

# Contents

<b>Preface</b>	<b>ix</b>
“Rates” Market	ix
Background	ix
Book Structure	xi
Acknowledgments	xvii
<b>About the Author</b>	<b>xix</b>
<b>List of Symbols and Abbreviations</b>	<b>xxi</b>
<b>PART ONE</b>	
<b>Cash, Repo, and Swap Markets</b>	<b>1</b>
<b>CHAPTER 1</b>	
<b>Bonds: It’s All About Discounting</b>	<b>3</b>
Time Value of Money: Future Value, Present Value	3
Price-Yield Formula	5
PV01, PVBP, Convexity	11
Repo, Reverse Repo	16
Forward Price/Yield, Carry, Roll-Down	19
<b>CHAPTER 2</b>	
<b>Swaps: It’s Still About Discounting</b>	<b>25</b>
Discount Factor Curve, Zero Curve	26
Forward Rate Curve	27
Par-Swap Curve	31
Construction of the Swap/Libor Curve	34
<b>CHAPTER 3</b>	
<b>Interest Rate Swaps in Practice</b>	<b>43</b>
Market Instruments	43
Swap Trading—Rates or Spreads	48

vi	CONTENTS
Swap Spreads	51
Risk, PV01, Gamma Ladder	56
Calendar Rules, Date Minutiae	59
<b>CHAPTER 4</b>	
<b>Separating Forward Curve from Discount Curve</b>	<b>67</b>
Forward Curves for Assets	67
Implied Forward Rates	69
Float/Float Swaps	70
Libor/Libor Basis Swaps	73
Overnight Indexed Swaps (OIS)	75
<b>PART TWO</b>	
<b>Interest-Rate Flow Options</b>	<b>77</b>
<b>CHAPTER 5</b>	
<b>Derivatives Pricing: Risk-Neutral Valuation</b>	<b>79</b>
European-Style Contingent Claims	80
One-Step Binomial Model	80
From One Time-Step to Two	84
From Two Time-Steps to . . .	90
Relative Prices	91
Risk-Neutral Valuation: All Relative Prices Must be Martingales	92
Interest-Rate Options Are Inherently Difficult to Value	93
From Binomial Model to Equivalent Martingale Measures	94
<b>CHAPTER 6</b>	
<b>Black's World</b>	<b>97</b>
A Little Bit of Randomness	97
Modeling Asset Changes	103
Black-Scholes-Merton/Black Formulae	104
Greeks	112
Digitals	116
Call Is All You Need	117
Calendar/Business Days, Event Vols	120
<b>CHAPTER 7</b>	
<b>European-Style Interest-Rate Derivatives</b>	<b>123</b>
Market Practice	124
Interest-Rate Option Trades	124

<i>Contents</i>	<b>vii</b>
Caplets/Floorlets: Options on Forward Rates	125
European-Style Swaptions	129
Skews, Smiles	137
CMS Products	140
Bond Options	147
<b>PART THREE</b>	
<b>Interest-Rate Exotics</b>	<b>149</b>
<b>CHAPTER 8</b>	
<b>Short-Rate Models</b>	<b>151</b>
A Quick Tour	152
Dynamics to Implementation	153
Lattice/Tree Implementation	154
BDT Lattice Model	156
Hull-White, Black-Karasinski Models	168
Simulation Implementation	169
<b>CHAPTER 9</b>	
<b>Bermudan-Style Options</b>	<b>175</b>
Bellman's Equation—Backward Induction	176
Bermudan Swaptions	177
Bermudan Cancelable Swaps, Callable/Puttable Bonds	180
Bermudan-Style Options in Simulation Implementation	183
<b>CHAPTER 10</b>	
<b>Full Term-Structure Interest-Rate Models</b>	<b>185</b>
Shifting Focus from Short Rate to Full Curve: Ho-Lee Model	186
Heath-Jarrow-Morton (HJM) Full Term-Structure Framework	186
Discrete-Time, Discrete-Tenor HJM Framework	188
Forward-Forward Volatility	191
Multifactor Models	197
HJM Framework Typically Leads to Nonrecombining Trees	199
<b>CHAPTER 11</b>	
<b>Forward-Measure Lens</b>	<b>201</b>
Numeraires Are Arbitrary	201
Forward Measures	206
BGM/Jamshidian Results	208

<b>viii</b>	<b>CONTENTS</b>
Different Measures for Different Rates	210
“Classic” or “New Improved”: Pick Your Poison!	212
<b>CHAPTER 12</b>	
<b>In Search of “The” Model</b>	<b>215</b>
Migration to Full-Term Structure Models	215
Implementation Era	216
Model versus Market: Liquidity and Concentration Risk	216
Complexity Risk	217
Remaining Challenges	218
<b>APPENDIX A</b>	
<b>Taylor Series Expansion</b>	<b>219</b>
Function of One Variable	219
Function of Several Variables	220
Ito’s Lemma: Taylor Series for Diffusions	220
<b>APPENDIX B</b>	
<b>Mean-Reverting Processes</b>	<b>223</b>
Normal Dynamics	224
Log-Normal Dynamics	226
<b>APPENDIX C</b>	
<b>Girsanov’s Theorem and Change of Numeraire</b>	<b>229</b>
Continuous-Time, Instantaneous-Forwards	
HJM Framework	230
BGM Result	232
<b>Notes</b>	<b>235</b>
<b>Index</b>	<b>239</b>
