14. Taxation of Financial Derivatives 797
Preface

This fifth edition of *The Law on Financial Derivatives* has been almost completely re-written since the last edition in 2006. It continues to present a comprehensive analysis of the substantive law of England and Wales and of financial regulation in general as they affect financial derivatives, together with a detailed analysis of the standard market documentation of financial derivatives. Since the last edition there have been approximately 5,000 pages of case law dealing with financial derivatives, a large number of significant cases dealing with financial law more generally, an entirely new tax code governing derivatives contracts, and of course a seismic change in the public policy approach to the regulation of derivatives markets. New chapters dealing in detail with the regulatory developments since the last edition have been added to this book. Of most significance, however, for many readers will be the greatly expanded and reorganised chapters on the documentation issues with financial derivatives.

The methodology which was used in the last edition was developed in my books *The Law of Finance* (London: Sweet & Maxwell, 2009) and a revised practitioner edition, (London: Sweet & Maxwell, 2010); and *Securities Law* (London: Sweet & Maxwell, 2008). Those developments, in essence attempting to conceive of the law of finance as a distinct field of law, have been reflected in this edition. Consequently, this book is both a practical analysis and delineation of derivatives law, and a scholarly analysis of the many legal issues which arise in relation to modern, global financial markets. My aim is to consider the law on financial derivatives in a manner which will be of particular use to those practitioners for whom derivatives are the core of their practice and of use also to those who encounter them only from time to time.

This fifth edition presents analysis of over 100 cases decided since the last edition, as well as a number of new statutes, regulations and pre-legislative policy documents. Such is the volume of case law that is available to the practitioner with the advent of electronic reporting of every case decided in this and many other jurisdictions that the role of the treatise writer has become both more difficult (in that there is much more raw material to synthesise and explain than before) and more essential (in that busy practitioners require a route map and up-dater through the torrents of case law which are theoretically within reach, as well as an analysis of the legal issues). Consequently, this new edition has been substantially re-written so as to explain the shape of the law coherently, as opposed simply to bolting-on mentions of new cases so that the entirety of the discussion loses its shape across successive editions. Since the last edition there has been the global financial crisis which will precipitate a revolution in the legal

**PART A**

**The Documentation and Nature of Derivatives**

1. The Products
   **Overview**
   - The Fundamentals of Financial Derivatives
     - Introduction: The lawyer and the derivative ............................................. 1-01
     - What is a “derivative”? .................................................................................. 1-06
     - Derivative contracts are ancient ideas ......................................................... 1-08
     - Mooted future changes to financial derivatives markets of significance to these definitions ................................................................. 1-11
     - The roots of financial derivatives in options and in obligations to make payment .......................................................... 1-14
     - The two root strategies in creating derivatives ............................................ 1-16
     - The option as the core of derivatives theory ............................................... 1-16
     - The core building blocks ............................................................................. 1-22
   - Why enter into a derivative? 
     - The roots of derivatives products ............................................................... 1-23
     - Speculation .................................................................................................... 1-27
     - Hedging ......................................................................................................... 1-32
     - Asset/liability management .......................................................................... 1-38
     - Arbitrage ....................................................................................................... 1-39
   - Constructing a commercial and legal analysis of financial derivatives ......... 1-44
   - The importance of risk analysis in the law on financial derivatives ............. 1-49
   - The overlap between legal and credit concerns: managing risk ................... 1-52

   **Options**
     - Introduction................................................................................................... 1-55
     - The order of the discussion ......................................................................... 1-56
     - The elements of an option ........................................................................... 1-61
     - A typical transaction .................................................................................... 1-61
     - Commercial risk and the option ................................................................... 1-64
     - Restructuring possibilities with options ...................................................... 1-66
   - General issues in structuring options which inform the legal analysis
     - Introduction ................................................................................................... 1-67
     - Issues with exchange-traded assets .............................................................. 1-68
     - Different ways of exercising an option ......................................................... 1-70
     - Structuring options to resemble swaps, and so forth .................................. 1-73
     - Transactions by confirmation ....................................................................... 1-74
     - The calculation agent ................................................................................... 1-76
     - Automatic exercise ....................................................................................... 1-77
     - Options and title to the underlying assets ................................................... 1-78
     - Specific types of option .................................................................................. 1-79
     - Bond options .................................................................................................. 1-80
     - Equity options ............................................................................................... 1-84

   **Complex options strategies**
     - Fundamentals of synthetic options structures .......................................... 1-86
     - Barrier options and volatility strategies ....................................................... 1-90
     - Convertible bonds ........................................................................................... 1-91

   **Forwards**
     - The nature of a forward ................................................................................ 1-92
     - The inter-relationship of forwards and other derivatives ......................... 1-94

   **Swaps**
     - What is a swap? ............................................................................................... 1-96
     - Sample transaction: an interest rate swap used to manage interest payments on a loan ............................................................. 1-97
     - Elements in ordinary interest rate swap business 
       - Introduction ................................................................................................ 1-101
       - Net payments calculated by reference to a notional amount .................... 1-102
       - Interest rate swaps used for speculation ................................................... 1-103
       - Different types of swap used for speculation ............................................. 1-105
       - That an interest rate swap compels payment .......................................... 1-110
       - The effect of the pricing and structure of swaps ........................................ 1-111
       - Swaps pricing models ................................................................................. 1-113
     - Issues with the analysis of swaps contracts in legal terms ......................... 1-114
     - The financial futures approach to pricing swaps ......................................... 1-121
     - Capital markets arbitrage ........................................................................... 1-123
     - The core importance of the pricing models ................................................. 1-126
     - Caps, collars and floors ................................................................................. 1-129
     - Equity swaps ................................................................................................ 1-130
     - Contracts for Differences ......................................................................... 1-135
     - Hedging
       - The definition of “hedging” ....................................................................... 1-138
       - Risk and inter-connected hedging on derivatives markets
         - Issues with hedging and risk management ............................................... 1-142
         - Systemic risk ............................................................................................. 1-143
         - Potential legal issues with hedging
           - Hedging as a duty .................................................................................... 1-146
           - Loss of hedge on termination of a derivatives contract ......................... 1-148

   **Credit Derivatives**
     - Introduction ................................................................................................... 1-154
     - Credit default swaps
       - The nature of a credit default swap ........................................................... 1-156
       - Illustrations of credit default swaps ........................................................... 1-161
     - Credit default option ..................................................................................... 1-164
     - The commercial objectives in credit derivatives ......................................... 1-165
     - The credit event ............................................................................................ 1-170
     - Events of default
       - Materiality and publicly available information ......................................... 1-173
       - Failure to perform ....................................................................................... 1-179
       - Cross default and cross acceleration ......................................................... 1-180
     - Credit downgrade clauses ........................................................................... 1-181
CONTENTS

Credit default swaps, Securitisations and Collateralised Debt
Obligations
The nature of securitisation products
Securitisations containing credit default swaps
Collateralised debt obligations ("CDO's")
The insurance issue
Confirmation
Issues with documentation and complexity
Foreign Exchange Derivatives
Currency options
Currency swaps
Cross-currency interest rate swaps

2. Confirmations and Master Agreements
Overview
Introduction
The scope of this chapter
Key issues with financial derivative contracts
The role of the lawyer in derivatives contracts
The documentation architecture
The cross-border, multi-jurisdictional context
The four dimensions of the contract
The single agreement approach
The central role of the "single agreement" approach
The insolvency law context of the single agreement approach
Doubts about the efficacy of the single agreement approach in the case law
Whether the single agreement approach is artificial in general terms
The calculation agent
The confirmation
Introduction
The creation of a contract
The mechanics of contract formation
Sources both of the contract and of confusion between the parties
Reasons for absence of documentation
Absence of documentation and the use of interim confirmations
The relationship between confirmation and master agreement
Terms of a confirmation and credit risk
The position without a master agreement; and standard market practice
The structure of a confirmation

Points to watch on the confirmation
General drafting issues
Commercial and regulatory points in confirmations
Credit points to watch
Failure of the basis of the contract
Market disruption, exceptional events and frustration of contract
Market disruption
The occurrence of frustration of contract
Force majeure
Maximum volatility clause and purpose of contract provisions: reducing risk for buyers of derivatives
Extraordinary event
Failure to deliver or to make payment
Failure to deliver
Failure to make payment
Default interest, termination and penalty clauses
The requirement of default interest and the rule against penalty clauses
Whether the ISDA early termination procedure constitutes a penalty clause
Mistake
Market publication error
Party error
An Overview of the ISDA Master Agreement
Meeting the ISDA Master Agreement
The terms and structure of the master agreement
The purposes of the ISDA Master Agreement
The interaction of the ISDA Master Agreement with other documentation
The structure of the ISDA Master Agreement and its key terms
Further materials
The Master Agreement
Introduction
The role of the master agreement
A history of the documentation of derivatives
Weaknesses with master agreement structures
Interpretation
Late payment
Condition precedent
The difficulties with the interpretation of section 2
Does the section 2(a)(iii) condition precedent effect a once-and-for-all termination or merely a suspensory termination of the obligation to make payment?
Does the condition precedent in section 2(a)(iii) prevent netting under section 2(c)7?
One suggested solution
CONTENTS

Exclusion of liability
Exclusion of liability clauses and conduct of business ........7-70
Gross negligence outwith an exclusion clause: Camerata Property Inc v Credit Suisse Securities (Europe) Ltd........7-71
Complete refusal to be bound from the outset among market counterparties..........................7-74

Fraud
Introduction..................................................7-75
The tort of deceit (fraud)
The basis of liability............................................7-77
The nature of the misrepresentation necessary to found liability..............................................7-81
The measure of damages for fraudulent misrepresentation..........................7-84
Fraudulent misdescription......................................7-87
Deceitful omission...............................................7-91
Active deceit.....................................................7-93
Fraudulent misrepresentation under statute........................7-95
Equitable Fraud: Undue Influence
Introduction: The Bundy model of undue influence in derivatives transactions..........................7-96
Undue influence under the general law.........................7-100
Undue influence in financial derivatives transactions........7-103
Suitability both in procedure and in substance: Morgan Stanley UK Group v Puglisi Consento........7-107

Damages for Negligent Misrepresentation under Statute
The basis of liability under statute................................7-112
No damages where the claimant failed to read the documentation...........................................7-114
The Tort of Negligence and Negligent Misstatement
The tort of negligence............................................7-115
Negligent misstatement under the general law................7-120
Thinking more broadly about liability for mispredictions..........................7-127
Condition Precedent.............................................7-132
Mistake..........................................................7-135
Fiduciary Liability...............................................7-136
The self-dealing principle.......................................7-140
The fair-dealing principle........................................7-143
Breach of Trust and the Liability of Strangers
Introduction..................................................7-145
Breach of trust....................................................7-146
Dishonest assistance
The basis of liability............................................7-148
The objective test for dishonesty in Royal Brunei Airlines v Tan...7-149
CONTENTS

8. The Performance and Interpretation of Derivatives Contracts
   Overview .................................................. 8-01
   Introduction ............................................... 8-02
   Performance of payment obligations ................. 8-05
   Impact of failure to pay ................................ 8-05
   Dispute as to calculation of amounts ................ 8-06
   Date of due payment .................................... 8-07
   Payment netting ......................................... 8-08
   Errors and Confusions in the Contracting Process ...
   The types of claim which may result from errors and confusions in the contracting process ........ 8-09
   The range of circumstances giving rise to a legal dispute .............................................. 8-13
   The different types of litigant and client classification ................................................. 8-15
   Mistake and misunderstandings ................. 8-15
   Some of the types of mistakes and misunderstandings which arise in financial markets ......... 8-20
   Problems with managing the documentation of derivatives in practice .......................... 8-23
   That basic mistakes and misunderstandings can occur in the largest and most significant transactions, as well as in the smallest .................. 8-24
   Interpretation of Contracts .............................
   Understanding the basic approaches to the interpretation of contracts ......................... 8-25
   The English law approach in summary ............... 8-32
   The central principle in Investors Compensation Scheme v West Bromwich Building Society ... 8-36
   The five principles as interpreted latterly ............ 8-37
   The perspective of the reasonable person ............. 8-38

Reference to “absolutely anything” in the background circumstances .............................................. 8-40
The effect of admitting “absolutely anything”, and its subsequent restriction ......................... 8-42
Only relevant background may be admitted in evidence ......................................................... 8-45
The meaning as perceived by the reasonable man ................................................................. 8-46
The natural and ordinary meaning of words ................................................................. 8-47
Interpretation in accordance with commercial common sense ............................................. 8-50
The effect of the Investors Compensation Scheme approach and its similarity to previous principle ........................................... 8-52
That the courts will not interpolate provisions they would have preferred to see ................. 8-55
Interpretation of a master agreement so as to validate the contract ........................................ 8-56
Interpretation and rectification of contracts ................................................................. 8-57
Dispute as to calculation of amounts ................................................................. 8-59
Frustration of contract .................................................................................................
Express contractual provision ........................................ 8-61
At common law ................................................
Impossibility of performance ........................................... 8-63
Impossibility of acquiring the price of the underlying asset ............................................ 8-64
Executory or segmental contracts ........................................ 8-66
Affecting only one party’s performance ........................................ 8-67
Distinguishing between impracticability and abnegation of purpose .................................... 8-68
Mistake ................................................................
Mistake in general .............................................. 8-69
Unilateral and common mistake ................................. 8-70
Defining mistake: the four categories ........................................ 8-71
Common mistake: mutual mistake .............................. 8-72
Common mistake: misunderstanding or miscommunication .............................................. 8-73
The theoretical basis for avoiding contracts for common mistake ........................................ 8-75
Unilateral mistake ................................................ 8-76
Non est factum ................................................... 8-83
The basis of the common law on mistake ................................................................. 8-84
The requirement that there be an operative mistake ......................................................... 8-86
Mistakes of fact and mistakes of law ......................................................... 8-87
Examples of the different types of mistake specifically in derivatives transactions .............. 8-87
The theoretical basis of the English law on mistake in derivatives ........................................ 8-90
The interaction of the doctrine of mistake with other doctrines ........................................... 8-96
The relegation of the doctrine of mistake behind the interpretation of contracts .... 8-97
CONTENTS

9. Termination and Restitution in Derivatives Transactions
Overview
Introduction
The scope of this chapter ......................................................... 9-01
Limits of the ISDA termination procedures
The termination of transactions in the master agreement.............. 9-02
Situations in which the master agreement will and will not apply ................................................................................. 9-03
The problem of unenforceable contracts ................................ 9-06
Some relevant deficiencies in standard market documentation ......................................................................................... 9-10
The discussion to follow .......................................................... 9-14

Personal Claims for Restitution of Payments
Introduction
Personal restitutionary claims for money at common law; money had and received ................................................................. 9-15
The basis of the claim for money had and received ................. 9-16
The size of the remedy .............................................................. 9-20
Failure of consideration; absence of consideration ................. 9-21
A novel doctrine of absence of consideration in Westdeutsche Landesbank Girozentrale v Islington LBC ......................... 9-22

The interaction of mistake, conditions precedent and implied contractual terms ................................................................. 8-99
The interaction of rectification of contracts and mistake .......... 8-102
The inter-action of mistake and misrepresentation .................. 8-103
Mistake in equity .................................................................... 8-104

Mistreatment
Introduction .............................................................................. 8-112
Misrepresentation
At common law ........................................................................ 8-113
Negligent misrepresentation in tort ......................................... 8-114
Misrepresentation under statute ............................................. 8-115

Breach of contract
Introductory .............................................................................. 8-117
Express contractual provision ................................................. 8-119
Effects of breach of contract: Rescission ................................. 8-121
Effects of breach of contract: Damages for breach of contract
The measurement of damages for breach of a derivatives contract ......................................................................................... 8-122
Damages limited to the purposes for which the contract was created ......................................................................................... 8-125
Effects of breach of contract: Specific performance ................. 8-127

Specific performance
Specific performance in general terms ..................................... 8-128
Specific performance in money transactions .......................... 8-131
Non-availability of specific performance ................................ 8-134
Termination .............................................................................. 8-137

The roots of the doctrine of failure of consideration .................. 9-25
Restitution of unjust enrichment
The background ...................................................................... 9-32
The basis of unjust enrichment .............................................. 9-36
Mistake .................................................................................... 9-40
Mistakes of fact ........................................................................ 9-41
Mistakes of law ......................................................................... 9-44
Part-performed and fully-performed contracts
No distinction made between open and closed swaps .............. 9-48
Distinguishing between swaps and annuities ........................ 9-55
Failure of consideration and partial performance ................... 9-57
Getting what you expected ...................................................... 9-60

Restitution by rescission
Rescission in the local authority swaps cases ......................... 9-61
Rescission based on mistake or on misrepresentation ............. 9-65
Loss of the right to rescind in general terms ............................ 9-69
Specific performance ............................................................ 9-71
Rectification of contracts ......................................................... 9-73

Proprietary Claims and Actions
Introduction .............................................................................. 9-77
The nature of the trust in derivatives transactions
When proprietary claims will be available .............................. 9-78
When proprietary claims will be available under a void contract ......................................................................................... 9-82
Express trusts ........................................................................... 9-84
Resulting trusts ......................................................................... 9-86

Construcative trusts
The creation of proprietary rights under constructive trust ................................................................................................. 9-88
The manner in which a constructive trust comes into existence ......................................................................................... 9-89
The role of constructive trust in commercial cases ................. 9-90

Tracing
Tracing in general terms ........................................................ 9-91
Common law tracing .............................................................. 9-92
Equitable tracing ....................................................................... 9-95
Loss of the right to trace in equitable tracing claims .............. 9-97

Equitable tracing into current bank accounts ......................... 9-100
Remedies in equitable tracing actions .................................... 9-105
Defences to equitable tracing claims ........................................ 9-113
Issues generated by the local authority swaps cases in relation to tracing ................................................................. 9-121

Compound interest ................................................................... 9-123
Case study: The local authority swaps cases
Introduction .............................................................................. 9-129
The decision in Westdeutsche Landesbank Girozentrale v Islington LBC, in outline .......................................................... 9-131
The context of local authority funding .................................... 9-132
10. Conflict of Laws

Overview
Introduction.................................................................10-01
Globalisation and conflict of laws....................................10-02

Contract and the Conflict of Laws in General Terms
The principal issues in relation to derivatives contracts in the
conflict of laws.............................................................10-07
Distinguishing between choice of law and choice of
jurisdiction.................................................................10-09
Supervening illegality or unenforceability............................10-10
The traditional English common law approach to contracts in
conflict of laws.............................................................10-11

Choice of Law under The Rome Convention: Contracts created on
or before December 17, 2009
The sources of law on contract in conflicts of law......................10-12
The legal architecture.......................................................10-14
The scope of the Rome Convention....................................10-16

The applicability of the Rome Convention.................................10-19

Issues relating to choice of law........................................10-20

Express choice of law..................................................10-2:
Supplying the governing law where the parties have no contract
in writing, or where there is only an inferred governing law
provision.................................................................10-24

Governing law applying to a part only of the contract.................10-27
Mandatory rules............................................................10-28
No express choice of law................................................10-29
Illegal contracts..........................................................10-33
The time of the creation of a derivatives contract......................10-36

Choice of law under the Rome I regulation: Contracts created after
December 17, 2009
Introduction.................................................................10-37
Choice of law under the Regulation.....................................10-38
Failure to make a choice of law..........................................10-39
Mandatory rules............................................................10-42

PART C
Taking Security

11. Taking Security

Overview
The means of taking security
An outline of the discussion........................................11-01
The scope of this chapter..............................................11-02
Collateralisation in outline...........................................11-06
Transfers of title.........................................................11-11
CONTENTS

12. Collateralisation and Credit Support Agreements
Overview
Understanding collateralisation
Introduction
The two principal forms of collateral
The purpose of collateral arrangement
The utility of two-way collateral
Commercial issues with collateral structures
The requirement for collateral
The type of asset taken as collateral
Measurement of exposure and of the level of collateral
Formalities and regulatory requirements
Title in the collateral assets
Role of the custodian
Central clearing houses
The EC Collateral Directive 2002
The enforceability of collateral arrangements
The Directive in outline
"Title transfer" arrangements
"Security financial collateral" arrangements
Certainty of subject matter in collateral arrangements
Enforceability of set-off and netting
Financial Collateral Arrangements (No.2) Regulations 2003
The scope of the Collateral Regulations

CONTENTS xxxii

Trusts
The nature of trusts .................................................. 11–16
Creation of express trusts
Requirements of certainty ........................................... 11–22
The particular problem of certainty of subject matter .... 11–25
The rights of beneficiaries ........................................... 11–29
The constitution of trusts .......................................... 11–30
The duties of trustees ............................................... 11–32
Breach of trust ......................................................... 11–39
Trusts implied by law ................................................ 11–40
Proprietary rights under void contracts ...................... 11–45
The impact of the continued failure of the derivatives markets
to react to the decision in *Westdeutsche Landesbank Girozentrale v Islington LBC* on systemic risk .. 11–46
Conditions on the use of "loan property" and "pledged collateral"
The use of lending arrangements .............................. 11–47
Romalpa clauses—retention of rights in property ......... 11–49
Quistelose trusts ....................................................... 11–51
Mortgages and Charges
The distinction between mortgages and charges .......... 11–62
Legal mortgages
The nature of the law of mortgages ............................ 11–63
Legal mortgages of land ......................................... 11–64
Legal mortgages of personality ................................ 11–66
The mortgagor's remedies
The available remedies ......................................... 11–70
The mortgagor's power of sale ................................ 11–71
The extension of the power of sale to charges and liens .. 11–72
The right of foreclosure ......................................... 11–73
The right of possession ........................................... 11–75
The right to appoint a receiver ................................ 11–76
The rights of the mortgagor ..................................... 11–77
Equitable mortgages
The nature of an equitable mortgage ......................... 11–81
The nature of charges ........................................... 11–85
Distinguishing charges from other structures .......... 11–86
Whether or not a charge may create a proprietary right 11–87
Fixed charges
The nature of a fixed equitable charge ...................... 11–89
Certainty of subject matter .................................... 11–91
The remedies of the chargee .................................. 11–92
Floating charges ....................................................... 11–93
Charges over book debts
Registration of a book debt as a charge ................. 11–97
The particular problem of future book debts .......... 11–100
The book debt and its proceeds capable of being subject to separate security interests .......... 11–104
A "specific charge" over book debts ......................... 11–107
Pledges ................................................................. 11–108
The form of pledge used in some ISDA documents, which is in truth a transfer of title .................. 11–110
Liens ........................................................................ 11–117
Possessory lien ....................................................... 11–118
General lien .......................................................... 11–119
Particular lien ........................................................ 11–122
Contractual lien ...................................................... 11–123
Equitable lien .......................................................... 11–134
Guarantees and indemnities
The distinction between guarantees and indemnities 11–126
The formalities required for a guarantee ................. 11–127
Guarantees forming part of a larger transaction ......... 11–131
Guarantees in variable amounts; notice ................. 11–134
Enforceability of guarantee
Informal guarantee unenforceable, not void .......... 11–135
Other contexts in which a guarantee will be unenforceable ......................................................... 11–136
Recission for non-disclosure .................................... 11–137
Alteration in the nature of the guarantor's obligation .. 11–138
Commercial issues with the drafting of guarantees .. 11–142
Netting ................................................................. 11–143
Letter of Comfort .................................................... 11–144

http://www.pbookshop.com
The collateral structures as defined under the Collateral Regulations
Title transfer arrangements
Security arrangements
Legislative carve-outs in the Collateral Regulations
Personal collateral
Enforceability of mortgage under Collateral Regulations without the need for a court order for foreclosure
Realisation of the collateral
"Appropriation" of property in satisfaction of the right
Miscellaneous
ISDA collateralisation documentation
The two principal types of collateralisation
Personal collateralisation: The ISDA Credit Support Annex
The structure of personal collateral arrangements
A worked example of a personal collateral arrangement
The ISDA terminology for this structure
The manner in which this structure provides security
Credit support obligations
Transfers
Calculations and dispute resolution
Title in transferred property
Representation as to title in collateral property
Default
Proprietary collateralisation: The ISDA Credit Support Deed
Taking a right secured over property
The problem in identifying the nature of the property right in the standard contractual language
The release of the security
The preservation of the security
Custom of the collateral property
Rights of enforcement
Collateral terms in the master agreement
Legal issues in collateral structures
Distinguishing between transfer of title, pledge, and trust over collateral
Proprietary rights under global notes
Shortcomings in standard market documentation for collateral
Insolvency and collateral

13. Set-off, Netting and Insolvency
Overview
Introduction
The significance of set-off in derivatives contracts
Close-out netting and systemic risk
An introduction to the terminology
The nature of set-off
The definition and scope of "set-off"

Categories of set-off under statute and at common law
Statutory set-off
Set-off at common law
Equitable set-off
Issues with set-off and the identification of the amount payable in a single derivatives transaction
The nature and types of netting
Introduction
The definition of "netting"
The nature and purpose of netting
Novation netting
Payment netting
Close-out netting
Recision as an alternative to netting in non-money claims
Insolvency of financial institutions
When is a financial institution insolvent?
The question of insolvency under the general law
The question of bank insolvency under the Banking Act 2009
Bank insolvency in general terms
Insolvency and investment banks
Bank administration: The fundamentals of bank administration
The objectives of the bank administrator
Set-off on insolvency
The core questions relating to insolvency set-off
The central principles
The statutory principle in rule 4.90 of the Insolvency Rules
The mutuality requirement
The obligation to set-off
The calculation process
The development of the modern law on close-out netting on insolvency
Multi-party netting agreements, clearing houses and the pari passu principle
The problem posed by British Eagle International Airlines v Air France and the pari passu principle
Bilateral set-off on insolvency: Stein v Blake and BCCI (No. 8)
Transactions with third parties not within rule 4.90: Limiting multiparty netting
The Settlement Finality Regulations, clearing and the pari passu principle
The anti-deprivation rule
Introduction
The anti-deprivation principle after Belmont Park Investments Pty Ltd v BNY Corporate Trustee Services Ltd
The ratio decidendi in Belmont Park Investments v BNY Corporate Trustee Ltd
CONTENTS

Difficulties with this decision ............................................................ 13–91
Contingent interests and narrow rights in insolvency situations ............... 13–96
The rule against double proof ............................................................. 13–98
Set-off and conflict of laws .................................................................. 13–99
General issues relating to set-off in derivatives transactions
The effectiveness of the standard form contracts ...................................... 13–100
The problem of part-performed executory contracts ............................... 13–101
Close-out netting and access to collateral ............................................. 13–104
Set-off and clearing ............................................................................. 13–105

PART D
Regulation and Taxation

14. Taxation of Financial Derivatives
Overview
Introduction
The scope and nature of the taxation of financial derivatives .................. 14–01
Tax provisions in master agreements .................................................... 14–10
The taxation of “derivative contracts”: Corporation Tax Act 2009
Part 7
The fundamentals of the “derivative contracts” regime ............................ 14–15
The scope of Part 7: “Derivatives contracts” and “relevant contracts”
The scope of the terms “derivatives contracts” and “relevant contracts” ........ 14–20
The definition of “derivative contract” .................................................. 14–21
The categories of “relevant contract” in detail ....................................... 14–22
Exclusions
The scope of exclusions from the derivative contract code ....................... 14–32
Method of taxation
Methodology: credits and debits; fair value and expenses ..................... 14–36
Fair value accounting ........................................................................ 14–38
Expenses and the ISDA “single agreement” approach ............................ 14–40
Anti-avoidance
Introduction ....................................................................................... 14–42
Case law on anti-avoidance in general terms ........................................ 14–43
The Scottish Provident litigation: Artificial tax avoidance schemes and derivatives
Doubling the ISDA “single agreement” approach in tax avoidance cases ...... 14–48
House of Lords: Confronting artificial tax avoidance schemes which use derivative instruments ........................................ 14–50

15. The Development of Derivatives Regulation
Overview
Introduction
The scope of this chapter .................................................................. 15–01
The discussion of current regulatory policy in this book ......................... 15–03
One market or several markets? ............................................................ 15–04
A history of derivatives regulation
The historical lack of systematic regulation of derivatives markets ............ 15–08
The reasons for the failure to regulate derivatives in the United States before the Dodd-Frank Act ......................................................... 15–14
The development of over-the-counter derivatives markets ..................... 15–16
The sources of derivatives regulation .................................................... 15–21
The global financial crisis 2006–2011 .................................................... 15–22

16. EU Regulation of Financial Services
Overview
Introduction
A brave new world in EU financial regulation .................................... 16–01
Five key themes in EU financial regulation ......................................... 16–04
General financial services regulation
The core provisions of the EC Treaty impacting on financial services ....... 16–05
The Lamfalussy process
Introduction ....................................................................................... 16–06
The Lamfalussy report ....................................................................... 16–07
The Lamfalussy process
The four tier process ......................................................................... 16–11
Harmonisation agenda ...................................................................... 16–16
The passporting objective .................................................................. 16–17
CONTENTS

"MiFID": Regulation of investment services
The core objectives of MiFID ........................................ 16–18
The benefits which are expected to flow from MiFID ......... 16–23
The categories of activity regulated by MiFID ................. 16–24
Authorisation and organisation of investment firms
Introduction ................................................................. 16–25
Authorisation of investment firms .................................. 16–26
Organisation of investment firms .................................... 16–27
Passporting ....................................................................... 16–28
Securities markets and market transparency in MiFID
The market coverage in MiFID in the abstract ................. 16–30
Regulated markets .......................................................... 16–31
Market transparency and integrity ..................................... 16–32
The reform agenda: “MiFID II”
Introduction ..................................................................... 16–34
The mechanisms for delivering financial products .......... 16–35
Conduct of business reform ............................................. 16–36
The power to intervene and to demand information in relation to derivative positions ............................................ 16–38
Sanctions .......................................................................... 16–40
The high-level policy impetus ............................................ 16–41
Banking regulation ......................................................... 16–42
Stability mechanisms within the European Union ......... 16–43
Proposals for derivatives regulation
Fundamentals of regulatory policy in the European Union
Introduction ..................................................................... 16–46
Regulatory policy relating to derivatives in the European Union
The five central objectives ............................................... 16–47
The policy objectives of the European Union ................. 16–50
The de Larosière Report
Fundamental policy assumptions in the report ............... 16–52
Macro-economic causes of the crisis ............................... 16–54
Themes in risk management ........................................... 16–58
The development of the crisis .......................................... 16–61
Regulatory and supervisory failures ............................... 16–63
Measurement issues ....................................................... 16–68
“Closing the gap in regulation” ....................................... 16–69
“Equipping Europe with a consistent set of rules” ....... 16–72
“EU supervisory repair” ................................................. 16–74
The new regulatory structure ......................................... 16–77
“Global repair” ............................................................. 16–79
EU policy after the de Larosière Report ......................... 16–80
The proposed derivatives regulations
Underlying policy objectives ........................................... 16–81
The proposed OTC derivatives clearing and trade repository regulation ("EMIR") ................................................ 16–82
The provisions of the draft regulation, “EMIR”
Introduction ................................................................. 16–86
Clearing ........................................................................... 16–87

17. UK Regulation of Derivatives and Finance
Overview
Introduction ................................................................. 17–01
The structure of the law of finance
The current position ...................................................... 17–03
The reform agenda for 2012 and afterwards .................. 17–07
The regulation of finance in the United Kingdom
The activities which are regulated under the Financial Services and Markets Act 2000 ........................................ 17–09
Conduct of business regulation
The source of conduct of business regulation .................. 17–10
The core obligations of a regulated entity ....................... 17–14
The client’s best interest principle ................................. 17–17
The provision of information ......................................... 17–18
Client classification and suitable treatment ................. 17–19
Procurig “best execution” for the customer ................. 17–20
Fiduciary dimensions to the regulated entity’s obligations .......................................................... 17–21
Financial promotion ....................................................... 17–22
Money Laundering ......................................................... 17–23
Market abuse
Introduction ..................................................................... 17–24
Regulation of market abuse by the FSA ......................... 17–25
Insider dealing ............................................................... 17–26
Market manipulation offences ....................................... 17–27
Banking regulation in the United Kingdom
Introduction ................................................................. 17–28
The current position ...................................................... 17–29
The statutory roles of the Bank of England ................. 17–30
18. US Regulation of Derivatives

Overview
Introduction
The scope of this chapter .................................................. 18-01
The context of the response to the global financial crisis in the
United States ............................................................... 18-03
The context of the US regulatory architecture ...................... 18-06
The Wall Street Amendment and Transparency Act 2010
"The Dodd-Frank Act"
The scope of the Act ....................................................... 18-11
The gestation of the Act .................................................... 18-12
The principal provisions of the WSATA 2010
The scope of this discussion ............................................. 18-14
The underlying policies of the WSATA 2010 ......................... 18-15
The organisation of the WSATA 2010 ................................ 18-17
The regulation of over-the-counter swaps markets
Structural organisation of regulation: The regulatory
authorities ................................................................. 18-18
Explicit regulatory powers to intervene in markets ............... 18-20
Abusive swaps ............................................................... 18-21
Prohibition of participation in swap activities ...................... 18-22
Prohibition against federal government bailouts ................. 18-23
Novel products ............................................................. 18-26
Clearing of swap transactions ......................................... 18-27
The operation of derivatives clearing organisations .............. 18-29
Treatment of collateral and margin .................................. 18-31
Reporting swap transaction data ...................................... 18-32
Anti-disruptive practices authority ................................... 18-33
Other initiatives ............................................................ 18-34
Security-based swaps ...................................................... 18-35
The conduct of derivatives business by American financial
institutions
Dividing between traditional banking and speculative
finance ................................................................. 18-36
Ring-fencing ordinary banking activity off from proprietary
derivatives trading ....................................................... 18-38
The duty to conduct studies ............................................. 18-39
The Aftermath ................................................................ 18-40

Index .............................................................................. 947
