ACKNOWLEDGMENTS

In writing this guide we have drawn upon the expertise and experience of many of our colleagues in PricewaterhouseCoopers. We would like especially to thank the two people who produced first drafts of specific chapters. They are Damian De Backer (UK) and Brian Morris (US). We would also like to thank those who reviewed our various drafts and provided their thoughts and comments to us as we wrote this guide. In particular these included John Clymer (US), Angus Johnston (UK), Robert van der Laan (Netherlands), Will More-King (UK), Don Munro (Australia), David Shaw (UK), Chris Tierney (US) and John Whiting (UK).

We would also like to thank Michelle Jones who had the task of bringing this all together into one document and for sorting out all the diagrams. Finally we would like to thank our families for their forbearance on too many Sunday afternoons when we should have been giving them our attention, but instead were writing this guide.

To all the people named above, and all the others who gave us their time and encouragement, thank you.
