ACKNOWLEDGMENTS

I owe the opportunity to work on this book to a great many people, but primarily to Emmanuel Daniel, President and CEO of The Asian Banker, who brought me into the industry and opened up countless opportunities to me. He's the real reason this book even exists.

I also want to thank the many wonderful contributors to this book, who took time out of their busy schedules to commit their thought leadership to the project. The incidents that they have encapsulated are part of something that is so much bigger than any of us, but affects us all, and the insights provided by their cumulative wisdom is invaluable.

Many others have offered their indispensable support; there are my wonderful colleagues at The Asian Banker, including my direct co-workers Valen, Aldo, Arush and Lalitha, who are always there for me; there are my associates Antonio, James and Val, who keep everything in perspective; there is my great friend Nick Wallwork, my publisher, and all of the wonderful people at Wiley & Sons like Joel Balbin, who have tirelessly assisted me on putting this wonderful work together; and finally, there is Philippe Paillart, who has always shown me the most incredible and inspiring support.
