

Contents at a Glance

Introduction	1
Part I: Getting Acquainted with Six Sigma Basics	7
Chapter 1: Better Business and Better Performance: Defining Six Sigma	9
Chapter 2: Linking Quality and Business	17
Chapter 3: Examining the Principles and Language of Six Sigma	31
Chapter 4: Organizing for Improvement	43
Part II: DMAIC: Defining and Measuring	61
Chapter 5: Identifying and Right-Sizing Projects	63
Chapter 6: Launching a Project	77
Chapter 7: Mapping to Identify Possible Factors	87
Chapter 8: Diagramming to Identify Possible Factors	101
Chapter 9: Describing Performance with Numbers	113
Part III: DMAIC: Analyzing	133
Chapter 10: Depicting and Analyzing Data through Charts and Graphs	135
Chapter 11: Analyzing for Value	155
Chapter 12: What's Normal? Recognizing Normally-Shaped Variation	165
Chapter 13: Assessing Capability: Comparing the Voices of the Customer and the Process	179
Chapter 14: Gauging Gauges: Measurement System Analysis (MSA)	199
Chapter 15: Mining Data and Processes for Insight	209
Chapter 16: Making Confident Decisions	227
Part IV: DMAIC: Improving and Controlling	241
Chapter 17: Forecasting Future Performance	243
Chapter 18: Designing, Conducting, and Analyzing Experiments (DOE)	259
Chapter 19: Standardizing on Improvement	281
Chapter 20: Maintaining Gains through Statistical Process Control	291
Part V: Looking at the Six Sigma Technology Tool Landscape	309
Chapter 21: Eyeing Process Characterization and Optimization Technologies	311
Chapter 22: Tools for Performing Six Sigma Analysis	323
Chapter 23: Managing Six Sigma	331

<i>Part VI: The Part of Tens</i>	343
Chapter 24: Ten Top Do's and Don'ts of Six Sigma	345
Chapter 25: Ten Ways to Gain Synergies with Lean and Six Sigma.....	349
Chapter 26: Ten Places to Go for Help	353
<i>Index</i>	357

Table of Contents

<i>Introduction</i>	1
About This Book	1
Conventions Used in This Book	2
What You're Not to Read	3
Foolish Assumptions	3
How This Book Is Organized	3
Part I: Getting Acquainted with Six Sigma Basics	4
Part II: DMAIC: Defining and Measuring	4
Part III: DMAIC: Analyzing	4
Part IV: DMAIC: Improving and Controlling	4
Part V: Looking at the Six Sigma Technology Tool Landscape	5
Part VI: The Part of Tens	5
Icons Used in This Book	5
Where to Go from Here	6
<i>Part 1: Getting Acquainted with Six Sigma Basics</i>	7
Chapter 1: Better Business and Better Performance: Defining Six Sigma	9
Discovering What's Behind the Name	9
Tackling Six Sigma from the Managerial Perspective	11
Bridging science and leadership	11
Management system orientation	13
Chapter 2: Linking Quality and Business	17
Specifications: Listening to the Voice of the Customer	17
How close is close enough? Understanding the need for specifications	18
Defining specifications	18
Do you do the RUMBA? Creating realistic specifications	19
Examining What Quality Truly Is	20
Discovering the cost of poor quality curve: Football and Taguchi's loss function	23
Avoiding the hidden factory	25
Looking at How Quality Beliefs Determine Behavior	26
Comparing belief systems side by side	26
Journeying from one to many	27
Connecting quality and variation	27
Calculating Six Sigma quality	28

Chapter 3: Examining the Principles and Language of Six Sigma . . . 31

Starting Out with One Simple Equation: $Y = f(X) + \epsilon$	31
Principle 1: Recognizing Determinism	33
Seeking cause and effect	33
Correlation doesn't imply causation: Resisting superstitious delusions	34
Principle 2: Reducing Variation	35
Understanding variation	35
Categorizing common cause versus special cause variation.....	36
Coping with variation	37
We're adrift: Peeking at short-term and long-term variation	37
Principle 3: Measuring for Success	38
Minding your Ys and Xs	38
Summing it up with data	39
Principle 4: Applying Leverage	39
Appreciating the difference between the critical few and the trivial many	40
Separating and utilizing the critical few.....	41
Principle 5: Managing Risk	42

Chapter 4: Organizing for Improvement 43

DMAIC: Introducing Your Project Strategy	43
Venturing to the Domains of Activity	45
Thinking for breakthrough	45
Processing for breakthrough.....	46
Designing for breakthrough.....	46
Managing for breakthrough.....	47
Filling the Roles: Who You Need to Know	48
Starting at the top.....	48
Assembling the core team	49
Focusing on functional representatives.....	50
Spotting the deployment leader	51
Meeting the Six Sigma Champion.....	53
Number-crunching karate: Black Belts and their brethren	54
Following the Five Stages of a Six Sigma Initiative	56
Initializing: Ready, aim	57
Deploying: Setting the infrastructure in motion	58
Implementing: Forging first successes.....	58
Expanding: Taking it everywhere	59
Sustaining: The self-healing culture.....	60

Part II: DMAIC: Defining and Measuring..... 61**Chapter 5: Identifying and Right-Sizing Projects 63**

Launching a Six Sigma Project	64
Scoping the perfect project	64
Transforming the problem	65

Knowing your goals and needs	65
Determining project responsibilities.....	67
Writing the Business Case.....	68
Starting with candidate business-case statements	68
Selecting the business case.....	69
When You're Ready: Defining a Six Sigma Project	70
Following the steps of the project definition process.....	71
Identifying the significant Y.....	73
Understanding how bad it actually is.....	74
Deciding whether a project is worthwhile	75
Chapter 6: Launching a Project	77
Describing the Problem with a Problem Statement.....	77
Deciding How Much Improvement Is Enough.....	80
Asking "How much am I entitled to?"	80
Acknowledging that other hidden opportunities exist	81
Going for breakthrough improvement	82
Setting an Improvement Target with Your Objective Statement	83
Getting a Project Approved and Assigned	85
Chapter 7: Mapping to Identify Possible Factors	87
Breaking Down Process Flow	88
Drawing a process map.....	89
Defining and visualizing the process points.....	90
Acknowledging the as-is state	92
Developing a SIPOC	93
VSM: Charting the Value Stream.....	94
Introducing a stream of resources, information, and value.....	95
Creating a VSM for your process	96
Chapter 8: Diagramming to Identify Possible Factors	101
Breaking Down Brainstorming Tools	102
Affinity diagrams.....	102
Fishbone (Ishikawa) diagrams	102
Focusing on Failure Mode Effects Analysis (FMEA).....	103
Listing process steps.....	104
Identifying requirements and recording potential failure modes	106
Spelling out effects of failures	106
Scoring the severity of the effects	107
Listing causes of failure modes.....	108
Scoring the occurrence of the cause.....	108
Identifying current controls	109
Scoring the detection of the controls.....	109
Calculating and reviewing RPN scores.....	111
Devising and assigning improvement actions.....	111

Chapter 9: Describing Performance with Numbers. 113

Recognizing Different Types of Data.....	113
Identifying attribute (category) data.....	114
Classifying continuous (variable) data	115
Using Statistics to Make Sense of Data	116
Beginning with measurement 101: Distribution.....	117
Measuring distribution location	118
Calculating the width of variation	121
The Long and Short of Variation	125
Sizing up short-term variation.....	125
Shift happens: Looking at long-term variation.....	128
Being all you can be: Entitlement	130

Part III: DMAIC: Analyzing..... 133**Chapter 10: Depicting and Analyzing Data through Charts and Graphs. 135**

Checking Out Dot Plots and Histograms	136
Creating your own dot plots and histograms	136
Interpreting dot plots and histograms.....	137
Comparing Distributions in Box and Whisker Plots	141
Making your own box and whisker plot.....	141
Making sense of box and whisker plots	143
Making Connections with Scatter Plots.....	144
Developing a scatter plot.....	144
Drawing correlations from a scatter plot	146
Hindsight Is 20/20: Observing Process Behavior Charts.....	150
Creating a characteristic or process behavior chart.....	150
Interpreting characteristic or process behavior charts.....	151

Chapter 11: Analyzing for Value. 155

Understanding and Achieving Value: It's Customer-Driven.....	155
Ascertaining value	156
Waste not: Defining the seven forms of waste	157
Kano's framework: Hearing the voice of the customer.....	158
Analyzing Process Flow for Value: Introducing Take One, Make One.....	160
Considering Cause-and-Effect (C&E) Analysis	161
Laying out the matrix	161
Adding some weight	162
Figuring the final score.....	162
Go team! Appreciating group input when using C&E.....	164
Leveraging Your Old Friend FMEA for Value	164

Chapter 12: What's Normal? Recognizing Normally-Shaped Variation	165
Defining Normal: Bell-Shaped Variation and Probability	165
Meeting the model: The standard normal distribution	167
Working with nonstandard normal data: The Z transformation....	171
Using Excel to calculate normal probabilities	172
Checking How Well Data Follow a Normal Curve:	
Normal Probability Plots.....	174
Constructing a normal probability plot	174
Interpreting your normal probability plot.....	177
Chapter 13: Assessing Capability: Comparing the Voices of the Customer and the Process	179
Working with Yield and Defect Rates.....	179
Measuring yield.....	179
Measuring defect rate.....	184
Brought to you by the number e: Linking yield and defect rate	189
What's Your Sigma, Baby? Deciphering Sigma (Z) Score	189
Breaking down how many standard deviations can fit.....	190
Comparing short-term versus long-term sigma score calculations	191
Linking short-term capability to long-term performance with the 1.5-sigma shift.....	192
Considering Capability Indices	195
Short-term capability index (C_p).....	195
Adjusted short-term capability index (C_{pk}).....	196
Long-term capability indices (P_p and P_{pk}).....	198
Prescribing a capability improvement plan	198
Chapter 14: Gauging Gauges: Measurement System Analysis (MSA)	199
Avoiding Illusion: Measurement System Capability Analysis	199
Looking at variation in a measurement system	200
Sources of measurement system variation	200
Measuring Measurements: Measurement System Analysis (MSA)	203
Audit measurement system studies	203
Attribute measurement system studies.....	204
Gauge or continuous variable measurement system studies	207
Chapter 15: Mining Data and Processes for Insight	209
Filling the Funnel	209
Let the data do the talking.....	210
Cast a big net.....	210
Mining Data for Insight.....	211
Go with what you have: Observational studies	211
Digging in: Identifying potential sources of variation through graphical analysis	213

Nearly Magical Multi-Vari Charts: Expertly Screening Factors.....	216
Categorizing the variations.....	216
Putting it all together: Creating a multi-vari sampling plan	217
Constructing a multi-vari chart.....	218
Interpreting a multi-vari chart.....	220
Checking out a Multi-Vari Example	223
Chapter 16: Making Confident Decisions.....	227
Introducing Populations and Samples	227
Parameter Distributions from Multiple Samples: Using the Central Limit Theorem.....	228
Calculating Decision Risk: Confidence Intervals	230
Confidence intervals for means	230
Confidence intervals for standard deviations.....	234
Four out of five recommend: Confidence intervals for proportions.....	237
Part IV: DMAIC: Improving and Controlling.....	241
Chapter 17: Forecasting Future Performance	243
Seeing the Correlation	243
Getting a Handle on Curve Fitting	246
Finding the line: Simple linear regression	247
Discovering residuals and the fitted model.....	249
Practicing tools for fitting lines.....	254
Moving on to multiple linear regression.....	255
Chapter 18: Designing, Conducting, and Analyzing Experiments (DOE)	259
Seeing the Improvement Power of Six Sigma Experiments	259
Achieving better understanding through experiments	260
Getting schooled on the terms.....	261
The end game of Six Sigma experiments	261
Looking Before You Leap: Experimental Considerations.....	262
The trial-and-error approach	262
The one-factor-at-a-time approach	263
The boil-the-ocean approach	263
The Six Sigma approach: Multitasking and progressing.....	264
Setting up 2^k Factorial Experiments	266
Planning your experiment	266
Conducting your experiment	269
Analyzing your experiment.....	270
You've Only Just Begun: Looking at More Topics in Experimentation	278

Chapter 19: Standardizing on Improvement. 281

- Satisfying the Need for Control Planning 281
 - The process management summary 282
 - The process control plan..... 283
- 5S: Housekeeping for Sustained Improvement 285
- Mistake-Proofing with Poka-Yoke..... 287
- Leveraging FMEA as a Control Tool 288
- Setting and Following Standards 289

Chapter 20: Maintaining Gains through Statistical Process Control 291

- Getting to Know Control Charts 291
 - Monitoring the process..... 293
 - Understanding control limits 294
 - Using control charts to keep processes on track..... 296
 - Detecting patterns, shifts, and drifts..... 297
 - Collecting data for control charts..... 300
- Setting Up Control Charts for Continuous Data 300
 - Individuals and moving range chart (I – MR)..... 302
 - Averages and ranges chart (– R chart) 303
 - Averages and standard deviation chart (– S)..... 304
- Making Control Charts for Attribute Data 305
 - The p chart for attribute data 306
 - The u chart for attribute data 307

Part V: Looking at the Six Sigma Technology Tool Landscape. 309

Chapter 21: Eyeing Process Characterization and Optimization Technologies. 311

- Understanding the Platforms and Protocols 312
 - Paper and pencil 312
 - Looking at desktops and laptops..... 313
 - Upgrading to smartphones and tablets 313
 - Expanding to enterprise-class options..... 313
- Knowing When Going Manual Makes Sense (And Doesn't) 314
- Using Basic Desktop Tools 316
 - Getting a handle on the Office suite 316
 - Process mapping with Visio 317
- Perusing Process Intelligence Tools 318
- Diving into Desktop Process Mapping Technology 320
- Exploring Enterprise-Class Technology 321

Chapter 22: Tools for Performing Six Sigma Analysis 323

Tackling Technology for Analytics.....	323
Making room for manual computations.....	324
Holding out for hand-held calculators	324
Opting for online calculators.....	324
Looking at the local computer	325
Using Standard Spreadsheets	325
Taking on Bigger Projects with Specialized Statistical Analysis Tools.....	326
Sampling spreadsheet add-ons	327
Perusing dedicated statistics packages	327
Minitab	328
JMP	329
Other stats packages.....	330

Chapter 23: Managing Six Sigma 331

Managing Your Projects Skillfully.....	331
Involving all the right people	332
Being in charge of your toolkit.....	332
Through the Looking Glass: Communicating Like a Leader	334
Helping Yourself to Project Management Tools.....	335
Capturing ideas with ideation tools	335
Defining the project	336
Pick a winner! Selecting the project	337
Tracking the project.....	338
Just the Facts, Ma'am: Intelligence Tools.....	340
Gaining process intelligence	340
Dealing with dashboards	340
Keeping a balanced scorecard.....	340
Collaborating in Style: Knowledge Management	342

Part VI: The Part of Tens..... 343**Chapter 24: Ten Top Do's and Don'ts of Six Sigma 345**

Do Target Tangible Results	345
Do Think Before You Act	346
Do Put Your Faith in Data	346
Do Align Projects with Key Goals	346
Do Unleash Everyone's Potential	347
Do Leverage Technology	347
Don't Deploy Six Sigma without a Leader.....	347
Don't Take Too Big a Bite	347
Don't Think, "But We're Different"	348
Don't Overtrain	348

Chapter 25: Ten Ways to Gain Synergies with Lean and Six Sigma 349

- Add Customer Value 349
- Map the Value Stream 350
- Strive for Flow 350
- 3-Gen: Go to Gemba 350
- Muda-Mura-Muri: Expand Your Definition of Waste 350
- 5S the Workplace 351
- Keep Simple Things Simple 351
- Remember that Everyone Plays a Part 351
- View Improvement as a Mindset 352
- Make Sure Managers Improve, Too 352

Chapter 26: Ten Places to Go for Help 353

- Court Your Colleagues 353
- Web Searches and Social Networks 353
- Contact Six Sigma Corporations 354
- Join Associations and Societies 354
- Attend Conferences 355
- Read The Books 355
- Talk to Technology Vendors 355
- Chat with Consultants 355
- Survey the Six Sigma Trainers 356
