizing time .....	224
The importance of data .....	224
<b>Chapter 11: Law firms as a business – a modern approach .....</b>	<b>227</b>
<i>By Owen McGrann, resident troublemaker, McGrannLAW LLC</i>	
The economics of the billable hour .....	227
Trusted advisors and intellectual capital .....	229
Does this sound uncomfortably close to how “normal” businesses are run? .....	230
<b>Chapter 12: The impact of a strategic legal plan on business partnerships .....</b>	<b>233</b>
<i>By Sara Ajmi, legal operations expert</i>	
Introduction .....	233

In-house legal function and business goals – the perfect mismatch .....	233
The importance of a strategic plan for in-house legal departments .....	234
Seizing the opportunity – a call for strategic clarity .....	235
Conclusion .....	236
<b>Chapter 13: All for one and one for all – how to win M&amp;A battles in private practice and in-house environments</b> .....	237
<i>By Ruslan Sulaimanov, Abu Dhabi National Oil Company Group</i>	
Introduction .....	237
Cross-functional alignment – a symphony in motion .....	238
Fortifying unity with technology and artificial intelligence .....	242
Conclusion .....	242
<b>Chapter 14: Unlocking legal operations’ digital transformation through ALSPs</b> .....	245
<i>By Maryam Salehijam, PhD, client account executive, Axiom Law</i>	
ALSps vs law firms .....	246
Advantages of ALSps for legal operations .....	247
Unlocking enhanced efficiency and flexibility .....	247
Conclusion .....	248
<b>Chapter 15: Building IP processes for multinational corporations and start-ups</b> .....	251
<i>By Chitra Sahay, legal manager, Barcode Entertainment</i>	
Suggested multinational corporations IP processes .....	252
Suggested start-up IP processes .....	253
Relevance of intellectual property .....	254
Why companies should safeguard their creative production .....	255
Conclusion .....	256

<b>PART THREE: PEOPLE</b> .....	257
<b>Introduction</b> .....	259
<i>by Laura Jeffords Greenberg, senior legal director, Worksome and AI consultant at LEGIT</i>	
Communication .....	260
Innovation .....	260
Education .....	260
Inclusion .....	260
 <b>Chapter 1: How legal turns business teams into LegalTech champions</b> .....	263
<i>By Chad About, founder and principal, Chad About Consulting</i>	
My journey to LegalTech implementation .....	263
An impactful win that’s not impossible .....	263
Sourcing potential vendors .....	264
Evaluating as a team .....	264
Selecting the LegalTech provider .....	265
Planning implementation .....	265
Testing the work .....	266
Launching Version 1 .....	266
Refining (forever) .....	267
Conclusion .....	267
 <b>Chapter 2: The modern legal department – cultivating an AI-ready mindset</b> .....	269
<i>By Suzi Hixon, trademark attorney</i>	
The importance of an AI-ready mindset .....	269
Understanding AI’s (current) capabilities and limitations .....	270
Embracing the unknown and fostering a culture of innovation .....	270
Learning from failure .....	271
Enhancing efficiency .....	271
Banishing burnout and achieving work – life balance with AI-driven solutions .....	273
Automating routine tasks .....	274
Improving time management and prioritization .....	274
Enabling flexible working arrangements .....	274
Fostering a culture of continuous learning and innovation .....	274
Conclusion .....	274

**Chapter 3: The vital role of the legal operations function in utilizing DEI data analytics** ..... 277

*By Flo Nicolas, founder and chief innovation and data strategist, Get Tech Smart*

- The legal diversity challenges ..... 278
- Diversity beyond race and gender ..... 279
- Understanding employee sentiment through data analytics ..... 281
- Breaking barriers – gender pay equity and promotions data ..... 282
- Leveraging data analytics for job applications, vendor contracts, and exit interviews ..... 283
- Data-driven monitoring – job applications, supplier bids, and hiring processes ..... 285
- Legal operations’ impact on contract language inclusivity ..... 287
- Mitigating litigation risks with DEI data analytics ..... 287
- From data to action – leveraging DEI insights to make meaningful change ..... 288

**Chapter 4: Ten questions a legal team should ask itself if it is serious about diversity, equity, and inclusion** ..... 291

*By Niti Nadarajah, freelance general counsel, empowerment coach, and DEI consultant*

- QUESTION 1: Where does responsibility for DEI lie within the organization? ..... 292
- QUESTION 2: What do we do to demonstrate our commitment to DEI internally? ..... 292
- QUESTION 3: What can we learn by examining the similarities and/or differences between team members, including new hires? ..... 293
- QUESTION 4: Who does our culture support and who does it disadvantage? ..... 295
- QUESTION 5: Do our actions demonstrate that we take accountability seriously across our organization? ..... 295
- QUESTION 6: How psychologically safe do people feel within the team? ..... 296
- QUESTION 7: How do we ensure we hear everyone’s voice and opinions? ..... 297
- QUESTION 8: What criteria do we use for assessing talent and progression? ..... 298

QUESTION 9: Are there any patterns in our employee turnover data that indicate more can be done to support our people? ..... 298

QUESTION 10: What actions do we take to support DEI within the legal profession and society as a whole? ..... 299

**Chapter 5: Practical tips to create inclusive legal teams** ..... 301  
*By Cathy Nestrick, American Bankers Association*

    What is inclusion? ..... 301

    Benefits to inclusion ..... 302

    Strategies to foster inclusive practices ..... 303

    Summary ..... 305

**Chapter 6: From dinosaur to data(connoi)sseur – how to harness data to achieve favorable litigation outcomes** ..... 307  
*By Shari E. Belitz, chief executive officer, Shari Belitz Communications LLC*

    History ..... 307

    Changing times ..... 307

    A new direction ..... 308

    Conclusion ..... 310

**Chapter 7: Dance of the data dragons – e-discovery for legal operators** ..... 311  
*By Cat Casey, chief growth officer, Reveal Brainspace*

    What is e-discovery and why should legal operations professionals care? ..... 311

    The dancers ..... 312

    Vanquishing e-discovery foes ..... 312

    Data sources more and varied than the seven kingdoms ..... 312

    The dual-headed dragon of privacy and data security ..... 313

    More costly than a loan from the Iron Bank ..... 313

    Legal operators – an e-discovery knight in shining armor ..... 313

    Forging powerful alliances ..... 313

    Becoming an e-discovery maester for your company ..... 314

    E-discovery as legal operations’ moment in the sun ..... 314

    Winter is coming – be prepared ..... 315

<b>Chapter 8: Legal party of one</b> .....	317
<i>By Elina Cohen, general counsel, QuickNode</i>	
Be a friend .....	317
Draw the line .....	318
<b>Chapter 9: A learning curve – the training, development, and education of legal technology and legal operations</b> .....	321
<i>By Harry Borovick, general counsel at Luminance, external lecturer at Queen Mary University London, and visiting lecturer at the University of Law</i>	
Why do lawyers learn, and why does what lawyers learn matter? .....	321
How do lawyers learn? .....	322
How and what will lawyers learn? .....	324
Practical steps to improve legal education .....	325
What’s next for legal education? .....	326
<b>Chapter 10: The importance of simple, easy, and effective communications in legal operations</b> .....	329
<i>By Jeffery A. Kruse, founder, Key Legal Operations Consulting LLC (KLOC)</i>	
Clear communications are the keys to success .....	329
SEE communications can help legal operations teams .....	329
SEE communications can be a useful guide for legal operations teams .....	332
<b>Chapter 11: Why lawyers should not be doing your project management</b> .....	333
<i>By Amr Jayousi, senior associate, Sanchez &amp; Amador LLP</i>	
A lawyer’s biggest asset is in his/her lawyering .....	333
Lawyers are not trained in project management .....	334
Most legal operations projects do not need a lawyer .....	335
Most legal departments have too many lawyers .....	336
Most legal departments have too few legal operations professionals .....	336
Conclusion .....	337

<b>Chapter 12: Unlocking your legal team’s potential – the role of legal operations in training and development</b> .....	339
<i>By Robert Hanna, founder and managing director, KC Partners</i>	
Resources for new hires .....	339
Existing employees .....	340
Attracting new talent .....	341
People, process, and technology .....	342
<b>Chapter 13: Leveraging your personal brand online to match your reputation offline</b> .....	343
<i>By Viveca Hess, HessConnect</i>	
How do you build that brand – your digital twin? .....	343
Personal branding defined .....	344
Self-discovery and assessment .....	344
Defining your niche and target audience .....	345
Crafting your consistent and compelling online profile and presence .....	346
Networking and building relationships .....	347
Conclusion .....	348
<b>Chapter 14: The power of authenticity in law</b> .....	349
<i>By Hannah Beko, Legal Studio Solicitors</i>	
What is authenticity? .....	351
How can we become more authentic in our everyday working life? .....	351
<b>Chapter 15: Asynchronous communication and AI – a powerful duo to supercharge performance</b> .....	355
<i>By Laura Jeffords Greenberg, senior legal director, Worksome and AI consultant at LEGIT</i>	
Understanding asynchronous and synchronous communication .....	356
Superpower legal operations with asynchronous communication and AI .....	358
Practical steps and best practices .....	362
<b>About Globe Law and Business</b> .....	367

## Chapter 12:

# How legal operations teams should evaluate AI solutions

*By MbaMemme Onwudiwe, EVP legal and business intelligence*

In today's fast-paced world, the use of artificial intelligence (AI) has become widespread in all aspects of human life. Legal departments are no exception to this trend, and many are now leveraging AI tools to streamline their projects and reduce the burden of tedious manual work. In light of recent excitement generated by technologies like ChatGPT, it can be easy to get carried away by flashy demos and sales pitches, only to be left with AI that doesn't work as expected. As such, it is crucial to thoroughly evaluate AI tools before making a purchase decision and to understand the different types of AI that are available for legal operations. In this chapter, we will delve deeper into the value of leveraging AI tools for making your legal departments more efficient and explore best practices for evaluating AI solutions. We will then dive into why these capabilities are important for modern teams, especially when partnered with robust APIs that centralize contracts and business data.

AI is not a monolith and the technology can be applied to use-cases in legal operations in a variety of ways. Some applications of AI in legal operations are already ubiquitous, such as optical character recognition (OCR), which for years has helped legal teams take scanned PDF images of written documents and convert them into searchable digital files using computer vision. Litigation discovery is another facet of legal services that has widely adopted AI, through the widespread use of e-discovery tools to help sift through evidence. However, these days, more advanced use-cases are in focus for legal operations professionals, such as automatically extracting data from documents, as well as contract focused capabilities like reviewing agreements against pre-determined risk playbooks, and automatically organizing grouping contracts in the same master-amendment families. While these capabilities may sound advanced, in 2024 we use advanced AI every day – as it is embedded in tools like Google, Spotify, and LinkedIn. However, you wouldn't buy a Tesla with self-driving capabilities if it could only navigate roads you've already driven on. It's the same with legal tech – you need to

make sure these tools can provide you with value quickly before making a multi-year commitment for your organization.

### **Evaluating AI powered tools**

Remember the initial weeks in which ChatGPT was released? Legal leaders across the globe took time to play around with the tool, and its speedy results allowed them to quickly decide whether or not the tool would be valuable to their use-cases. This ability to quickly evaluate a tool's results is a positive attribute of pre-trained AI powered tools. No matter what kind of AI you hope to use, the prime goal of an evaluator should be answering the question, *"Does this AI work quickly and accurately to solve my problems?"* Think about Spotify or Google. You would know if the AI stopped working within moments, by seeing weird search results or hearing a song you don't like. It's the same with legal tech. Legal operations leaders should be confident that they and their teams have the know-how to look at AI results and determine their quality. Legal tech tools are often sold in SaaS models, where customers sign up for expensive multi-year commitments to implement and rollout tools. In this context, it is of tantamount importance that evaluators confirm that advanced capabilities leveraging AI work accurately on day one, as they often have very little time to evaluate which is critical for internal momentum and buy-in during implementation and change management.

### **Steps to evaluate AI and make sure it's not "two eyes"**

The first step is to talk to your potential vendor and ask them to describe their AI's capabilities. "Artificial intelligence" has very much become a buzzword in many industries, legal tech notwithstanding. As such, it is important to make sure you have a clear understanding of what exactly the "AI" is accomplishing for you in a system. Make sure to tightly define the functionality by narrowing in on what it does with questions such as:

- Does it automatically group master agreements with amendments?
- Does it flag risks in contracts?
- Is it tracking key dates and obligations?

Try to truly understand what is being automated by AI, and how much of it works on day one without your team's effort in training.

Once you have a full understanding of what the AI in your legal tech tool can do, the only thing left is to make sure that it can do it! The second step is to test the vendor's AI capabilities in real time, using documents that the

vendor has never seen before. You can either do this in a live joint demo, whereby you email the vendor 10-15 varying agreements they've never seen before and ask them to upload them to show the results, or request a no-strings-attached "sandbox" of the tool that will let you test out AI capabilities on your own without hand-holding. It is essential to ensure that the vendor can deliver on its promises and that the AI capabilities immediately work correctly before you subscribe long-term.

Just like using Google, ChatGPT, Twitter/X, or Spotify, these algorithms either work or they don't. It is basic due diligence to make sure the vendor can deliver on its promises. This is especially important, since if they are using "two eyes" instead of "AI" on your company's most important and confidential documents, it could expose your legal department to potential issues down the line.

### **Why is this important?**

Today, enterprise legal teams have access to a multitude of workflow intake and organizational software that facilitate the generation, review, and approval of negotiated business documents. These documents are ultimately stored in a vast web of repositories and CRMs, each managed by different business units with their own goals and needs for data. In this environment, data and insights are segmented and siloed, limited by whatever data each particular technology platform owner believes is important enough for their teams to manually retranscribe into their software to be tracked moving forward. This makes holistic visibility of contractual obligations that cuts across these data silos almost impossible – because even if you were to gather and centralize the metadata being tracked in all these systems, they would differ and result in gaps in visibility.

Leveraging AI and APIs effectively solves these issues. By connecting repositories and CRMs storing agreements with two-way sync APIs, you can create a centralized repository of contracts that does not disrupt your existing document storage architecture. Teams can continue to store agreements in Salesforce or Google Drive, but as they do so, they are passively being stored in a centralized location that can be queried and audited when issues arise. Of course, the ability to perform said queries and audits can only be unlocked by utilizing AI to structure the unstructured data in these documents.

Having used APIs to centralize documents and data into one location, how do you take the next step of performing complex queries and getting action-

able insights? What you have now is all your agreements in one place and disparate metadata (tagged clauses and key dates) since people were keeping track of disparate information in their respective CRM systems. This is where AI comes in. Using artificial intelligence algorithms to analyze every single centralized contract and then output numerous yet uniform metadata about each document is key. By using the evaluative techniques that we discuss throughout this chapter, you can be sure that the tool you select is ready to perform these important processes from the outset of your adoption.

### **Conclusion**

There is a joke in legal operations that CLM stands for “career limiting move” instead of “contract lifecycle management”. This joke is a symptom of a culture in which vendors often oversell capabilities and clients spend months, if not years, frustratingly implementing tools without getting any value out of them. The quick time-to-value of AI capabilities can shatter this paradigm, but it will require more active engagement and skepticism by buyers who will need more of a “show me” than “tell me” mentality. Ultimately, however, the adoption of AI will help legal operations teams engage with contracts and litigation from more of a data perspective, which crucially brings legal into line with its peer business units.

*This chapter ‘How legal operations teams should evaluate AI solutions’ by MbaMemme Onwudiwe is from the title Legal Operations in the Age of AI and Data, published by Globe Law and Business.*
