Preface		xv
Acknowledgements		xvii
1 Introduction		1
Definition of risk		1
Risk types		1
Risk management v risk control		4
Risk aversion		4
Ex-post and ex-ante		4
Dispersion		5
2 Descriptive Statistics		7
Mean (or arithmetic mean)		7
Annualised return		8
Continuously compounded returns (or log returns)		8
Winsorised mean		9
Mean absolute deviation (or mean deviation)		9
Variance		10
Mean difference (absolute mean difference or Gini mean difference)		12
Relative mean difference		14
Bessel's correction (population or sample, n or $n-1$)		14
Sample variance		17
Standard deviation (variability or volatility)		17
Annualised risk (or time aggregation)		18
The Central Limit Theorem		19

Janssen annualisation	19
Frequency and number of data points	19
Normal (or Gaussian) distribution	21
Histograms	22
Skewness (Fisher's or moment skewness)	22
Sample skewness	24
Kurtosis (Pearson's kurtosis)	24
Excess kurtosis (or Fisher's kurtosis)	25
Sample kurtosis	25
Bera-Jarque statistic (or Jarque-Bera)	27
Covariance	28
Sample covariance	30
Correlation (ρ)	30
Sample correlation	32
Up capture indicator	32
Down capture indicator	34
Up number ratio	34
Down number ratio	34
Up percentage ratio	35
Down percentage ratio	35
Percentage gain ratio	35
Hurst index (or Hurst exponent)	35
Bias ratio	37
3 Simple Risk Measures	43
Performance appraisal	43
Sharpe ratio (reward to variability, Sharpe index)	43
Roy ratio	46
Risk free rate	46
Alternative Sharpe ratio	47
Revised Sharpe ratio	48
Adjusted Sharpe ratio	48
Skewness-kurtosis ratio	49
MAD ratio	49
Gini ratio	52
Relative risk	53
Tracking error (or tracking risk, relative risk, active risk)	53
Relative skewness	54
Relative kurtosis	55

Information ratio	55
Geometric information ratio	56
Modified information ratio	57
Adjusted information ratio	61
Relative Hurst	61
4 Regression Analysis	69
Regression equation	69
Regression α (α_R)	70
Regression β (β_R)	70
Regression ϵ (ϵ_R)	70
Capital Asset Pricing Model (CAPM)	71
Beta (β) (systematic risk or volatility)	71
Jensen's α (Jensen's measure or Jensen's differential return or ex-post α)	72
Annualised α	72
Bull beta (β^+)	73
Bear beta (β^-)	73
Beta timing ratio	73
Market timing	78
Systematic risk	81
R^2 (or coefficient of determination)	83
Specific or residual risk	83
Treyner ratio (reward to volatility)	84
Modified Treyner ratio	86
Appraisal ratio (or Treyner-Black ratio)	86
Modified Jensen	87
Fama decomposition	88
Selectivity	88
Diversification	88
Net selectivity	89
Fama-French three factor model	89
Three factor α (or Fama-French α)	91
Carhart four factor model	91
Four factor α (or Carhart's α)	91
K ratio	91
5 Drawdown	97
Drawdown	97

Average drawdown	97
Maximum drawdown (or peak to valley drawdown)	98
Largest individual drawdown	98
Recovery time (or drawdown duration)	98
Drawdown deviation	98
Ulcer index	99
Pain index	100
Calmar ratio (or drawdown ratio)	100
MAR ratio	100
Sterling ratio	100
Sterling-Calmar ratio	101
Burke ratio	102
Modified Burke ratio	102
Martin ratio (or Ulcer performance index)	102
Pain ratio	103
Lake ratio	103
Peak ratio	106
6 Partial Moments	107
Downside risk (or semi-standard deviation)	107
Pure downside risk	108
Half variance (or semi-variance)	108
Upside risk (or upside uncertainty)	108
Mean absolute moment	109
<i>Omega</i> ratio (Ω)	110
Bernardo and Ledoit (or gain-loss) ratio	110
<i>d</i> ratio	110
<i>Omega</i> -Sharpe ratio	111
Sortino ratio	112
Reward to half-variance	112
Downside risk Sharpe ratio	113
Downside information ratio	113
Kappa (K_I) (or Sortino-Satchell ratio)	113
Upside potential ratio	114
Volatility skewness	114
Variability skewness	115
Farinelli-Tibiletti ratio	115
Prospect ratio	117

7 Extreme Risk	119
Extreme events	119
Extreme value theory	119
Value at risk (VaR)	119
Relative VaR	120
Ex-post VaR	120
Potential upside (gain at risk)	121
Percentile rank	121
VaR calculation methodology	122
Parametric VaR	124
Modified VaR	125
Historical simulation (or non-parametric)	125
Monte Carlo simulation	126
Which methodology for calculating VaR should be used?	126
Frequency and time aggregation	127
Time horizon	127
Window length	127
Reward to VaR	128
Reward to relative VaR	129
Double VaR ratio	129
Conditional VaR (expected shortfall, tail loss, tail VaR or average VaR)	130
Upper CVaR or $CVaR^+$	131
Lower CVaR or $CVaR^-$	131
Tail gain (expected gain or expected upside)	132
Conditional Sharpe ratio (STARR ratio or reward to conditional VaR)	133
Modified Sharpe ratio (reward to modified VaR)	136
Tail risk	136
Tail ratio	137
Rachev ratio (or R ratio)	137
Generalised Rachev ratio	137
Drawdown at risk	138
Conditional drawdown at risk	138
Reward to conditional drawdown	138
Generalised Z ratio	138

8 Fixed Income Risk	141
Pricing fixed income instruments	141
Redemption yield (yield to maturity)	141
Weighted average cash flow	141
Duration (effective mean term, discounted mean term or volatility)	142
Macaulay duration	142
Macaulay-Weil duration	143
Modified duration	143
Portfolio duration	144
Effective duration (or option-adjusted duration)	145
Duration to worst	146
Convexity	147
Modified convexity	147
Effective convexity	148
Portfolio convexity	148
Bond returns	149
Duration <i>beta</i>	150
Reward to duration	151
9 Risk-adjusted Return	153
Risk-adjusted return	153
M^2	153
M^2 excess return	154
Differential return	155
GH1 (Graham & Harvey 1)	156
GH2 (Graham & Harvey 2)	156
Correlation and risk-adjusted return M^3	157
Return adjusted for downside risk	158
Adjusted M^2	160
Omega excess return	161
10 Which Risk Measure to Use?	163
Why measure ex-post risk?	163
Which risk measures to use?	164
Hedge funds	164
Smoothing	169
Outliers	171
Data mining	171

Risk measures and the Global Investment Performance Standards (GIPS®)	172
Fund rating systems	174
Risk efficiency ratio	175
Which measures are actually used?	176
Which risk measures should really be used?	178
11 Risk Control	181
Regulations in the investment risk area	181
Risk control structure	182
Risk management	183
Glossary of Key Terms	189
Appendix A – Composite Internal Risk Measures	193
Appendix B – Absolute Risk Dashboard	195
Appendix C – Relative Risk Dashboard	199
Bibliography	203
Index	209
