About the Author	xiii
Introduction	xv
About the companion website	xix
1.0 Firearms History	1
1.0.1 Introduction	1
1.0.2 The flintlock	1
1.0.3 The percussion system	3
1.0.4 The pinfire system	3
1.0.5 The rimfire system	4
1.0.6 The Dreyse needle fire system	4
1.0.7 The centre fire system	5
1.0.8 The revolver	5
1.0.9 The self-loading pistol	6
Further reading	8
2.0 Weapon Types and Their Operation	9
2.0.1 Introduction	9
2.0.2 Handguns	9
2.0.3 Rifles	13
2.0.4 Shotguns	14
2.0.5 Combination weapons	15
2.0.6 Sub-machine guns	15
2.0.7 Assault rifles	16
2.0.8 Machine guns and heavy machine guns	16
2.0.9 Muzzle attachments	16
2.0.10 Important parts of a weapons mechanism	19
2.0.11 Bent and sear	20
2.0.12 Other important parts of a revolver mechanism	22
2.0.13 Hand and ratchet	23
Further reading	24
2.1 Gas and Air Powered Weapons	25
2.1.1 Introduction	25
2.1.2 Weapon types	25
2.1.3 Ammunition	28

2.1.4	Considerations	30
	Further reading	31
2.2	Rifling Types and Their Identification	33
2.2.1	Introduction	33
2.2.2	Basics	34
2.2.3	Class characteristics	37
2.2.4	General introduction to rifling	38
	Additional reading	42
2.3	Home-made, Improvised and Converted Firearms	43
2.3.1	Introduction	43
2.3.2	Improvised firearms	43
2.3.3	Converting air weapons	44
2.3.4	Home-made and converted toys and replica weapons	45
2.3.5	Home-made ammunition	48
	Further reading	50
2.4	Antique Weapons	51
2.4.1	Introduction	51
2.4.2	Background	51
2.4.3	Defining 'antique'	52
3.0	Proof Marks	55
3.0.1	Introduction	55
3.0.2	Proof marks	55
3.0.3	Types of proof	56
3.0.4	Proof marks and the examiner	56
3.0.5	Examples of proof marks	56
	Further reading	61
4.0	A Brief History of Ammunition	63
4.0.1	Introduction	63
4.0.2	Basics	63
	Further reading	66
4.1	Ammunition Components	67
4.1.1	Introduction	67
4.1.2	Basics	67
4.1.3	Ammunition types	68
4.1.4	Primer cap types	69
4.1.5	Cartridge cases	70
4.1.6	Shotgun ammunition	73
	Further reading	79
4.2	Bullet Types	81
4.2.1	Introduction	81
4.2.2	Basics	81

4.2.3	Bullet materials	81
4.2.4	Other bullet types	83
4.2.5	Bullet nose configuration	83
4.2.6	Bullet base configuration	85
4.2.7	Bullet lubrication	85
	Further reading	86
4.3	Headstamps and Other Identifying Features on Ammunition	87
4.3.1	Introduction	87
4.3.2	Basics	88
4.3.3	Clandestine ammunition	89
4.3.4	Colour coding of ammunition	90
	Further reading	91
4.4	Non-toxic and Frangible Bullets	93
4.4.1	Introduction	93
4.4.2	Elimination of lead in ammunition	93
4.4.3	Materials used in non-toxic ammunition	94
4.4.4	The current situation	94
	Further reading	96
4.5	Non-toxic Shot	97
4.5.1	Introduction	97
4.5.2	Materials used in non-toxic shotgun ammunition	97
	Suggested further reading	100
4.6	A Brief History of Propellants	101
4.6.1	Introduction	101
4.6.2	Basics	101
4.6.3	Black powder	102
4.6.4	Nitro propellants	104
4.6.5	Dating of ammunition	107
4.6.6	Reduced loads for target shooting	107
	Further reading	108
4.7	Priming Compounds	109
4.7.1	Introduction	109
4.7.2	Basics	110
4.7.3	A short history of priming compounds	110
4.7.4	Manufacture	113
4.7.5	Accidental discharge of primers	113
	Further reading	114
5.0	An Introduction to Ballistics	115
5.0.1	Introduction	115
5.0.2	Basics	115

5.0.3	Background	115
	Further reading	116
5.1	Internal Ballistics	117
5.1.1	Introduction	117
5.1.2	Basics	117
5.1.3	Recoil	118
5.1.4	Barrel pressure	120
	Further reading	121
5.2	External Ballistics	123
5.2.1	Introduction	123
5.2.2	Basics	124
5.2.3	Maximum range of missiles	126
5.2.4	Maximum altitude that a bullet will attain	130
5.2.5	Terminal velocity	131
5.2.6	Use of sight to compensate for bullet drop	132
5.2.7	Other influencing factors	132
5.2.8	Muzzle energy	134
5.2.9	Momentum	135
	Further reading	135
5.3	Terminal Ballistics	137
5.3.1	Introduction	137
5.3.2	Basics	137
5.3.3	General wound ballistic concepts	139
5.3.4	Other factors influencing the wounding capabilities of a missile	144
5.3.5	Bullet performance and 'wounding capabilities'	145
5.3.6	Relative stopping power (RSP)	147
5.3.7	Bullet resistant vests (BRV)	149
	Further reading	152
6.0	A Brief History of Forensic Firearms Identification	153
6.0.1	Introduction	153
6.0.2	Early cases involving bullet identification	154
6.0.3	Use of photomicrographs	154
6.0.4	Identification of weapon from breech face markings	155
6.0.5	Early use of comparison microscope	155
6.0.6	Introduction of the binocular comparison microscope	156
6.0.7	Improvements in illumination	157
6.0.8	Photography of stria	157
6.0.9	Modern technology for stria comparison	157
	Suggested further reading	160
7.0	Basic Concepts of Striation Matching	161
7.0.1	Introduction	161
7.0.2	Basics	162
7.0.3	Identification of weapon type	164
7.0.4	Individual characteristics on cartridge cases	165

7.0.5	Formation of stria	166
7.0.6	Problematical areas	167
	Further reading	172
7.1	Basic Concepts in Comparison Microscopy	173
7.1.1	Introduction	173
7.1.2	Basic methodology and background to stria comparisons	174
7.1.3	Lighting used for comparison microscopy	175
7.1.4	The concept of consecutive matching stria	177
7.1.5	Obtaining control samples	177
7.1.6	Manufacturing marks on ammunition	178
7.1.7	Recovery methods for fired bullets	178
7.1.8	Conclusion	180
	Further reading	181
7.2	The Concept of Consecutive Matching Stria	183
7.2.1	Introduction	183
7.2.2	Basics	183
7.2.3	Arguments for and against the concept of stria comparisons	186
	Further reading	187
7.3	A Statistical Model to Illustrate the Concept of Individuality in Striation Matches	189
7.3.1	Introduction	189
7.3.2	Basics	189
7.3.3	Stria individuality	190
7.3.4	Philosophy	191
	References	193
8.0	Accidental Discharge	195
8.0.1	Introduction	195
8.0.2	Basics	197
8.0.3	Trigger mechanisms	197
8.0.4	Reasons for an accidental discharge	198
8.0.5	Negligent discharges	203
	Further reading	204
9.0	Identification of Calibre from the Bullet Entry Hole	205
9.0.1	Introduction	205
9.0.2	Basics	206
9.0.3	Determination of bullet type	207
	Further reading	208
10.0	Ricochet Analysis	209
10.0.1	Introduction	209
10.0.2	Basics	209
10.0.3	Variables influencing the liability of a missile to ricochet	210
	Further reading	213

11.0	Bullet Penetration and Trajectory through Glass	215
11.0.1	Introduction	215
11.0.2	Glass types and glass substitutes	215
11.0.3	Deviation of missile after penetrating glass	217
11.0.4	Penetration of normal window glass	217
11.0.5	Penetration of laminated and bullet-resistant glass	218
11.0.6	Penetration of tempered or toughened glass	219
11.0.7	Determination of bullet type from the entry hole	220
11.0.8	Deflection of bullet by glass	221
	Further reading and references	223
12.0	Range of Firing Estimations and Bullet Hole Examinations	225
12.0.1	Introduction	225
12.0.2	Basics	225
12.0.3	Range of firing estimations for pistols and rifles	227
12.0.4	Extended range of fire estimations	230
12.0.5	Range of firing estimations on badly decomposed bodies	231
12.0.6	Bullet wipe marks	231
12.1	Chemical Tests for Range of Fire Estimations and Bullet Entry/Exit Hole Identification	235
12.1.1	Introduction	235
12.1.2	Chemical tests for range of firing estimations	235
12.1.3	Range of firing estimations on heavily bloodstained garments	237
12.1.4	Range of firing estimations for non-toxic non-lead primers	238
	Further reading	239
12.2	Range of Fire Estimations for Shotguns	241
12.2.1	Introduction	241
12.2.2	Basics	242
12.2.3	Shotgun cartridges fired in revolvers	246
	Suggested further reading	247
13.0	The Use of X-ray Photography for Projectile Identification	249
13.0.1	Introduction	249
13.0.2	Estimation of calibre from X-ray photographs	250
	Further reading	254
14.0	Gunshot Residue Examination	255
14.0.1	Introduction	255
14.0.2	Basics	256
14.0.3	Identification of GSR Particles	257
14.0.4	The use of the scanning electron microscope (SEM) with energy dispersive X-Ray analysis (EDX) for the detection and analysis of GSR particles	259
14.0.5	Sample collection	260
14.0.6	GSR retention	263
14.0.7	Interpretation of results	264
14.0.8	Identification of type of ammunition and country or origin from GSR composition	265

14.0.9	Environmental contaminants	267
14.0.10	Extending the period over which GSR particles can be recovered	269
14.0.11	General considerations to be made when examining GSR analysis results	272
14.0.12	Discussion	274
	References	275
15.0	Gun Handling Tests	277
15.0.1	Introduction	277
15.0.2	History	278
15.0.3	Methodology for the use of Ferrozine	279
	Further reading	283
16.0	Laser-etched Serial Numbers and Bar Codes	285
16.0.1	Introduction	285
16.0.2	Laser-etched serial numbers	285
16.0.3	Bar codes	286
16.0.4	Conclusion	287
	Further reading	287
17.0	Classification of Firearms-related Death	289
17.0.1	Introduction	289
17.0.2	Basics	289
17.0.3	Multiple shot suicides	290
	References and further reading	293
18.0	Practical Considerations in a Firearms Case from a Legal Point of View	295
18.0.1	Introduction	295
18.0.2	Key questions	296
18.0.3	Legal challenges to forensic firearms evidence in the USA	298
18.0.4	Conclusion	300
	Further reading and references	300
19.0	Qualifying the Expert and Cross-examination Questions	301
19.0.1	Definition	301
19.0.2	Introduction	301
19.0.3	Qualifying the expert	302
19.0.4	General background questions	303
19.0.5	Comparison microscopy	303
19.0.6	Gunshot residue	306
19.0.7	Ferrozine test	308
	Further reading	308
20.0	Chain of Custody	309
20.0.1	Introduction	309
20.0.2	Basics	309
20.0.3	Process	310
20.0.4	In court	310
	Further reading	311

Appendix 1	Standard of Review: ‘Daubert Trilogy’	313
Appendix 2	Commercial and General Abbreviations for Bullet Configurations	317
Appendix 3	Some of the More Common Trade Names	323
Appendix 4	Important dates in the History of Firearms from 1247	335
Appendix 5	Dates for the Introduction of Various Cartridges by Calibre	341
Appendix 6	Some Trademarks Found on Guns	345
Appendix 7	General Firearms Values Conversion Table	349
Appendix 8	Hearing Loss	351
Appendix 9	A List of Handgun Cartridges	355
Appendix 10	A List of Rifle Cartridges	357
Appendix 11	Air Weapon Legislation	361
Index		367
