Preface	xvii
Acknowledgments	xxi
SECTION ONE	
The LCRT Investment Process	1
CHAPTER 1	
Introducing Our Investment Process	5
Key Takeaways	8
CHAPTER 2	
A Better Way to Invest in Stocks	9
Put the Focus in the Right Place: On a Company's Fundamental Value	9
We Bring You an Improved Methodology	10
Basing Decisions on Under- and Overvaluation by the Market	12
The Key: Recognizing the Inflection Points	13
Looking at Our Model	14
Key Takeaways	16
CHAPTER 3	
Advantages of Economic, Cash-Based Modeling	17
Key Takeaway	21
CHAPTER 4	
Analyzing Mental Models	23
Key Takeaways	26
	vii

CHAPTER 5	
The Value Creation Process	27
Cost of Capital and Company Return on Capital	27
The Importance of Adjusting for Inflation	28
Where We Are Going	29
Key Takeaways	31
CHAPTER 6	
The Corporate Perspective	33
The Focus for Both Constituencies: Value Creation	33
Earnings Are the Wrong Measure	36
Executive Compensation	38
Creating an Information Advantage	41
Key Takeaways	44
SECTION TWO	
A Brief History of Investing and Modeling	45
CHAPTER 7	
Relevant Market History of Investing	47
Start with Concepts of Risk and Uncertainty	48
Migrate toward Value and Market Inefficiency	49
Enter Modern Portfolio Theory	50
An Emphasis on Earnings, Plus	51
Leading to Multifactor Modeling	51
Finding the Right Factors	52
Dissecting a Multifactor Model	53
Key Takeaways	54
CHAPTER 8	
Interpreting Market History	55
Market Is Dealing with Price Change, Not Price Level	56
Bringing History Up to Now	59
Back to Earnings: Why They Still Prevail	60
Key Takeaways	62

SECTION THREE**Brief Discussions of Various Investing Methods 63**

How Best to Combine Investing Methods with LCRT's Models 63

CHAPTER 9**Do Stocks Have Intrinsic Value? 65**

Basing Investment Decision on Intrinsic Value 66

Value Assets on Economic Basis 68

Estimating Intrinsic Value through a DCF Model 69

Key Takeaways 70

CHAPTER 10**The Pros and Cons of Various Methods and Models 71**

Why Price Level Matters 71

Why Use Analysts' Traditional Cash Flow Forecasts.
Why Not. 72

Why Use Dividends to Value Stocks. Why Not. 72

Why Use the Simplest Model, EBITDA. Why Not. 73

Why Use Earnings. Why Not. 74

Why Use Price Level from Regression Analysis. Why Not. 75

Why Use Net Free Cash Flow. Why Not. 76

Why Use Residual Income or EVA.[®] Why Not. 77

Why Use Cash Flow ROI, CFROI,[®] Economic Cash
Margin, or Cash Economic Return. Why Not. 78

CHAPTER 11**Suppose You Love Your Current DCF Model 81**

Dividend Discount Models 82

EVA[®] or Residual Income Models 83

CFROI[®] or Cash Economic Return Models 84

Regression Models of Price Level 84

Multifactor Models 85

SECTION FOUR**Explaining LCRT's Conceptual Framework in Detail 87****CHAPTER 12****Our Approach 91**

Differences between Intrinsic Value and Market Value	
Approaches	93
Explaining Value	94
Attacking the Old Ways	97
Modeling on Economic Fundamentals, Not Accounting	
Mumbo-Jumbo	98
The Intricacies of the Price Formation Process	100
The Foundation Is Intrinsic Value	101
We're Fighting Standard Practices, but We Can Win	102
Key Takeaways	103

CHAPTER 13**Focusing on Price Formation 105**

Be Proactive, Not Reactive	106
Building a Price Formation Process	107
Oh-Oh: We're Preaching Again	109
Key Takeaways	110

CHAPTER 14**Our Automated DCF Model—The Better Model 111**

Four Primary Measurement Principles to Evaluate a Model	113
Key Takeaways	114

CHAPTER 15**Getting to Know Our LCRT Model 115**

Adjustments to Improve DCF Modeling	116
Economic Output and Life of Each Asset	116
Capitalize Cash Flows	117
Understanding Abnormal Accruals	118
Cash Flows Fade: Down and Up	119
Looking at the Discount Rate	120
Summarizing the Model of Choice	121
The Next Generation Will Be Even Better	122
Key Takeaways	123

CHAPTER 16		
 Digging Deeper into the LCRT Model		125
Exponential Fading of both Cash Economic Return and Growth Rate		125
Certainty-Equivalent Value and the Use of the Area under a Curve		129
Dealing with Debt Leverage		130
Looking at the Discount Rate Again		132
Inflation Adjustments Revisited		134
Importance of Accuracy		135
Calculating Bounded Rationality (Rawley Ranges)		136
Three Fundamental Economic Drivers of Dispersion Affecting Stock Price		138
Buy and Hold Strategies		139
Short-Term Trading Strategies		139
Trading Strategies Shorting the Market		140
Market Sentiment and Micro and Macro Economic Drivers		140
Market Sentiment		140
Macro and Micro Economic Drivers		140
Improving the Model with Your Insights and Analyst Forecasting		142
Key Takeaways		143
CHAPTER 17		
 Putting Our Valuation Proposition into Perspective		145
SECTION FIVE		
 How to Make Investment Decisions with ValuFocus		147
CHAPTER 18		
 ValuFocus—The Key Tool for Investing in Stocks		151
The Components of ValuFocus		153
The Relative Wealth Chart: Cash Economic Return, Growth, and Stock Performance		156
Rawley Ranges of Bounded Rationality		158
EPS and Sales Overrides		159
Analyzing Hewlett-Packard		162
Determining the Accuracy of the Value Calculations		164
Using the Value Chart		166

Earnings Results Can Be Misleading	167
The Market Often Is Slow to React to Value Improvements by Management	168
Picking the Right Model Version	169
Contrasting Hewlett-Packard with Coca-Cola	172
Neither Coke nor Pepsi	175
Incorporating Revenue and EPS Forecasts	179
Basic Purpose: Predict Future Stock Price	180
Taking Advantage of the Flexibility of ValuFocus	182
The Importance of Fade Rates to Intrinsic Valuation	184
Continuing Debate: Determining the Right Discount Rate Created from Long-Term Growth Rates	187
Key Takeaways	188
CHAPTER 19	
Managing Your Stock Portfolio	191
Ways to Weight Stocks in Your Portfolio	194
Risk and Concentration	195
Rebalancing Your Portfolio	195
Key Takeaways	197
CHAPTER 20	
Advanced Portfolio Concepts	199
Selecting Stocks	200
Value and Tracking Error	200
Diversification	200
Inflection Points	201
Buy and Hold Strategies versus Selective Market Timing	202
Portfolio Weighting	206
Achieving Low Risk–High Return Trading around a Core Portfolio	207
Shorting Stocks Based on Value	209
Cash Generator	213
Key Takeaways	218
CHAPTER 21	
What If You Don't Want to Employ ValuFocus	221
CHAPTER 22	
Always Going Forward	223
Key Takeaways	229

<i>Contents</i>	xiii
CHAPTER 23	
It Is Time to Get Started	231
SECTION SIX	
Advanced Topics for Practicing Professionals	233
CHAPTER 24	
Security Analysis and Modeling	235
Empirically Test Terminal Valuation Model against History	235
Benefits and Rewards	237
Analyst Dashboard	237
Financial Modelers and Ideas for Future Practitioner	
Research	240
Key Takeaways	242
CHAPTER 25	
Wealth Management	243
Key Takeaway	246
CHAPTER 26	
Portfolio Construction	247
New Theory	248
Begin with Under- and Overvaluation, Then Diversify	248
Weighting Schemes	249
Rebalancing Your Portfolio	249
Benefits of Concentration	250
Key Takeaway	251
SECTION SEVEN	
Advanced Topics for Academics	253
Inefficient Markets	253
Chapters in This Section for the Academic	253
CHAPTER 27	
Another Tour through Our LCRT Model	257
Description of the LCRT Model	258
Constructing the Model	258

Basic Components of the Model	260
Dealing with the Many Assumptions	262
The Best of Both: Explaining Our Fade Process in a Single-Period Method	264
Fade and Model Accuracy	267
Starting with a Baseline Model	268
Importance of Understanding Economic Comparables	271
The Difference between Net Free Cash Flow versus Cash Economic Return	272
Comparing Conventional and LCRT Models	273
Validating the Model: The Proof Is in the Comparison	275
Calculation of Tracking Errors	275
Focusing on Cash Economic Return	280
Calculating and Delving into Cash Economic Return	284
Understanding the Growth Rate	290
Arriving at the Discount Rate for a Third Time	292
Summing Up	293
Key Takeaways	295

CHAPTER 28**Incorporating Risk into Our Model****297**

Incorporating Risk and Fade into Our LCRT Model	298
How Risk Modeling for Stock Selection Has Evolved	300
Managing Risk in Our LCRT Modeling	304
Looking at Technical Analysis and Ranges of Bounded Rationality Again	305
Measuring the Extent of Over- and Undervaluation	306
Modeling the Dispersion of Stock Price	307
Applying Risk in Our Model	308
Key Takeaways	310

CHAPTER 29**Producing Lower Fat-Tailed Risk with Higher Returns****311**

Alternatives to Stable Paretian Distributions	312
Comparison of Traditional Gaussian Measures with Stable Paretian	314
Key Takeaways	318

CHAPTER 30	
Comparing Our Model against Three Popular DDMs	319
Evaluating the Three DDMs	322
Testing the Models for Robustness and Accuracy	324
Robustness, Accuracy, Nonbias Enhance Predictability	327
Removing Bias Caused by a Certain Parameter	328
Portfolio Results for Three ROPE Model Specifications	333
Using Our Sophisticated Free Cash Flow Process	335
Key Takeaways	337
CHAPTER 31	
Suggestions for Additional Academic Research	339
Epilogue—Key Takeaways	341
About the Authors	343
Index	345
