<b>CHAPTER 1</b>	Introduction	1
	Development of the Field of Litigation Economics	2
	Development of the Field of Forensic Accounting	3
	Qualifications of an Economic Expert	5
	Qualifications of an Accounting Expert on Damages	8
	Interdisciplinary Nature of Commercial Damages Analysis	8
	Difference Between Disciplines of Economics and Finance	10
	Finding a Damages Expert	11
	Critically Reviewing a Potential Expert's Curriculum Vitae	12
	Getting the Damages Expert on Board Early Enough	18
	Courts' Position on Experts on Economic Damages	19
	Standards for Admissibility of Expert Testimony	21
	Exclusion of Experts	25
	Trends in <i>Daubert</i> Challenges to Financial Experts	25
	Expert Reports	28
	Defense Expert as a Testifying Expert, Not Just a Consultant	33
	Quantitative Research Evidence on the Benefits of Calling a Defense Expert	35
	Treatment of the Relevant Case Law	36
	Legal Damage Principles	36
	Other Types of Damages Cases	42
	Summary	46
	References	46

<b>CHAPTER 2</b>	Economic Framework for the Lost Profits Estimation Process	51
	Foundation for Damages Testimony	51
	Role of Assumptions in Damages Analysis	52
	Hearsay	53
	Approaches to Proving Damages	55
	Causality and Damages	59
	Using Demonstrative Evidence to Help the Client	
	Understand Its Losses or Lack of Losses	67
	Causality and Loss of Customers	68
	Graphical Sales Analysis and Causality	69
	Causality and the Special Case of Damages Resulting from Adverse Publicity	71
	Length of Loss Period: Business Interruption Case	72
	Length of Loss Period: Plaintiff Goes Out of Business	77
	Length of Loss Period: Breach of Contract	78
	Methodological Framework	79
	Summary	82
	References	83
<b>CHAPTER 3</b>	Economic Analysis in Business Interruption	
	Loss Analysis	85
	Economic Fluctuations and the Volume of Litigation	85
	Macroeconomic Analysis	86
	Definition of a Recession	86
	Measuring Economic Growth and Performance	87
	Business Cycles and the Movement of GDP Components	90
	Business Cycles and Economic Damages	95
	Varying Responses to Business Cycles Across Industries	97
	Using More Narrowly Defined Economic Aggregates	99
	Quantifying the Strength of the Relationship Between Selected Economic Aggregates and Firm Performance	101
	Implementing Inflationary Adjustments	104
	Regional Economic Trends	108
	Quality and Timeliness of Regional Economic Data	109
	International Economic Analysis	111
	Globalization of Supply and Demand	113
	Summary	115
	References	116

<b>CHAPTER 4</b>	Industry Analysis	119
	Sources of Industry Data	119
	North American Industry Classification System	125
	Retaining an Industry Expert	132
	Conducting an Industry Analysis	133
	Relating Industry Growth to the Plaintiff's Growth	136
	Other Industry Factors	138
	Yardstick Approach and Industry Analysis	141
	Summary	144
	References	145
<b>CHAPTER 5</b>	Projecting Lost Revenues	147
	Projections Versus Forecasts: Economic Versus Accounting Terminology	147
	Using Graphical Analysis as an Aid in the Forecasting Process	148
	Methods of Projecting Lost Revenues	153
	Curve-Fitting Methods and Econometric Models	158
	Understanding Regression Output and Diagnostics	161
	Common Problems Affecting Regression Models	162
	Confidence in Forecasted Values	167
	Frequency of the Use of Econometric Techniques in Commercial Litigation	169
	Seasonality and the Forecasting Process	177
	Capacity Constraints and Forecasts	179
	Sensibility Check for the Forecasted Values	180
	Projecting Lost Sales for a New Business	181
	Projecting Losses for an Unestablished Business	186
	Summary	188
	Appendix	189
	References	197
<b>CHAPTER 6</b>	Cost Analysis and Profitability	199
	Presentation of Costs on the Company's Financial Statements	200
	Measures of Costs	201
	Profit Margins and Profitability	201
	Appropriate Measure of Profitability for a Lost Profits Analysis	202

---

Burden of Proof for Demonstrating Costs	206
Fixed Versus Variable Costs	207
Using Regression Analysis to Estimate Costs as Opposed to More Basic Methods	212
Pitfalls of Using Regression Analysis to Measure Incremental Costs	212
Possible Nonlinear Nature of Total Costs	213
Limitations of Using Unadjusted Accounting Data for Measuring Incremental Costs	217
Treatment of Overhead Costs	220
Must a Plaintiff Be a Profitable Business to Recover Damages?	224
Mitigation of Damages	225
Cash Flows Versus Net Income: Effects on the Discounting Process	230
Recasted Profits	232
Firm-Specific Financial Analysis	238
Cross-Sectional Versus Time Series Analysis	240
Summary	240
References	241
<b>CHAPTER 7</b>	
Time Value of Money Considerations	245
Determination of Interest Rates	246
Types of Interest Rates	246
Financial Markets: Money Market Versus Capital Market	247
Money Market Securities and Interest Rates	247
Capital Market	249
Real Versus Nominal Interest Rates	250
Determinants of Interest Rates	255
Prejudgment Losses	261
Components of the Cost of Capital	263
Discounting Projected Future Profits	269
Should the Risk-Free Rate Be Normalized?	272
Common Errors Made in Discounting by Damages “Experts”	276
Summary	282
References	283

<b>CHAPTER 8</b>	Business Valuations	287
	Legal Standard for Business Valuations in Business Interruption and Business Failure Lawsuits	287
	Lost Profits Versus Lost Business Value	290
	Business Valuation Framework	292
	Public Versus Private Companies	293
	Business Valuation Parameters	294
	Revenue Ruling 59–60 and Factors to Consider in Valuation	294
	Valuation Concepts	298
	Capitalization of Earnings	304
	Adjustments and Discounts	308
	Summary	314
	References	316
 <b>CHAPTER 9</b>	 Intellectual Property	 319
	Patents	319
	Computation of Damages for Patent Infringement	325
	Legal Requirements Necessary to Prove Lost Profits	325
	Royalty Arrangements	333
	Copyrights	341
	Measurement of Damages for Copyright Infringement	344
	Trademarks	347
	Trade Secrets	352
	Summary	355
	References	357
 <b>CHAPTER 10</b>	 Securities-Related Damages	 361
	Key Securities Laws	361
	Damages in Securities Litigation	366
	Fraud-on-the-Market	367
	Comparable Index Approach	380
	Event Study Approach	383
	Examining the Variation in Abnormal Returns	386
	Limitations of the Event Study Model	391
	Broker Raiding Cases	394

---

	Merger-Related Damages	400
	History of Mergers in the United States	400
	Client-Broker Claims	405
	Churning	407
	References	415
<b>CHAPTER 11</b>	Antitrust	419
	Antitrust Laws	421
	Antitrust Enforcement	423
	Economics of Monopoly	425
	Interpretation of Antitrust Violations: Structure Versus Conduct	429
	Changing Pattern of Antitrust Enforcement	429
	Antitrust and the New Economy	434
	Monopolization and Attempts at Monopolization	436
	Market Definition and Microeconomic Analysis	440
	Market Power	440
	Measures of Market Concentration	442
	Areeda and Turner's Marginal Cost Rule of Predatory Pricing	452
	Summary	461
	References	462
<b>CHAPTER 12</b>	Economics of Punitive Damages	467
	Evolving Position of the U.S. Supreme Court on Punitive Damages	467
	Frequency of Punitive Damages	470
	Frequency of Punitive Damages and the Shadow Effect of Punitive Damages	471
	Purposes of Punitive Damages	473
	Compensatory Versus Punitive Damages	474
	Criminal Penalties and Punitive Damages in Civil Lawsuits	475
	Punishment of Corporations and Corporate Governance	475
	Spillover Effects and Punishment of Corporations	476
	Deterrence Theory and the Changing Litigation Environment	487

---

Deterrence and Regulatory Processes	490
Typical Financial Measures Used in the Determination of Punitive Damages	493
Net Worth	494
Market Capitalization	497
Uncertain Litigation Environment	503
Summary	508
References	508
